

## Supplemental Information & Instructions for 901-601 Vintage Luggage Rack Miata 90-05 901-610 Vintage Luggage Rack Miata 06-07

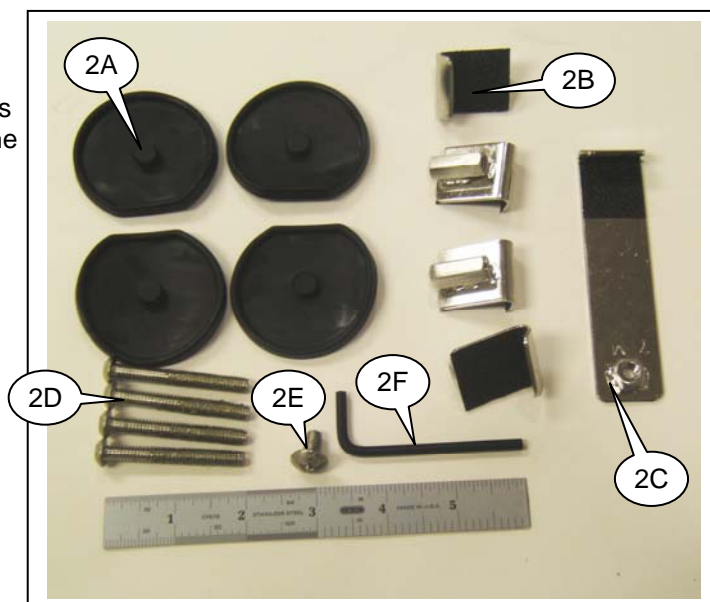

These racks can be installed when you need one, and removed when you don't. Each of the 4 legs has a bracket (1A). There is an additional bracket at the front of the rack (1B). The legs have a flat metal plate that rests on a rubber pad (2A) that protects the paint.

The rack is secured at the very front with a long padded hook (2C). That hook is attached to the rack at the center bracket (1B) with the short screw (2E). With that hook in place, you can move the rack back as far as it will go, so the hook is held tight up against the edge of the trunk lid.

There are four padded hooks (2B) that grab the edges of the trunk lid. They are attached to the rack using the four long screws provided (2D). As the screws are tightened, the hooks are drawn tight up against the edge of the trunk lid.

Both luggage racks are designed to fit the bare Miata trunk lid; neither rack will fit if you have a spoiler fitted.
