

**Supplemental Information
for
224-250 Thumb Nut, for Valve Cover
MG T Series**

Two of the 224-250 Thumb Nuts are shown with two of the fiber washers 324-610. Together they can be used to secure the valve cover to the cylinder head on the TC, TD, and TF. They are patterned after the thumb nuts fitted to the 1946-47 TCs with the factory alloy valve cover. For additional information, see valve covers 224-225 and 224-226.

The thumb nuts are threaded 8 MM X 1.0 which is correct for the MG T Series valve cover studs; if you have non-original studs, we can supply the correct ones- order two of our 328-770.

Both the thumb nuts and the washers are sold individually, and therefore you will need to order two of each.
