

Front Medallion Fitting Instructions

Part Number: 608377
Description: Front Medallion, Blue/White
Applications: Triumph TR3A: 1957-61

Instructions

Due to the availability in reasonable quantities of the correct size material for the fixing peg the manufacturer has been forced to change the design to incorporate a threaded bar to fix this badge.

We have included a plastic nut which will act as a weak link to eliminate the risk of damage by over-tightening if a steel nut was used therefore you must use the plastic nuts included with this badge, we also suggest that a little sealant is applied to the thread to stop the nut working loose.
