

PARTS & ACCESSORIES FOR YOUR

CLASSIC MINI

including technical advice and detailed schematics

moss-europe.co.uk | moss-europe.fr

WHEN ORDERING...

Remember, supplying details of your car, (i.e: engine, commission or VIN, LHD / RHD, year and any modifications) will save time and help us process your order correctly. We will be pleased to provide a full parts quotation, detailing price, availability and shipping costs, upon request.

SHIPPING & DISPATCH

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices.

For delivery outside the UK we offer the following services. Economy delivery (by road): 2 to 5 days (approximately). Express delivery (by air): 1 to 2 days (Guaranteed). For small and low value orders we also use airmail. For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on either gross weight or volumetric weight, whichever is greater. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own collection.

UK OPENING TIMES

Open Monday to Friday
8.30am to 5.30pm

Saturday
9.00am to 1.00pm
(Closed Sunday & Bank Holidays)

See website for Paris opening times

COLLECT FROM BRANCH

Why not reserve and collect your order from one of our branches?

ONLINE

If ordering online select the 'collect from branch/ arrange own pick up' option on the 'Delivery Method' page during checkout. Then select the branch you want to collect your order from. You will receive an email confirming your order and selected branch.

EMAIL

Send an email to sales@moss-europe.co.uk with the title of "Branch Collection". Your e-mail must contain the following information: Your full name, address, daytime contact number, desired branch for collection and part numbers.

COLLECTION

Our sales team will contact you when your order is ready to collect. You will then be able to collect and pay for your order at your requested branch during store open hours. On collecting your order you may be asked to confirm your address.

PRICING

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change.

Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter prices without prior notice. For the latest prices, please call or visit our website moss-europe.co.uk.

All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable). Please note EU countries may be charged at their local VAT rate, countries outside the EU will not be charged VAT. See the ordering information

or our website for further details. Prices are correct at the time of going to print, postage & packaging is not included. E&OE.

90 DAY MONEY BACK PEACE OF MIND WARRANTY

It's simple, if you change your mind for any reason, all uninstalled parts still in their original condition and packaging may be returned to us within 90 days from the date of purchase for a full refund. A copy of the original invoice or picking label must accompany the return. Return freight is paid by the customer, unless returned due to our error.

In the event of a part failing in use, all parts are warranted against defects in materials and workmanship for 12 months from the date of purchase. Please remember that all returns must be accompanied by the original invoice, return freight will be reimbursed. For more details see our website or contact your local branch.

Keep up to date with our latest news and tell us yours.

PAINT COLOURS

Due to the longevity of the Mini production, which combines 41 years of paints and colour codes, there are far too many to be shown here. Therefore we suggest that you contact your nearest Moss branch and discuss your requirements.

The colours that we supply are carefully blended to be an exact match to the original paint as used by the factory, but it is worth observing that your car may well have faded from its original colour over the years. For this reason before you start, we recommend that you do a test spray of any aerosol on a piece of old metal or a carefully selected area of the car where a mismatch will not be noticed. The boot or spare wheel area is often a convenient place to do your testing.

We can supply paint in either aerosol or brush-on format. The aerosols come in 400ml cans and the brush-on paints are available in 125ml cans with a brush in the cap (except for engine and chassis paints, which are supplied in 500ml tins).

TRIM COLOURS

There are many trim colours for the Mini over the 41 years of production. However Moss only stock, red, black and grey. We can supply these colours throughout the whole range of trim including: boot trim, headlining and sun visors, interior trim panel kits, dash liner kits, carpet sets, footwell cover mats, seat cover kits, gear lever gaiters. For more information please contact your nearest Moss branch.

Red trim

Black trim

Grey trim

Please note: Colours may vary slightly to samples shown here, due to the limitations of the colour printing press, and should be used as a guide only.

PISTON RING SET

Replacement piston ring sets for the pistons listed.

Ring set +20 for 3382 +20 pistonsCAJJ3379/20 ... NCA

CAJJ3382/40

FLAT TOP PISTONS

These pistons are made from lightweight alloy AE109TF specification with two heat treatments. They are designed for durability yet lightweight and have a crown thickness 1.2mm thicker than other leading pistons. Ideal for machining for long stroke cranks. Sold individually complete with rings.

Flat top pistons +20 1275ccCAJJ3382/20 ... NCA

Flat top pistons +40 1275ccCAJJ3382/40 ... £74.00

Flat top pistons +60 1275ccCAJJ3382/60 ... £74.00

CON RODS FOR COOPER S

Reproduced to original specification, these EN24V con rods are the strongest production A series rod produced. 1.625" big end journal size with 5.75" centres.

Con rod (each)AEG624 £156.20

DUPLEX GEAR SET

It is preferable to change from single row chain (simplex) to twin row chain (duplex) as the duplex is less prone to stretching. The cam timing can also be optimised via an adjustable cam gear, or via offset cam keys. Please see manufacturers data for correct timing figures.

Kent cams vernier adjustable duplex kit TMG10828 . £117.00

CAEG579

LIGHTENED CAM FOLLOWERS

Lightening the valve train helps improve engine response. Our lightened cam followers weigh just 40g and come with an oil drain hole.

Lightened cam follower (each) TMG10709 £7.70

Lightened cam follower setCAEG579 £47.20

CAM GEAR LOCATING KEY

These offset keys make getting the best out of your camshaft easy. Please see manufacturers data for correct timing figures.

Cam gear locating key 1° offset MGS108251 ... £10.10

Cam gear locating key 2° offset MGS108252 ... £9.70

Cam gear locating key 3° offset MGS108253 ... £9.70

Cam gear locating key 4° offset MGS108254 ... £9.70

Cam gear locating key 5° offset MGS108255 ... £10.10

Cam gear locating key 6° offset MGS108256 ... £9.70

Cam gear locating key 7° offset MGS108257 ... £9.70

Cam gear locating key 8° offset MGS108258 ... £9.70

Cam gear locating key 9° offset MGS108259 ... £8.70

Cam gear locating key kit 2°, 4° & 7° offset MGS10725 ... £28.00

ALLOY TOP CAP

Alloy top cap (each) TMG10816 ... £15.00
(Half the weight of steel).

VALVE SPRING SETS

Dual spring set 200lbs - road use TMG10807 ... £38.60

Dual spring set 250lbs - race use TMG10808 . £131.50

VALVE GUIDES

Bullet shaped valve guides allow better flow without loss of durability.

Bronze alloy valve guides are required when fitting EN214N steel valves.

Bronze valve guide set (set of 8) TMG10819 ... £50.40

Iron valve guide tapered nose (each) 12G1963 £2.06

Top hat seal (Rover valve stem oil seals) ADU4905 £0.61

VALVES

Our competition valves are produced in EN214N steel and require installation with bronze valve guides (TMG10819). They are single groove collets (88G459).

Inlet valve 35.6mm high flow 1275cc (EN214N) . CAEG544 £19.80

Exhaust valve 29.4mm high flow 1275cc (EN214N) . CAEG106 £15.40

Rimflow valves are considered to be the best valves on the market. Produced in EN214N steel but they have chromed plated stems to enable them to be installed with iron guides although we recommend bronze guides as these help with heat dissipation. Rimflow valves use single groove collets (88G459).

Rimflow inlet valve 35.6mm 1275cc (EN214N) . MST2021 £33.30

Rimflow exhaust valve 31mm 1275cc (EN214N) . MST2012 £31.20

Valve 'Cotter' (2 per valve) 88G459 £1.20

See moss-europe.co.uk
for full details.

ALLOY CYLINDER HEAD - CROSSFLOW

Add power to your A Series with this 7 port crossflow aluminium cylinder head. The crossflow design and larger inlet ports overcome the Siamese head's breathing restrictions providing as much as 25% prior to further modification.

The cylinder head is lighter weight and features an integrated cast inlet manifold (for DCOE carbs or throttle bodies); has an increased air flow rate; runs cooler and allows for higher compression ratios. Special spark plugs are required.

Alloy cylinder head - crossflow assembled 451-808 . . . £1370.00
(Assembled with valve guides, seats, valves & springs)
Alloy cylinder head - crossflow bare 451-807 . . . £1245.00
(Fitted with valve guides & seats)
Spark plug - NGK (each) ER9EH £14.90

ENGINE STEADY KIT

A common problem with Minis is their tendency to destroy engine mounts and steady bar bushes, leading to exhaust down pipe breakage. This is the best engine steady kit available. It mounts neatly on the top two bolts of the water pump and on to the bulkhead. It has an adjustable tie rod with rubber bushes, but can be uprated with one piece SuperPro bush. Suitable for all models including LHD cars.

Ultimate engine stabiliser kit ABR024 £37.80
Solid bush with sleeve (each, 2 per bar) CRC5329SP . . . £4.33

POLY ENGINE STEADY BUSHES

We recommend using polyurethane engine steady bar bushes as they give maximum control and are very hard wearing. We supply a polyurethane bush to fit the top RH steady bar from the engine to the bulkhead (below the master cylinders), this solid one piece bush for maximum control.

Note: Always install polyurethane bushes with grease provided.

Solid bush with sleeve (each, 2 per bar) CRC5329SP . . . £4.33

UPDATED HEAD GASKETS

To reduce the risk of head gasket failure on high compression performance engines it is wise to fit one of these uprated, copper faced, head gaskets. The manifold gasket is to be used when the exhaust and inlet ports have been modified on 1275cc cylinder heads.

Copper asbestos competition head gasket 1275cc AHT188 £20.80
Uprated head gasket 998cc MST207 £10.80
Uprated head gasket 1275cc MST208 £16.20
Competition manifold gasket large ports 1275cc . TMG10836 . . . £4.33

ALLOY CYLINDER HEAD - 5 PORT

Alloy cylinder heads are an excellent alternative to the original cast iron unit as they are lighter and manufactured with design improvements. The water jacket has been improved to prevent the creation of hot spots and the valves are repositioned to allow up to 38mm inlet and 32mm exhaust valves. Special spark plugs are required.

Alloy cylinder head - 5 port assembled 451-876 . . . £1184.00
(Assembled with valve guides, seats, valves & springs).
Alloy cylinder head - crossflow bare 451-875 . . . £1075.00
(Fitted with valve guides & seats).
Spark plug - NGK (each) DCPR7E £6.72

STAGE 3 IRON CYLINDER HEAD - 5 PORT

Cylinder head assembly Stage 3 unloaded, ports enlarged and chambers reshaped new 35.6mm inlet and 31mm exhaust, bronze guides and Moss ST valve springs.

Building a retro replica?..

CYLINDER HEAD STUD KIT

You should consider the strength and reliability of all the critical fasteners used on your engine. Increased reliability can be obtained for mild states of tune by replacing the head studs and nuts with uprated versions. The greater strength of these studs will restrict stretching under pressure and therefore keep the head and gasket securely in place.

Kent cams 9 studs and nuts competition kit . . . TMG10864 . **£194.20**
Kent cams 11 studs and nuts competition kit . . . MGS10864 . **£190.90**

TMG10864

EN24 nickel chrome moly steel studs, competition head stud kit (11 studs, nuts & washers). This special kit was developed to replace the increasingly inconsistent standard items. The studs are manufactured in selected hi-grade steel and produced to exacting specifications. These studs do not stretch, so they pull the head down, not the thread up, this vastly increases head gasket life, even on high compression engines. Special thick washers, countersunk on one side, help clamping capability and reduce thread bottoming of the nuts.

The 12 point skirted nuts help to increase torque accuracy through better engagement. Note that even replacing the head bolt with a stud, only torque that stud to the factory recommended spec (25ft/lbs), the other studs can be torqued to 65ft/lbs with oil, 55ft/lbs with ARP lube.

11 studs and nuts competition kit AHT280 **£77.10**

KENT PERFORMANCE CAMSHAFTS

All the Kent camshaft applications/part numbers below with the suffix 'P' are for the original pin drive oil pump/camshaft. If you have changed your camshaft and oil pump to either 'Star' drive or 'Metro Slot', use the suffix 'S' or 'M' on the part number.

To assist in selecting a suitable camshaft we have prepared a table showing their various characteristics, these will change from engine to engine and with other modifications such as carburettor or valve size. A scatter profile is where the cam timing on No. 2 and 3 engine cylinders has been altered slightly to combat the poor scavenging of the siamese port design. This will benefit both the tickover and high end performance. The effect of a larger engine is to lower the camshaft's power range slightly.

Care must be taken to ensure that installation is carried out correctly and

UPRATED ROCKER SHAFT

To enhance valve train strength and reliability especially in high revving engines.

Tufrided rocker shaft TMG10817 . . **£27.60**

SOLID ROCKER SPACER SET

The spacer replaces the springs reducing side loading on the rocker arms cutting resistance and creating less drag.

Solid rocker spacer set (set of 3) CAEG392 . . . **£16.80**

AHT438

UPRATED ROCKER ASSEMBLIES

Roller rockers are stronger than the standard set up and are designed to operate the valves with less resistance, these kits also give higher lift than standard at a ratio of 1.5:1 instead of 1.3:1. Always use with uprated valve springs and check carefully for clearance.

1.5:1 ratio rocker assembly 1275cc AHT438 . . . **£272.40**

1.5:1 ratio titan rocker assembly 1275cc TMG10848 . **£714.50**

that components all work together or you will not get the expected power output or reliability. It is essential that the new cam is fitted with new followers as they mate with the lobe that they run on and should never be used on another lobe.

Lightened and Tufrided followers wear more slowly and put less load on high lift cam lobes, they are also manufactured with a drainage hole. Another essential is the special lubricant that must be used with all new cams, it provides vital lubrication during initial starting and protects your cam from extreme wear in its first minute of use.

KEN2

TT2929

Camshaft accessories

Don't forget the camshaft assembly lubricant or the cam timing degree disc, you will need this to set your cam timing.

Cam lubricant 250ml KEN2 **£7.90**

ALLOY ROCKER COVER & FITTINGS

An alloy rocker cover will improve the appearance of your engine bay and, as an added advantage, will help to muffle valve train noise. Always fit a new gasket when replacing your rocker cover, and do not over tighten rocker cover nuts. We offer a range of accessories for the rocker cover including anodised T bars for a custom appearance.

Ribbed rocker cover - polished GAC4068P . . . £26.40
 Ribbed rocker cover - red GAC4068R . . . £37.00
 Ribbed rocker cover - blue GAC4068B . . . £37.00
 Fitting kit for rocker cover GAC4069FK . . £14.90
 (Fitting kit includes: Oil cap, seals and chrome spacers/nuts/washers).
 Ribbed rocker cover kit - polished WPA9007X . . £37.00
 (Kit includes: Rocker cover GAC4068P and fitting kit GAC4069FK).

 Washer & grommet kit GAC4069WK . . £4.44
 Rocker cover gasket GUG705009VC . . £1.26

PEDAL BOX ASSEMBLY

This Mini pedal box is a lightweight mild steel under-slung design, that offers the driver the highest level of efficiency in this critical area. The ergonomic design features a fabricated lightened steel brake and clutch pedal with oil impregnated spherical bushes that sets new standards in pedal box design.

This pedal box is fitted with a bias bar that operates a dual master cylinder braking system, giving total control over the braking from front to rear.

Kit contains: 1 x 3 pedal Mini pedal box, with bias bar, 3 x master cylinders, 1 x clevis, 3 x reservoir, 3 x stainless steel 560mm long feed hoses, 1 x bias cable adjuster.

Pedal box assembly (brake bias 6:1 ratio) MPB1275 . . . £773.80

HEATER TAP

This is the closest you will get to an original Cooper S heater tap for that added retro look. This tap allows water to flow from the head to your heater, a perfect retro replacement if your heater taps fails.

Heater tap (non standard) JJC10018 . . . £31.10

COBALT SILICONE HOSE SETS WITH CLIPS

Upgrade the cooling system with these high quality multi-ply silicone hoses. Available in a choice of colours they include stainless steel clips, ensuring a long life. These kits fit all side mounted radiator models, except SPI and MPI. Trimming of the top hose is required to suit your car. Instructions included.

Cobalt silicone hoses - black MT3205 . . . £110.00
 Cobalt silicone hoses - blue MT3206 . . . £110.00
 Cobalt silicone hoses - red MT3207 . . . £110.00

HIGH PERFORMANCE RADIATORS

A 2 core radiator is ideal for fast road while for race applications a 4 core is best where extreme cooling is required. For the ultimate cooling use our alloy radiator, suitable for all applications due to better heat sinking through the aluminium construction and it looks great! Our special 3 core fast road radiator has been developed to include an M22 x 1.5 threaded boss in the header tank, this allows easy fitting and adjustment of the Revotec fan controller or installation of thermal switches.

2 core high performance radiator - fast road . . .	GRD4442 . . .	£152.90
2 core high perf. radiator with fan switch - fast road .	GRD4443 . . .	£174.70
3 core high perf. radiator - boss in header tank . .	GRD4442TDF	£77.10
4 core high performance radiator - race	GRD4444 . . .	£145.60
Alloy radiator (side mounted)	MT3104 . . .	£257.50

Fan switches for use with GRD4442TDF, MT3104 can be used to switch any electric fan on or off. Electronic fan controller (RFC010) can be adjusted for different temperatures.

Thermo switch 82-68°	IM50100	£8.00
Thermo switch 88-79°	IM50120	£8.30
Thermo switch 92-87°	IM50200	£8.70
Thermo switch 88-74°	IM50250	£8.30
Electronic fan controller, thread fitting M22 x 1.5 .	RFC010	£75.60

KLINGERSIL GASKET

These gaskets are manufactured from a modern high performance synthetic material that can withstand much higher temperatures (up to 400°F) and extreme pressures (up to 750psi) making them ideal for fast road and competition engines.

Gasket thermostat housing uprated	GTG101X	£1.08
---	-------------------	-------

COOLING FANS

Fit a Special Tuning style two blade fan or for extra air flow use this 6 blade fan, as used on export Minis. Metal construction finished in yellow paint.

2 blade fan	2A997	£34.50
6 blade fan	2A998	£43.00

REVOTEC COOLING FAN KIT

Keeping the engine of your Mini running at its optimum temperature ensures you get the best performance and economy. These kits are designed to replace the standard original mechanical fan, reducing the load of the engine and noise and improving power and mpg.

Revotec have designed these kits using a special slim-line motor to fit neatly between the radiator and inner wing. Unlike other fan kits that use universal mounting systems, this kit fits using bespoke laser cut brackets that mount directly to the radiator cowling using existing mounting bolts. Not suitable for automatic models. A manual override switch is also available separately, enabling manual control of either On, Off or Automatic.

Kit includes: High efficiency fan assembly, electronic controller, bespoke brackets, hardware & wiring, & full instructions.

Revotec fan kit	RFK80	£194.00
Manual override switch	RFC020	£37.00

KENLOWE COOLING FAN KIT

Fitting a Kenlowe fan will reduce the engine warm up time, prevent excessive cooling and allow the engine to operate closer to its ideal running temperature. Removal of the standard fan will help with reducing engine noise, and improve power/mpg. Kenlowe fan kits are recommended as replacements for the mechanical fan where the cooling system is in good condition and there are no overheating issues. Where cooling issues are present then a Kenlowe fan kit may be used as a secondary booster to assist the mechanical fan. However, we recommend that any cooling system problems are addressed and repaired as necessary.

A manual override switch is available separately, allowing the fan to be operated at any time giving maximum control of the engine's temperature. Kit includes fan, motor, thermostatic switch, wiring, mounting hardware and instructions.

Kenlowe fan kit, 10" (suction)	GAC8411X2	NCA
Manual override switch	TT2948	£11.80

OIL COOLER KITS

These days we expect our cars to cope with high speeds for long periods of time, on motorways etc... These conditions stress the standard oil system of the Mini, as high engine speeds cause the oil to heat up and thin, reducing its viscosity and leading to a subsequent drop in oil pressure and possible premature engine wear. Oil cooler installation kits are available with either rubber or braided stainless steel hoses, the oil radiators themselves are sold separately. These are for non front mounted radiator models.

Oil radiator 10 row	ARO9807	£68.30
Oil radiator 13 row	ARA221	£39.30
Oil radiator 13 row, Mocal	ARO9809	£82.10
Oil radiator 13 row heavy duty	ARA221X	£130.60

Oil cooler kit rubber hose (to 1979)	OCHK100	£31.60
Oil cooler kit rubber hose (Clubman) (to 1979)	OCHK101	£42.00
Oil cooler kit stainless steel hose (to 1979)	OCHK102	£42.20
Oil cooler kit rubber hose (1979-84)	OCHK103	£58.75
Oil cooler kit stainless steel hose (1979-84)	OCHK104	£71.30
Oil cooler kit rubber hose (1985 on)	OCHK105	£49.70
Oil cooler kit stainless steel hose (1985 on)	OCHK106	£59.00

SPIN-ON OIL FILTER ADAPTORS/CONVERSIONS

Fitting a spin-on filter adaptor makes changing the oil much easier and cleaner, it also prevents oil draining out of the filter giving better oil pressure on start up. Oil filters supplied separately.

Spin-on oil filter conversion 948-1275cc	GFK1001	£73.20
(For Tecalmit heads & Purolator heads, except casting number MIC90020).		
Oil filter - K&N Performance Gold	235-830	£14.00
Oil filter - standard (for GFK1001 only)	GFE166	£2.69
Spin-on oil filter conversion & hose 948-1275cc	235-875	£45.20
(This spin-on conversion is suitable for all models as it replaces the filter head and pipe assembly. Ideal if filter head or pipe is damaged or missing).		

OIL TEMPERATURE GAUGE ADAPTOR

If you want to fit an oil temperature gauge then use one of our in line adaptor.

Push-on temperature 1/2" adaptor	TT2969	£48.90
Screw-in temperature 1/2" adaptor	TT2961	£81.10

OIL COOLER THERMOSTATS

Use these thermostats to limit the flow of oil through the oil cooler until it has reached a temperature of 74 degrees Celsius.

The standard oil thermostat has push on connectors for use with 1/2" rubber hoses and comes with hose clips. It seals off the radiator completely until the oil is up to temperature. The full flow oil thermostat restricts flow to the radiator by allowing it to bypass through the thermostat until the oil is up to operating temperature. Use screw unions TT29602 to connect hoses to the full flow thermostat.

Push-on standard oil thermostat	TT2960	£47.80
Screw-in full flow oil thermostat	TT29602	£144.70
Straight 1/2" unions (pair)	TT2961	£9.30
(For use with screw in temperature adaptor and thermostat).		

OIL PUMPS & VALVES

Good oil supply is a must, with the Mini's cornering capabilities oil starvation is a possibility all precautions should be taken. The oil pressure regulator allows you to adjust the preload on the oil pressure relief valve so you can alter the peak oil pressure. Please remember oil pumps require priming before fitment. Always remove spark plugs and spin engine over until oil pressure registers. See page A23 for K&N performance oil filters.

1 Oil pump turbo large capacity	GLP110	£41.20
2 Oil release stainless steel valve ball	12H865X	£2.16
(No sticking valves).		
3 Oil valve spring (use with 12H865X)	6K853C	£1.61
4 Adjustable oil pressure valve - black	MT1112	£16.50
5 Adjustable oil pressure valve - blue	MT1113	£16.50
6 Adjustable oil pressure valve - red	MT1114	£17.00

OIL CATCH TANKS

A must for competition use to prevent oil spillage on the track. Manufactured from high grade aluminium and anodised for a smart, durable finish they feature 2 x 1/2" OD connectors for the breather hoses, level indicator, breather cap and drain plug. Available in 1 litre or 2 litre sizes. Mount using the rear flange to a suitable vertical panel in the engine bay.

Oil catch tank 1lt	TT2900	£152.20
Oil catch tank 2lt	TT2901	£169.40
Breather hose - 1/2" ID (per metre)	BAU5065M	£10.70
Hose clip (each)	GHCI1016	£1.91

CENTRAL OIL PICK UP

The standard oil pick up pipe is located to the RH side of the gearbox and oil surge during cornering can send the oil away from the pick up. This central oil pick up relocates the pick up point to the centre of the gearbox ensuring it is always submerged. Recommended if you are rebuilding the engine or gearbox.

CAHT54 £31.70

ANODISED DIPSTICK

These are beautifully crafted dip sticks which use two rubber 'O' rings to secure them into the engine, with a choice of either a red or blue anodised knob.

Dipstick with anodised knob - blue
GAC8457X £10.70
Dipstick with anodised knob - red
GAC8458X £10.70

MAGNETIC OIL TRAP

Designed to collect any metal particles at the top of the pick-up pipe, before they reach and destroy the oil pump. For all A series transverse engine and gearbox assemblies.

MS3313 £19.80

QUICK GEAR SHIFT KITS

Shorten the throw between gear changes... This kit improves feel and reduces gear lever travel resulting in a faster, slicker change. Available for either remote or rod type gearboxes, the kits include a modified gear lever, retainer and mounting hardware for simple installation.

Quick shift kit remote type
KAD1013218 £70.50
Quick shift kit rod type
MRAC1751 £44.50

CAJJ4014

STRAIGHT CUT GEAR KITS

The original design Special Tuning gear ratio set is available in three versions. Remote type and two rod type gear kits A series and A+. A series main shaft has 14mm nose into 1st motion shaft and A+ has 18mm nose on main shaft.

Straight cut gear kit remote type CAJJ4014 ... £557.40
Straight cut gear kit rod A+ type CSTN77 ... £579.30

CLUTCHES

The much sought after 22G270 'S' clutch back plate has been out of production for many years, but has now been replaced with CAHT230. It was liked because of its strength. Although not steel, it was cast in a very high grade iron, the exact same material used here. This item is cast fairly light 3.56lbs (Std 5.7lb), but can be lightened further if required, call for details.

Clutch pressure plate CAHT230 ... £126.20
Clutch plate - road/rally GCP596 ... £106.30
Clutch cover - road/rally GCC481 ... £40.50
Clutch cover - rally/race GCC482 ... £47.80

CAEG619

LIGHTWEIGHT STEEL FLYWHEELS

Using a lightweight steel flywheel has the same effect as lightening the car. Reducing the mass of rotating components in the engine helps the engine accelerate more easily leading to better acceleration of the car. These high quality steel flywheels are considerably lighter than the standard cast items and offer improved strength and a harder wearing clutch face. Their symmetrical design means they also reduce harmonic vibrations.

We offer flywheels in two specification; Roadlite and Racelite. Roadlite flywheels weigh in at 5kgs (11lbs), half the weight of a standard 1275cc. Our Racelite flywheels weigh in at just 3.63kgs (8lbs) for maximum weight saving in competition engines and are manufactured from EN8 grade steel.

Roadlite lightened flywheels

Diaphragm clutch with pre-engaged starter CAEG420 ... £166.40

Racelite lightened flywheels

Diaphragm clutch with inertia starter CAEG619 ... £173.70

GEARBOXES

These reconditioned gearboxes are available in either standard rod type or standard remote type. Both are subject to exchange.

Gearbox recon. standard rod type (exchange) ... MT2101 ... £503.20
Gearbox recon. standard remote type (exchange) ... MT2102 ... £480.70

CAJJ3385

CROSS PIN DIFFERENTIAL UNITS

With twice the standard number of cross pins and planet gears this differential can handle significantly more power without breaking and as an added bonus it has less tendency for torque steer.

EVO cross pin diff. unit (four planet gears) . . CAJJ3385£188.00

Diff. pin competition strength for standard diffs. C-BTA166£17.00

(*Stronger semi helical cut teeth for standard or cross pin differentials).

CAJJ3387

LIMITED SLIP DIFFERENTIALS

Evolution LSD is an upgraded version of the popular Salisbury clutch type. It has improved clutch material and a unique design for smooth transitions between loaded and unloaded. Extremely easy and predictable to drive. The first number is the deceleration ramp: 90 degrees deceleration ramp gives no drive. The second number is the acceleration ramp: 35 degrees acceleration ramp gives more drive, their round cross-section and matching curved ramps facilitates changes to the locking action on acceleration and deceleration of the differential.

WEBER DCOE THROTTLE LINKAGES - MANGOLETSI

Mangoletsi is a long established name in the performance tuning industry, and a leading manufacturer of competition inlet manifolds & throttle linkages. We now offer Mangoletsi's new range of DCOE 'sliding set-up' throttle linkages.

This new simple design features a cast bracket which fits over the top of the carburettor, holding the linkage neatly to the side of the carburettor. This unique design has an ultra-low profile - the highest point of the linkage is only 10mm higher than the carburettor, ideal if clearance is limited. Each kit is suitable for single or twin carburettor set-ups for in-line engines.

The unique design also gives a wide range of throttle adjustment. Cable travel and spring tension can be adjusted independently. The adjuster can be set to give the desired cable travel, the spring tension can then be set to give the correct throttle shut off. This allows the throttle feel to be fine tuned to the driver's requirements.

Throttle linkage DCOE - twin cable LP42451 **£102.60**

Throttle linkage DCOE - single cable LP42411 **£89.50**

Carburettor
not included

WEBER DCOE THROTTLE LINKAGES - WEBCON

Webcon linkages have been designed to offer a variety of fitting layouts to give flexibility of installation.

The lightweight construction is manufactured from steel and zinc-plated to match existing components on the carburettor, giving an OEM look.

Available in top or bottom mount for single or twin cables. Cables can be routed from either side and the linkage offers adjustment for cable movement from 22-40mm. The outer cable is retained in the adjuster whilst the inner cable fits to a quadrant cam, featuring sintered bronze bearings, giving a smooth linear action. High quality 8mm ball joints, with an opposed threaded rod, are used on the linkage for ease of adjustment and set up.

Single cable kits use the existing throttle cable whilst the twin cable kits include a pair of nylon lined cables and an adaptor block to convert the throttle pedal.

TWIN SU ALLOY INLET MANIFOLD

This intake manifold is for twin SU's (HS2 or HS4).

Twin SU alloy inlet manifold LP4012 **£163.00**

C-AEG489

TWIN SU ALLOY INLET MANIFOLD

This intake manifold is for twin SU's (HS4 or HS6) produced to the original Abingdon ST design. The throttle bracket is suitable for twin SU manifolds.

Twin SU alloy inlet manifold C-AEG489 . . . **£72.80**

Twin SU throttle bracket AEG349 **£6.40**

Screw for throttle bracket SH504041 . . . **£0.36**

WEBER INLET MANIFOLDS

Single Weber/Dellorto inlet manifold 10cm (4 inch) long. This manifold will require bulkhead modifications.

Single Weber/Dellorto 10cm inlet manifold TT10850 . . **£153.40**

Single Weber/Dellorto inlet manifold 15cm (6 inch) long. Supplied complete with direct acting throttle linkage. Will require bulkhead modifications.

Single Weber/Dellorto 15cm inlet manifold TWM0071 . . **£321.00**

HIGH FLOW ALLOY INLET MANIFOLD

High flow alloy inlet for 1.75" carburettors, the larger ports make this manifold ideal for large capacity engines e.g. 1380cc.

High flow alloy inlet manifold MT3603 **£57.90**

Blanking plug (if brake servo not used) ADP210 **£6.24**

Sealing washer AED172 **£0.98**

CSI-IGNITION DISTRIBUTORS

CSI-Ignition distributors offer a fully electronic ignition system built into the correct type of Lucas distributor housing to suit your car, keeping the original appearance in the engine bay. You can only tell the difference when you remove the distributor cap!

Gone are the points and condenser and mechanical advance mechanism, all replaced with a high quality electronic ignition system manufactured using military specification components for durability and reliability.

These distributors are maintenance free (no points to adjust), and offer the benefits of, easier starting and smoother running, more torque and power, reduced fuel consumption and emissions.

See page A22 for more information

REVOTEC COOLING FAN KITS

Keeping your engine running at it's optimum temperature will ensure the best performance and economy.

Revotec and Moss Europe have co-designed these high quality bespoke fan kits using the latest high efficiency fans with adjustable electronic controllers. These kits are designed to replace the standard original mechanical fan, reducing the load on the engine, noise and improving both power and mpg.

Unlike other fan kits that use universal mounting systems, these kits fit using bespoke laser cut brackets that mount directly to the radiator cowlings using existing mounting bolts.

See page A09 for more information

PERFORMANCE EXHAUST MANIFOLD

This highly polished stainless steel manifold is designed to work with our range of Fletcher performance exhausts, page A18. Made from 304 stainless the finish and the welding on this product is just about as good as it gets.

LCB stainless steel non-catalyst models MT6506 . . . **£145.40**
Blanking plug for lambda sensor (as required) . . . WPE1104X . . . **£4.12**

PRO FLO LCB MANIFOLDS

New to the market, these well designed Pro Flo manifolds feature a larger secondary pipe than usual. Perfect for performance tuning on fast road cars.

Pro Flo exhaust manifold injection models MT6507 . . . **£79.00**
Pro Flo exhaust manifold carburettor models . . . MT6508 . . . **£79.00**
Blanking plug for lambda sensor (as required) . . . WPE1104X . . . **£4.12**

LCB MANIFOLDS

The medium bore long centre branch manifold (LCB) is probably the most popular for the Mini in production today. Suitable for engines up to 1380cc this is the first step to greater performance. This Manifold long centre branch exhaust manifold is for applications up to 100bhp and includes primary pipes and Y piece with clamps.

LCB mild steel manifold (carbs. to 100bhp) . . . GAC8463X . . . **£85.00**

FREEFLOW MANIFOLD

This freeflow exhaust manifold is specifically manufactured in mild steel for the Cooper model.

Freeflow mild steel manifold MT6101 . . . **£88.40**

STAGE ONE TUNING KITS

MTK1275

Our stage one tuning kits are available for both the 998cc & 1275cc carburettor Classic Mini models. When developing the tuning kits, only tried and tested high quality components that would actually improve the Mini's performance were selected.

For example; the Moss kit uses the legendary RC40 exhaust system which not only adds bhp but also produces a satisfying sporty tone, while remaining suitable for all types of driving.

These comprehensive kits contain everything required for fitting to a standard car, including a new needle and spring for the carburettor.

Stage one tuning kit (998, 1071, 1098cc) MTK998 . . . **£219.30**
Stage one tuning kit (1275cc) MTK1275 . . . **£267.00**

EXHAUST HEAT INSULATION

Wrapping a tubular manifold will keep engine bay heat to a minimum, reducing engine bay temperatures by up to 70%. This will benefit power in two ways; firstly it will reduce the temperature of the air going into the engine; secondly, it improves the effectiveness of the manifold by increasing gas speed due to lower gas density, increasing the scavenging effect.

This race proven, asbestos free, product from Thermo-Tec is manufactured from Silica based yarns and is unaffected by oil or water, whilst withstand temperatures of up to 1000°C. As a guide to coverage a 2" x 50' roll will cover approximately 13ft of 2" pipe. Manifold wrap is supplied in a variety of sizes, see below for details. Use Snap Straps to hold the wrap in position.

Roll size (W x L)	Natural	Black
1" x 15' roll	GAC150 £13.10	GAC151 £15.20
2" x 15' roll	GAC152 £21.60	GAC153 £23.80
1" x 50' roll	GAC154 £38.20	GAC155 £42.40
2" x 50' roll	GAC156 £65.00	GAC157 £71.70

Manifold blanket

Using a manifold blanket provides excellent heat retention for exhaust manifolds and can be easily installed to both cast iron and tubular manifold. Manifold blanket should be retained with Snap Straps.

Manifold blanket 4-6 cylinder	GAC182 £109.60
Manifold blanket V8 2 piece	GAC183 £116.60

Snap Straps

Use Snap Straps to hold the wrap or blanket in position.

Snap Strap kit 8 x 9" & 4 x 18" lengths	GAC172 £34.90
Snap Strap kit 6 x 9" & 4 x 18" lengths	GAC173 £30.50
Snap Strap kit 12 x 9" lengths	GAC174 £32.80
Snap Strap kit 6 x 18" lengths	GAC175 £21.60
Snap Strap kit 4 x 14" lengths	GAC176 £10.90

HEAT SHIELD

Radiant heat coming through the floors and bulkhead can make the cockpit of your Mini a hot place to be. Insulating the floors and bulkhead not only keeps the heat out but it can also prevent damage to carpets, paintwork and interior fittings where exhaust pipes, silencers and catalytic converters are in close proximity to the panelwork.

Exhaust heat shield can be used on the underside of the floors where the exhaust runs close to the floor particularly above silencers and catalytic converters. It effectively reflects 90% of the radiant heat from exhausts and can withstand temperatures up to 1000°C. The general purpose material can be used to cover bulkheads and floors to keep general heat transfer to the cockpit to a minimum. It can also be used to wrap and cover components in the engine bay to prevent heat damage.

Exhaust heat shield 40" x 24"	GAC184 £86.80
General heat shield 1m x 1m	GAC185 £79.10
High temperature adhesive	GAC9908X £9.80

TWIN SU STAINLESS STEEL HEAT SHIELDS

These new mirror finish stainless steel heat shields not only look great they also redirect some of the heat from the exhaust manifold.

Twin SU stainless steel heat shields for HS2	MST018 £22.00
Twin SU stainless steel heat shields for HS4/6	MST019 £22.00

LARGE PORT MANIFOLD GASKET

The large ports on this gasket allow fitment of performance manifolds with larger primary pipes.

Manifold to cylinder head gasket	TMG10836 £4.33
--	---------------------------------

REAR SILENCER FITTINGS

Early Minis used rubber blocks to hang the original exhausts from. The Play Mini range uses the later type of hook brackets and rubber hangers. These fitting kits contain all components, including the hanger conversion brackets, to allow easy installation. Simply use hanging rubbers for late cars.

Fitting kit side exit	WPE3003X £42.00
Fitting kit centre exit	WPE3002X £27.50
Subframe hanger bracket front	PME48 £15.40
Subframe hanger bracket rear	PME49 £15.20
Hanging rubber	GEX7661 £3.88
Catalytic converter gasket	GEX7761 £1.86

STEPPED ADAPTOR

This useful adaptor allows the fitting of any back box to a standard system. Simply cut the existing system where appropriate.

Stepped adaptor 1.25" to 2"	PME43X £21.00
---------------------------------------	--------------------------------

MIKALOR EXHAUST CLAMPS

These high quality stainless steel clamps are ideal for use on your Mini exhaust. The strap design and clamp mechanism ensure that even clamping pressure is applied all round the joint.

Mikalor clamp 1 1/2" (37-40mm)	TT9930S £2.16
Mikalor clamp 1 5/8" (40-43mm)	TT9931S £2.46
Mikalor clamp 1 3/4" (43-47mm)	TT9932S £3.40
Mikalor clamp 1 7/8" (47-51mm)	TT9933S £2.57
Mikalor clamp 2" (51-55mm)	TT9934S £2.57
Mikalor clamp 2 1/4" (55-59mm)	TT9936S £2.57
Mikalor clamp 2 1/2" (63-68mm)	TT9938S £2.93

RC40 & RC50 EXHAUST SYSTEMS

The RC40 and the stainless steel version, the RC50, are renowned as 'the systems' to have when improving the Mini performance. With tuned silencer boxes, and computer optimised tube lengths the system can release more power when combined with the LCB manifold.

We also stock just the rear RC40 silencer fitted with a pipe to bolt straight on to the catalyst for cars built late 1991-on SPI & MPi (not early carb coopers). The intermediate pipes are the correct length and shape to fit directly to the Cooper Freeflow exhaust manifold but will require a short length of the front part of the pipe to be cut off to fit an LCB exhaust manifold.

RC40 and RC50 Exhaust Systems - Carburettor Models without Catalyst (All kits include intermediate pipe).

RC40 system, side exit single box, mild steel GEX40RCS . . . £48.30

RC40 system, side exit twin box, mild steel GEX40RC . . . £63.00

RC50 system, side exit twin box, stainless steel . . GEX50RC . . £224.50

Exhaust hanger, rubber GEX7661 . . . £3.88

PLAY MINI MAGIC PIPE

For those of you who don't want to fit an LCB manifold to the car this pipe is designed to fit to the original cast manifold but will enable you to fit most of our systems to your car. **Please note this pipe is for carb models only.**

Down pipe (Magic Pipe), stainless steel PME43M . . . £53.80

Manifold clamp GEX7046 . . . £2.46

Exhaust clamp 2" GEX9009 . . . £0.84

PERFORMANCE EXHAUSTS

trying to work out what piece fits with what...

To help with the selection of our performance exhaust systems, we have added these simple layouts for carburettor and injection models to make things a little clearer. It's as easy as 1, 2, 3, (4, 5)... The layout starts at the front of the car with the manifold working its way back.

Many Classic Mini owners like the rumble from a performance exhaust system. There are many options available and it can be confusing

The selected exhaust system pieces shown here are known to fit together so that you can choose the pieces you want and avoid any problems with fitment.

If you're still unsure about what you need please call us and we will be happy to help.

GAC8470X

GAC8470CC

COIL CLAMP & COVER

Brighten up your engine bay with our stainless steel coil clamp and covers for standard coils only.

Stainless steel coil clamp only GAC8470X **£8.30**

Stainless steel coil clamp & coil cover set GAC8470CC . **£12.90**

MT3201

SILICONE HT LEADS

These HT lead sets are made from high quality silicone. Offering high conductor performance with awesome looks.

Performance HT leads 8mm - blue MT3200 **£14.40**

Performance HT leads 8mm - red MT3201 **£14.40**

GDC103

COBALT PERFORMANCE HT LEAD SETS

Get the spark from your coil with silicone HT leads that are designed to perform. These Cobalt leads use a high performance conductor to transmit greater energy to the spark plug creating a stronger spark for improved combustion. They also feature multi-layer reinforcing and insulation with protective silicone outer sleeve and terminal boots for improved reliability.

Engines with a Lucas 25D distributor require a top entry 'push in' type distributor cap GDC103.

Cobalt silicone lead set (848-1275cc) TMG10872 . . **£21.00**

Top entry push in distributor cap (848-1275cc) . GDC103 **£5.92**

HT LEAD NUMBERING SET

Keep track of which HT lead is which with a set of four numbered sleeves.

HT lead numbering set 4 cylinder CRST255 **£3.82**

GCL1110

TT29812

TT2981

SPORTS COILS

Sports coils are designed to improve ignition performance. They give more reliable starting power and greater performance at high revs thanks to the 40,000 volt output.

Don't forget to renew your plugs and leads to optimise the power. Only use the ballast type coil if your car is fitted with a ballast resistor in the wiring. Please check before ordering. Your HT lead into the coil will need to be the push-in type, use GCL1110 to convert the lead.

Sports coil non-ballast type TT2981 **£18.20**

Sports coil ballast type TT29812 **£17.70**

Ignition lead end kit GCL1110 **£1.39**

TT2982M

COMPETITION HT LEAD

If you want a performance HT lead with the correct period look then this 'bumblebee' lead is a must. As per the original 'Lucas' type it features a high conductivity copper core with a yellow insulator featuring a black stripe. Alternatively, use the standard black lead for an 'OE' look. We recommend you assemble leads with NGK suppressed plug caps.

Bumblebee HT lead (per metre) TT2982M **£6.14**

HT lead (per metre) - black AAA5981M **£2.99**

AUU1536

ELECTRONIC DISTRIBUTOR

This electronic distributor was originally fitted to all standard Cooper 1275cc carb models. It can also be used on any A+ 1275cc car using a carburettor! No points or condenser to worry about either. Also available is the plug & lead to connect to the existing wiring.

Electronic distributor & lead kit 1275cc AUU1536K . . **£111.20**

Electronic distributor 1275cc (carb models) AUU1536 . . **£123.80**

Plug & lead 54966877 **£6.76**

Cap GDC156 **£4.12**

Rotor arm GRA2143 **£4.18**

Lumenition

CEK150

LUMENITION IGNITION

Lumenition electronic ignition kits are well known as being among the finest after-market electronic ignition systems available. This system basically replaces both the contact points and condenser with an optical switch and power module. The power module is an electronic device that receives a pulse from the optical trigger which switches the coil. The trigger eliminates contact bounce, arcing, mechanical wear and spark scatter, reducing maintenance and increasing reliability. With minimal wiring and modifications this kit is very discreet. **Note: Installation of a power module requires a distributor fitting kit.**

A performance ignition kit is available, it includes a power module and a high output coil. The microcircuit control of the coil current gives optimum performance across high engine speed ensuring maximum spark energy at the coil. A fitting kit, to suit the distributor application, is also required. Positive earth wiring instructions are available from your branch. Check your distributor type before ordering the fitting kit as many cars have non-original distributors fitted. The identification number is cast on the distributor body.

Performance ignition kit

Supplied with high energy coil and performance power module. Requires fitting kit to suit distributor.

Performance ignition kit CEK150 **£291.20**
Coil replacement for CEK150 CEC **£66.00**

Power module and performance ignition coil

Power module PMA50 **£203.80**
Performance ignition coil MegaSpark 4 LMS4 **£41.60**

Mounting bracket and fitting kits

Designed to mount the power module neatly using coil bracket screws. Use these fitting kits with your choice of ignition kit.

Power module mounting bracket (all modules) . . MK006 **£10.40**
Lucas 22D4 25D4 distributors LFK116 **£17.50**
Lucas 43/45D4 distributors LFK117 **£18.70**

Lucas 59D distributors LFK117 **£18.70**

PERTRONIX

222-405

PERTRONIX IGNITION

These self contained electronic ignition units offer a simple alternative to traditional points and condenser arrangement. Easily installed with no external control boxes to mount and only two wires to hook up and no permanent modifications involved. The unit uses a sealed Hall Effect sensor that is impervious to dirt, dust, moisture, or vibration and retains standard advance curve. Unaffected by distributor shaft wear, maintains firing accuracy to within 1/4°, reduces spark scatter over the rpm range. One year warranty.

Pertronix ignition Lucas 23-24-25D4 222-405 **£136.60**
Pertronix ignition Lucas 45D4 222-435 **£128.30**

CSI-IGNITION DISTRIBUTORS

CSI-Ignition distributors offer a fully electronic ignition system built into the correct type of Lucas distributor housing to suit your car, keeping the original appearance in the engine bay. You can only tell the difference when you remove the distributor cap! Gone are the points and condenser and mechanical advance mechanism, all replaced with a high quality electronic ignition system manufactured using military specification components for durability and reliability. These distributors are maintenance free (no points to adjust), and offer the benefits of, easier starting & smoother running, more torque & power, reduced fuel consumption & emissions. They also eliminate the weaknesses of mechanical timing advance and problems such as points bounce ensuring correct ignition timing throughout the rev range.

CSD8014671

"The new range of CSI-Ignition distributors is a breakthrough for classic car ignition systems".

Each CSI-Ignition distributor features 16 easily switchable, optimised ignition curves to allow timing adjustment to suit your car's engine and fuel specifications. Alternative advance curves can be selected to suit your engine's state of tune making them ideal for modified engines. Curves are easily selected using a screwdriver in a rotary switch, with a bright flashing LED indicator to show the selected curve all concealed underneath the distributor cap. The distributors are also available with an electronic immobiliser system to prevent unwanted starting of the engine.

We offer a wide range of CSI-Ignition distributors for a variety of applications. They are available Optimised with vacuum advance to suit road or uprated cars running on SU carburettors, or tuned without vacuum advance for cars running Weber type carburettors. Please note: Some units may only be available to order. More details are available on our website, search for CSI-Ignition Distributor.

Distributors for pre A+ engines - 850cc-1275cc, inc. Coopers (Lucas 25D)

CSI distributors require a coil with minimum resistance of 2.5 ohms. We recommend our sports coil TT2981 3 ohms. Bypass the ballast resistor if fitted.

Sport coil (3 ohms) TT2981 **£18.20**

BREATHER FILTERS

Performance engine breather filters are an alternative to running pipes from the clutch housing and timing cover breathers. Short stack filters are available in three colours and simply push onto the breather. Just remember to block off the other on the carb or air filter end where the original pipe was attached.

- 1 Breather filter 12mm inlet - blue MT1200 £5.32
- 2 Breather filter 12mm inlet - chrome MT1201 £5.32
- 3 Breather filter 12mm inlet - red MT1202 £6.14

K&N breather filters

- 4 Engine inlet breather filter KN62-1010 . . . £22.90
- 5 Crank breather filter KN62-1330 . . . £21.10

K&N PERFORMANCE FILTERS (AIR & OIL)

K&N air filters are probably the most efficient way of ensuring clean, dirt free air for the engine without compromising performance. We supply a tapered filter to fit as a replacement to the standard filter and case assembly within the confines of the engine bay. For those who wish to have the increase in cleaning and air flow efficiency without the increased noise, we offer a replacement filter element to fit directly into the standard filter casing.

- Twin HS2 pancake filter (850-1275cc to 1974) . . KN56-1630A . . £98.30
- Twin HS4 K&N filter assembly KN56-9128 . . £87.50

- Tapered HS4 K&N filter (1000cc) KN56-9320 . . £84.90
- Tapered HIF44 K&N filter (Cooper 1300cc) . . KN56-9330 . . £78.80
- Tapered HS6 K&N filter KN56-9327 . . £92.80

K&N air filters (180mm x 120mm) for Weber carburettors

- DCOE fitting 45mm (1 3/4") deep KN56-1270 . . £90.00
(Not suitable for ram pipes).
- DCOE fitting 45mm (1 3/4") deep KN56-9106 . . £92.80
- DCOE fitting 63mm (2 1/2") deep KN56-9104 . . £96.20
- DCOE fitting 83mm (3 1/4") deep KN56-9265 . . £92.80

K&N air filter kit

- SPI performance filter kit KN57-0082 . . £93.20
(Complete with cold air ducting kit).

K&N replacement elements

- HS4 & HIF38 replacement element* (non inj.) . . KNE2601 . . . £40.40
- SPI & MPI replacement element* (injection) . . KNE9172 . . . £39.30
(*Fits into standard case).

K&N Performance Gold® oil filter

These K&N oil filters feature a number of improvements over standard oil filters, like higher flow rates, improved filtration, anti-drain valve and a nut for ease of removal. Originally developed by K&N for race applications these high quality filters are becoming a favourite among consumers who want only the best products for their cars. See page A10 for uprated oil pump.

- K&N Performance Gold® oil filter (A series) . . . 235-830 . . . £14.00

CONE AIR FILTERS

Performance cone air filters help improve the air flow to the carburettor. This type of air filter can be taken off, cleaned, re-oiled then put back on time and time again. Well made and looks great with the chrome finish.

- Cone air filter HIF44 MT3210 . . . £43.30
- Cone air filter HS4 MT3211 . . . £35.50

RAM PIPES Ram pipes for Weber and Dellorto carbs

These ram pipes are designed to improve air flow into the Weber and Dellorto carburettors, ideal for use with or without filters, space permitting.

- 1 40 DCOE/DHLA 16mm ram pipe KNSS1640 . . £35.00
- 2 40 DCOE/DHLA 26mm ram pipe KNSS2640 . . £35.00
- 3 40 DCOE/DHLA 39mm ram pipe KNSS3940 . . £35.00
- 4 45 DCOE/DHLA 16mm ram pipe KNSS1645 . . £35.00
- 4 45 DCOE/DHLA 26mm ram pipe KNSS2645 . . £35.00
- 4 45 DCOE/DHLA 39mm ram pipe KNSS3945 . . £32.10

Ram pipes for SU carburettors

These fully radiused ram pipes improve air flow into the SU carburettor, ideal for use with or without filters (space permitting). The K&N ram stack is designed for their own filter assemblies.

- 5 HS4 K&N ram pipe - silver KN85-5039 . . £14.90
- HS2 ram pipe - silver SFR230 . . . £27.40
- 6 HS4 ram pipe - silver SFR430 . . . £27.40
- 7 HS6 ram pipe - silver SFR650 . . . £27.40
- 8 HIF4/44 ram pipe - silver SFR4430 . . . £26.40

MOTO-LITA STEERING WHEELS

Moto-Lita are among the finest replacement steering wheels available. Designed to enhance the appearance of the cockpit and provide an improved feel for the driver.

Available in a variety of styles, including polished or black painted spokes, with the option of polished wood or black leather rims.

Available in 13" to 15" diameters. Boss kits for each specified model of car are required for fitting (available separately).

Moto-Lita

See page A50 for more information

K&N AIR FILTERS

Anyone can flow more air. The trick is to flow more air safely. K&N filters have a reputation as being one of the most efficient air filtration available.

K&N air filters have 4 to 6 layers of cotton gauze sandwiched between two aluminium wire screens. The cotton is treated with a specially formulated grade of oil causing tackiness throughout the cotton. The cotton allows high volumes of airflow, while the

tackiness of the oil creates a powerful filtering media that ensures engine protection.

- Designed to increase horsepower and acceleration
- Washable and reusable

See page A23 for more information

FUEL INERTIA SWITCH KIT

This inertia switch is a good safety feature when using an electric fuel pump. The unit mounts to a vertical surface in the engine bay and in the unfortunate event of a crash cuts the power to the fuel pump preventing fuel spillage. Supplied with multi connector and tail leads to allow easy connections.

Fuel pump inertia switch kit C41220AX . . . £47.50

BATTERY CUT-OFF SWITCHES

Battery cut-off switches are a good idea for all cars. Fitting one enables you to quickly isolate the battery and immobilise the car; ideal when working on your car, or if you intend to put your car into storage. Use with a battery conditioner, see our website.

Battery mounted cut-off switches

These cut-off switches simply mount to the battery post and feature a screw-in knob to break the circuit. Available with a bypass fuse to allow sufficient current to pass to operate clocks, alarms and coded radios, but if any attempt is made to start the car the fuse will blow.

Battery mounted cut-off switch GAC3192X . . . £6.61

Battery mounted cut-off switch with bypass fuse . GAC31921 . . . £9.50

In-line cut-off switches

These cut off switches need to be fitted into the main battery to starter cable. The body of the switch should be mounted securely to the car and cables fitted using the terminal kit.

Period cut-off switch

These are reproductions of the Lucas 'Battery Master Switch' which was a popular accessory on many British classics.

Period battery cut-off switch (short knob) 1B2804 . . . £27.00

Period battery cut-off switch (long knob) 1B2804L . . . £27.00

Motorsport cut-off switches

Battery cut-off switches are obligatory for competition cars and should be fitted with a cable for remote access.

Battery cut-off switch TT7964 . . . £17.90

Battery cut-off switch race spec (FIA approved) . . TT7962 . . . £30.70

Remote cable 6 foot TT79621 . . . £30.50

Spare key for switches TT7964 and TT7962 . . . TT79641 . . . £5.12

Terminal kit for battery cable TT7964TK . . . £9.50

TMG2930K

HIGH CAPACITY FUEL PUMPS

The standard fuel pump may not be able to maintain adequate fuel flow and pressure at higher engine speeds, particularly with a tuned engine. The Facet range of fuel pumps will suit all standard and modified engines fitted with carburettors. They give constant fuel flow and pressure, even at high temperatures eliminating the problems associated with vapour lock. The pumps are available in a variety of specifications to suit the engine's fuel pressure and flow requirements. Further fine tuning of the fuel pressure can be easily achieved by the use of a separate fuel regulator, see website. With safety in mind we recommend fitting a fuel pump inertia switch kit, so that in the event of an accident fuel delivery is automatically cut-off. Fuel lines may require adapting to install the new pump, check pipe sizes to select the correct unions, additional unions may be required.

Cylindrical fuel pumps

Formerly known as interrupter type pumps, these heavy duty pumps can be fitted at the front or rear of the car and up to 600mm above the bottom of the fuel tank. Kits are supplied with mounting & 8mm unions, alternative size unions available.

Cylindrical fuel pump kit - road Silver Top TMG2930K . . £114.40

(Up to 150bhp, flow rate: 30 gal/hr, 4.0-5.50 psi, unions: 8mm x 1/8 npt)

Cylindrical fuel pump kit - fast road Silver Top . . MGS2930K . . £119.60

(Up to 200bhp, flow rate: 35 gal/hr, 6.0-7.0 psi, unions: 8mm x 1/8 npt)

Cylindrical fuel pump kit - competition Red Top MGS2932K . . £115.40

(Above 200bhp, flow rate: 40 gal/hr, 6.0-8.0 psi, unions: 8mm x 1/8 npt).

Cylindrical fuel pump only - competition Red Top TT2930 . . . £103.00

(Above 200bhp, flow rate: 40 gal/hr, 6.0-8.0 psi, 1/4 npt threads).

Solid state fuel pumps

These pumps should be mounted at the rear of the car (as they are designed to push fuel rather than draw fuel) and ideally below fuel tank level, although they will work up to 300mm above the bottom of the fuel tank. Kits are supplied with mounting & 8mm unions, alternative size unions available.

Solid state fuel pump kit - fast road TMG2931K . . £61.40

(Up to 150bhp, flow rate; 32 gal/hr, 4.5-7 psi, unions: 8mm x 1/8 npt).

Solid state fuel pump only - fast road MGS2931 . . . £43.70

(Up to 180bhp, flow rate: 34 gal/hr, 7.0-10.0 psi, 1/8 npt threads).

Fuel pump unions

Use with the listed fuel pumps, please check thread and pipe size before ordering.

Straight union 1/4" (6mm) 1/8 npt FPA903B . . . £1.86

Straight union 5/16" (8mm) 1/8 npt MOC1604 . . . £3.54

Straight union 3/8" (10mm) 1/4 npt FPA904/B . . . £2.99

90° unions 3/8" (8mm) 1/4 npt (pair) FPA902B . . . £11.00

Fuel filter union

Unions 1/4" (6mm) 1/8 npt (pair) TT29321 . . . £8.40

UPDATED BRAKE PADS

EBC brake products are renowned for their high quality and excellent performance. All grades of brake pad use Kevlar as the binding material rather than the traditional steel, this prevents the build up of corrosive brake dust that can damage alloy wheels.

Tested in rally cars, these pads are high friction, fade resistant with immediate pedal response with a fantastic wear life. We stock their Ultimax and uprated Greenstuff and Yellowstuff high performance brake pads.

EBC
BRAKES

STR505G

EBC brake pads

EBC Greenstuff brake pads are a high efficiency upgrade pad which will increase your car's stopping power by 20% over standard replacement pads.

Greenstuff pads 10" wheels (998cc Cooper) GBP102G **£38.30**

Greenstuff pads 10" wheels (Cooper S, 1275cc) . . GBP103G **£38.30**

Greenstuff pads 12" wheels (1275cc to 1974, 1984 on) . STR505G **£37.30**

GBY103Y

EBC Yellowstuff brake pads are formulated for fast road use and track day use. The higher heat range means they will resist the effects of brake fade under heavy braking.

Yellowstuff pads 10" wheels (998cc Cooper) GBP102Y **£63.60**

Yellowstuff pads 10" wheels (Cooper S, 1275cc) . . GBP103Y **£59.00**

Yellowstuff pads 12" wheels (1275cc to 1974, 1984 on) STR505Y **£80.70**

mintex

Mintex brake pads

Mintex M1144 is a hard wearing material ideal for fast road and track day use, giving good wear resistance and reduced fade under hard braking.

Mintex M1144 set (1275cc to 1974 & 1984 on) . STR5051 **£56.20**

GBP258G

UPDATED PADS FOR 4 POT BRAKES

Choose from the following options, heavy duty Kevlar for every day use Green for fast road use and Yellow for fast road and track days. This range of performance pads will fit all known 4 pot calipers (except the Wilwood kit).

Kevlar pads for 4 pot - road GBP258KV **£34.20**

Greenstuff pads for 4 pot - fast road GBP258G **£45.00**

Yellowstuff pads for 4 pot - fast road/track day . . GBP258Y **£77.60**

BRAKE MASTER CYLINDER

This large round reservoir brake master cylinder is suitable for Cooper S models or when upgrading your Mini to disc brakes.

Brake master cylinder .70 bore GMC172 **£74.90**

GRK5003

TMG307521

NAM6450F

4 POT BRAKE PARTS

Brake discs are something that will eventually need to be replaced, easy enough if you have a standard brake setup but not so easy if you have four pot solid or vented discs fitted to you Mini!

These brake parts will fit KAD & Metro set ups. The high quality discs are suitable for all 8.4in vented applications. See Restoration section for our full range of brake components.

Vented brake discs (each) MT1203 **£35.00**

Stainless steel caliper piston 4 pot (each) MT5402 **£11.90**

Seal kit for 4 pot calipers (1 caliper) GRK5003 **£10.90**

Drive flanges (each) NAM6450F **£42.30**

Split pins for 4 pot calipers* (set of 4) TMG307521 **£1.91**

(*Can also be used with Cooper models).

MT5104

GAC8412X

BRAIDED BRAKE & CLUTCH HOSES

The braking efficiency of your car can be increased by using high quality stainless steel braided brake hoses. Normal hoses expand slightly when brakes are applied. This expansion can now be reduced by using the stainless steel braided hoses, thus improving the feel of the pedal.

Goodridge front braided hoses (pair) MT5102 **£24.80**

Goodridge front braided hoses (pair) Metro 4 pots . . MT5103 **£51.80**

Goodridge rear braided hoses (pair) MT5101 **£24.80**

Goodridge rear braided hoses (pair) no metal pipe* . MT5104 **£24.30**

(*This hose goes from the subframe bracket to direct to wheel cylinder replacing the metal pipe).

Braided brake hose set (all models*) GAC8412X . . . **£41.80**

(*This is a universal kit that fits both disc and drum brake cars. On some models a banjo fitting is used on one of the hoses and it will bottom out, cut 3mm off the banjo bolt thread).

Braided diaphragm clutch hose GAC8446X . . . **£11.80**

Braided Verto clutch hose GAC8447X . . . **£14.50**

Braided universal clutch hose* MT2401 **£24.80**

(*This universal clutch hose goes directly from the master cylinder to the slave cylinder, with banjo fittings at both ends).

NEGATIVE CAMBER LOWER ARMS

Adding negative camber improves the ability of the car to turn-in on a corner and as weight is transferred to the outside wheel, it will increase the contact area between the tyre and the road, giving you more grip.

These replacement lower arms offer varying degrees of negative camber over the standard item i.e. If a standard car leaves the factory with 1° positive camber, then fitting these arms will give 0.5° negative camber.

Because the front suspension consists of 2 unequal length arms, lowering the front ride height increases negative camber and conversely raising the front ride height will increase the positive camber.

Negative camber lower arms 1.5° (pair) WPT9001X . . . £68.30

ON CAR ADJUSTABLE LOWER ARMS

New design lower arms are now supplied with both rose joints and original bush type fittings. Adjustable on car lower arms make life much easier to set up for track days and if the car has been lowered and negative camber is required. (Supplied as a pair).

Adjustable lower arms (pair) C-AJJ3363 . . £111.70

HEAVY DUTY TIE BARS

Tie bars perform the important function of controlling the front to rear movement of the front wheels under acceleration and braking. With recent improvements in the braking components that are now available for the Mini, it is possible for the standard tie bars to flex. This reduces the stability of the car and produces a feeling that the car is wandering. The increased diameter of these heavy duty tie bars reduces this problem.

These tie bars also enable you to adjust the castor angle of the front suspension. The castor angle determines the amount of self centring of the steering. The more castor angle, the more effort is required to turn the steering wheel. 3° of castor is specified by Rover as the optimum setting.

Heavy duty tie bars (pair) WPT9003X . . £27.40

21A2023XR

21A2023XB

ALLOY REAR HUBS

These lightweight alloy hubs are billet machined and include bearings and long studs to fit brake drums with spacers or 'Superfin' alloy brake drums.

Alloy rear hub (each) - blue 21A2023XB . £100.13

Alloy rear hub (each) - red 21A2023XR . . . NCA

SUPERFIN ALLOY BRAKE DRUMS

A brand new superior lightweight alloy brake drum, pressure die cast with 25% more fins for extra cooling to improve braking efficiency and built-in spacer to give increased strength and reliability. Direct replacement for all post 1984 cars, Cooper S and 1275 GT's rear drums.

Superfin alloy brake drums (pair) MT1210 . . . £117.60

TT3949

REMOTE BRAKE SERVO KIT

For those who find the brake pedal rather hard after driving more modern vehicles, these remote servo kits make braking easier by reducing pedal effort. Suitable for all single line brake circuits they are remote mounted and easily plumbed into the hydraulic and vacuum systems of the car. We offer both a Lockheed and aftermarket kit, both are supplied with mounting brackets and hardware.

Remote brake servo kit Lockheed TT3949 . . . £187.20

Remote brake servo kit aftermarket TT3949Z . . . £95.50

ALLOY HANDBRAKE QUADRANT

Available in blue anodised alloy these handbrake quadrants are a great touch. Suitable for dry suspension models only.

Anodised alloy handbrake quadrant (pair) - blue . . KAD1013282 . £32.80

COIL SPRING CONVERSION

FAM3968HX

Designed 45 years ago the rubber cones that Sir Alec Issigonis and Alex Moulton gave were innovative and perfectly adequate for the day, they are a bit harsh for today's driving. An alternative is to replace the rubber cones with springs that are a direct replacement. Offered in two different spring rates.

Softer coil spring kit - blue FAM3968X . . . £320.00

(Front and rear coil spring kit that replaces the rubber cone).

Firmer coil spring kit - red FAM3968HX . £330.00

(Front and rear coil spring kit that replaces the rubber cone).

KGE100060SPK

SUPERPRO POLYURETHANE SUBFRAME BUSHES

For a fast road or road car the best compromise is to use polyurethane. Our Superpro poly bushes are the best compromise between subframe location and damping the road noise transmitted through the bodyshell.

Front subframe tower pad kit subframe set KGE100060SPK £34.20

Rear s/frame front mount kit split type axle set (to 1976) . . 2A5818SPK . . £14.65

Rear s/frame rear mount kit split type axle set (all models) . 2A5818SPK . . £14.65

SOLID FRONT SUBFRAME MOUNTS

Maximum subframe location is gained by using solid mounts. Ideal for a race car but will transmit more noise and road harshness into the bodyshell.

Front subframe solid front mount* (each) . . . 21A2624X . . . £28.70

1 Front subframe solid front mounts* (pair) . . CSTR641 . . . £20.50

2 Front subframe solid rear mounts** (pair) . . CSTR642 . . . £21.20
(*Fits to front valance. **Fits to toe board).

3 Front subframe solid tower mount set CSTR640 . . . £20.50
(Includes: 2 x tower oval pads & 2 x tower round pads).

SOLID FRONT SUBFRAME MOUNTING KIT

Red anodised alloy front subframe washers replace the turret mount pads and teardrop mount to the front valance, to reduce the movement of the front subframe, so helping the handling.

Alloy front subframe washer kit (8 piece) MT1205 . . . £28.60

ALLOY TOWER BOLTS

Anodised alloy tower bolt - silver (pair) 21A2596XSPR . £64.20

Anodised alloy tower bolt - blue (pair) 21A2596XBPR . £63.50

(For more subframe mount components see the Restoration section).

GAC8437X

HI-LO SUSPENSION KIT

Change the ride height on your Mini. The original Hi-Lo kit allows you to raise or lower the height of your car without dismantling the suspension assembly. Homologated by the RAC and Rover for rallying.

Hi-Lo suspension kit GAC8437X . . £124.00

Adjustable cones kit (2 x cones, 2 x 21A423) . . . GAC84371 . . £54.90

Extension rods (pair) GAC84372 . . £18.50

(Use with GAC84371 when fitting to rear suspension rear allen bar).

Front allen bar GAC84374 . . . £7.00

GAC8432X

ADJUSTA-RIDE KIT

The most popular way to lower your Mini, while allowing easy and quick adjustment when needed. Using a simple threaded knuckle bar and lock nut system, you can easily raise or lower your Mini, without having to remove the top subframe mounts or drill the rear valance. The knuckle joints have also been re-designed for extra strength and durability.

Front adjusta-ride kit GAC8432X . . £61.80

Rear adjusta-ride kit GAC8433X . . £111.70

BUDGET ADJUSTA-RIDE KIT

A complete car set of adjusta-rides in polished alloy, including rear bars.

Budget adjusta-ride kit MT1301 . . . £101.14

WPT9002X

WPT90021

REAR CAMBER BRACKETS

As with the front suspension, a small amount of negative camber on the rear suspension will improve handling. These brackets replace the standard outer radius arm bracket and will give 1 1/2° more negative camber. Unlike the front suspension, raising or lowering the rear ride height will not affect the camber angle. It is recommended that when more negative camber is used on the front, the rear should also be given more negative camber, to balance both handling and appearance.

Rear camber brackets fixed 1 1/2° increase WPT9002X . . £33.80

Rear camber brackets adjustable WPT90021 . . £39.60

GAC84011XPR

GAC84041XPR

ADJUSTABLE SHOCK ABSORBERS

Shock absorbers are the first line in improving the handling of your Mini. We offer either Spax or Gaz front and rear adjustable shock absorbers for the Mini in either standard or lowered ride height option. Shock absorbers should be fitted as pairs for best performance on the car.

Spax front standard height (pair)	GAC84011XPR . . .	£139.70
Spax front lowered height (pair)	GAC84021XPR . . .	£139.70

Gaz rear lowered height (each)	GAC8404XG	£57.20

SPCK19

SPK80ECF

SUPERPRO POLYURETHANE KITS

Polyurethane is preferable to rubber as it gives improved location without having a detrimental effect on noise levels or a harsh ride. Added advantages are improved longevity and unlike rubber it is not affected by ultra violet light, water, salt, oil or petrol. The Superpro bushes come with a steel sleeve and grease where necessary.

Advice: For the best subframe location for your road car use Superpro bushes on the front subframe tower mounts with new standard mounts on the valance and toe board. Use Superpro poly for all rear subframe mounts.

Car kits (1965-76)

Complete car kit	SPK80ECK . . .	£66.00

MS85H

HEATED WINDSCREENS

These high quality heated windscreens are the easy way to demist your windscreen - perfect for motorsport applications and those damp mornings.

“Demist your windscreen in around 20 seconds”

Manufactured to the latest British Standard these laminated windscreens feature a virtually invisible micro-wire element within the screen to effectively demist without impairing vision, it's the type of element used in many modern luxury cars. Installation is simple using standard rubbers and filler strip. We also offer wiring kits with relays to enable easy connection.

24A2236HM

Available in two styles; Monte Carlo, a reproduction of the original style as used in the Mini's rallying heyday. This screen uses a dual zone circuit and requires fitting kit GAC40251. Standard style screens do not have the thick horizontal bars and are available in a range of tint options as listed below, these screens use a single zone circuit and require kit GAC4025.

GAC41271

FUEL CAPS

Aston locking fuel caps

These quality locking fuel caps are a direct replacement for the original cap. Most carburettor models will require a vented cap (green) whereas fuel injection models (SPI & MPI) require a non-vented cap (red).

Aston locking fuel cap, vented (90mm) GAC41271 . . . £35.50

Aston locking fuel cap, non vented (90mm) GAC41272 . . . £35.50

GSS154

WLD100310

Locking fuel caps

Use with our Aston fuel cap covers or on their own; most carburettors will require a vented cap whereas fuel injection models (SPI & MPI) will require a non-vented cap.

Standard locking filler cap vented (green) GSS154 £15.10

Standard locking filler cap non-vented (red) WLD100310 . . . £14.60

MCC299

GAC4127X

Aston fuel cap covers

These fuel cap covers are designed to fit to our filler cap GSS154 for vented or WLD100310 for non-vented, and fixed by grub screws to the cap. The flap is lifted to reveal the lock and the cap & cover are removed together. The covers and caps are sold separately.

Aston cap cover only, large (90mm) - chrome . . . GAC4127X . . . £27.40

Aston cap cover only, small (75mm) - alloy MCC299 £43.50

DUMMY FILLER NECK

Can't quite stretch to the price of the right hand petrol tank but would like people to think you can? Then we have just the thing for you. A filler neck which just screws onto the panel. The kit includes a template for correct positioning on the bodywork.

Dummy filler neck GAC8436X . . . £14.80

DYNOLITE OILS

Dynolite offers a premium quality range of lubricants and consumables developed for Veteran, Vintage & Classic cars and motorcycles.

Dynolite lubricants are formulated to exceed the original vehicle manufacturer's specifications and are blended using high quality base oils combined with additive formulations that are suitable for use in these historic vehicles.

For example, Dynolite Pre-War and Dynolite Classic engine oils include optimal levels of ZDDP to reduce wear, which is often found at reduced levels in modern engine oils.

Wipac 5.5" chrome plated driving & fog lamps, with tough plastic lens covers.

Driving lamp (pair) - WipacWPS6007 **£27.50**

AUXILIARY REVERSE & FOG LAMPS

Many classics were not originally fitted with reverse or rear fog lamps. These universal polished stainless steel lamps measure 55mm x 110mm (2" x 4.5" approx.) and can be easily fitted, ideal for mounting under bumpers etc... Fog lamps require an illuminated switch mounted visibly on the dashboard.

Auxiliary fog lamp GAC4608 **£18.60**

Auxiliary reverse lamp GAC4609 **£19.60**

Bulb replacement 12V 20WGAC4608B **£3.24**

HEADLAMP PROTECTORS

A thin, invisible layer of Lamin-X protects headlamps from stone chips and scratches, and keeps your lights looking new for years to come. Fits all 7" round headlamps. Sold as a pair. Lamp unit not included.

Headlamp protectors (pair) 162-695 **£15.70**

HEADLAMP KITS - HID H4 CONVERSION

HID (High Intensity Discharge) headlamps are a breakthrough in vehicle lighting technology and are found in many current production cars. Now classic cars can benefit from this technology with this HID bulb conversion kit.

- Higher light output - up to 3 times brighter than halogen
- Safer night driving - brighter light with improved range
- Nominal 3.5 amp draw when on, ideal for dynamo equipped cars
- Longer lasting bulbs - at least 6 times longer than halogen

Fitting note: This kit does not include the headlamp units. If your car is already fitted with H4 halogen headlamps, this kit is a direct fit. However, if your car is fitted with sealed beam units, P45 or other types of headlamps, you will need to purchase an H4 halogen conversion separately. Negative earth only. For more information, please check our website. HID bulb kits are sold for off road use only.

HALOGEN HEADLAMP REPLACEMENT BULBS

Standard halogen H4 60/55 watts (each) GLB472 **£5.12**
 Halogen H4 100/90 watts (each) (check regulations) . GLB484 **£6.24**

GAC4023Z

H4 HALOGEN HEADLAMP CONVERSIONS

Fitting a halogen headlamp conversion is one of the easiest and most worthwhile improvements you can make to your Mini. Powerful halogen bulbs with an improved lens design result in a superior light beam without blinding oncoming traffic. No matter how fast your car is you can only travel as quickly as your vision allows. For the ultimate night vision use one of these H4 conversion kits with our HID conversion kit (GAC4022H).

Lucas H4 headlamp conversion kit RHD (pair) . . GAC4023 . . . **£94.40**

 Crystal halogen kit* (pair) GAC4615 . . . **£38.80**
 (*NOT 'E' marked for legal road use, no dip pattern).

117-515

HEADLAMP RELAY KITS

Fitting halogen headlamps puts high loads on electrical components. These kits allow easy installation of relays into the headlamp circuit allowing for the high current circuit to be run through the relay. Fitting relays in headlamp circuits protects your wiring and reduces the resistance in the circuit allowing full power to the lamps. Kits include relays and fittings. The single relay kit can also be used for wiring spotlamps, horns and other electrical accessories.

Headlamp relay kit 2 relay 117-515 **£31.66**
 (Inc: 2 relays, pre-wired relay holders, fitted terminals, fittings & instructions).
 Relay kit 1 relay GAC4027 . . . **£12.00**
 (Inc: 1 relay, non-assembled wiring, terminals & fittings).
 PVC tubing black pre cut metre 504806 **£0.79**

MRAC402

WORKS STYLE WHEEL ARCH SETS

These 'Works' style wheel arches are replicas of the works style of arch fitted to race and rally Minis in the sixties and give your car that great retro look. Group 2 arches are also available for 6" wheels with an extra lip on the outer edge of these arches means a chrome finisher can be fitted GZF105 for deluxe or GZF107 for flat. Group 5 arches are suitable for cars with up to 7" wheels. Made from fibreglass with a black gel coat finish and require drilling to fit.

Group 2 arch set no lip - 1.75" wide/5" wheel . . MRAC401 . . .£72.65

COOPER BONNET STRIPES

No Mini Cooper should be without them, they instantly create that famous Cooper look. These high quality bonnet stripes are available in white.

- | | | |
|---|-----------------------|--------|
| Bonnet stripe RH (each) - white | DAF10402NMN | £41.60 |
| Bonnet stripe LH (each) - white | DAF10403NMN | £41.60 |

CARPET & CARPET SETS

We have a range of quality carpet sets in a variety of colours that are manufactured to high standards ensuring an excellent fit. Often using materials superior to those used for the original carpets. Where required, some of our carpet sets are moulded to follow the contours of the floor pan as per the originals.

We also offer underfelt kits, competitively priced budget carpet sets for some models and replacement carpet sections, footwell mats, and fittings. Check your model for full details.

See page A52 for more information

HIGH CAPACITY FUEL PUMPS

Facet pumps ensure constant fuel flow and pressure even at high temperatures eliminating the problems associated with vapour lock.

The standard fuel pump may not be able to maintain adequate fuel flow and pressure at higher speeds, particularly with a tuned engine.

Facet fuel pumps are suited to all standard and modified engines fitted with carburettors.

Available in a variety of specifications to suit

the engine's fuel pressure and flow needs.

With safety in mind we recommend fitting a fuel pump inertia switch kit, so that in the event of an accident fuel delivery is automatically cut off.

See page A25 for more information

GRILLES & FITTINGS

The MkI grille is one of the Mini's most striking features. The style of the slats with the moustache surround really shows off the shape of the front end. It was designed to flatter the front and that style was lost with the introduction of the MkII grille assembly. Now you can recreate that look with great ease.

GRILLES (MKI)

Austin grille (MkI)	14A7299	£81.60
Austin Cooper grille (MkI)	24A198	£98.70

BURR WALNUT DASH FASCIAS

In 1989 the Smith gauge binnacle was replaced by units manufactured by Nippon Sieki. We can offer fascias for both types of gauge binnacle. Listed below are a range of dashboard assemblies for Nippon Sieki gauges, on which we can also offer an option of chrome rings around the gauge aperture for the 3 gauge binnacle assembly. For pre 1989 models, at present we can only offer the centre binnacle 3 gauge dashboard.

BURR WALNUT HANDLES

You have the burr walnut dashboard, so why not complete the luxury look with one or all of the following, window winder and door opening handles, suitable for cars from 1969 on, and for 1983 on cars, interior door pulls. Finish the interior off with a matching gear knob.

Window regulator handles (1969 on) WPA9042X . . £79.30
Door release handles (1969 on) WPA9040X . . £70.00
Door pulls (1983 on) WPA9041X . . £68.80
Gear knob - plain WPA9047X . . £27.40

BURR WALNUT CAPPINGS

Many classic coach built Minis were particularly well loved for their opulent interiors. Although we are not able to offer such interior conversions, we can offer a range of high quality Walnut accessories to enhance the interior of your pride and joy. The door capping set contains 4 carefully matched pieces of wood. Suitable for all models.

Under rear seat speaker board 6.9" holes - black . MT9535 NCA

KEYLESS ENTRY KIT

Our keyless entry kit connects to our central door locking system to facilitate remote locking and unlocking of the doors. A useful security feature is that the unit locks the doors when the ignition is switched on, thereby preventing undesirables getting in. Will only fit Minis from 1976 on and cannot be activated remotely by standard Rover alarm systems.

Keyless entry kit
WPA9224X £100.40

CENTRAL LOCKING KIT

Central door locking is a key feature of most modern cars, sadly lacking however, on Minis. Our kit has been specifically designed to fit neatly in the door frame without bulging the interior trim of the door skin.

This kit includes fittings hardware and wiring, it can be fitted with the electric window kit. Cannot be activated remotely by standard Rover alarm systems.

Central locking kit
WPA9221X £113.90

ALARM & IMMOBILISER

Alternatively you can install our alarm kit which has been designed to ease fitment and reduce the amount of cutting and splicing of your car's wiring loom. Only fits Minis from 1976 on and cannot be activated remotely by standard Rover alarm systems.

Specification: 127dB six tone siren, 2 key ring programmable transmitters, triggered by shock and opening of doors, bonnet or boot lid dual zone shock sensor back-up battery starter motor immobiliser.

Alarm and immobiliser kit WPA9222X ..£150.00

PRO START PUSH BUTTON

Add a race car feel to starting your classic with the pro start push button. Easy to fit with no cutting of wires required. The LED type illuminates green with the ignition on and goes out when the engine is running.

Pro start push button GAC0060 £36.40
Pro start push button with LED GAC0061 £46.60

Note: In some cases only part of the kit is shown.

ELECTRIC WINDOW KIT

Electric windows are one of those must have luxury items, so why not the Mini? It just so happens we can help you out. Unlike many other kits on the market, which are basically universal fitting, the Moss kit is custom designed for installation in MkIII and later doors.

The kit includes two new window lift mechanisms complete with motors, two switch pods (which cover the hole where the window winder spindle popped through) and all necessary fittings, wiring and full instructions. One day's labour and you will enjoy the satisfying whir as your windows glide effortlessly up and down.

Electric window kit WPA9220X ..£221.50

FOOTWELL LIGHT KIT

This LED kit allows fitting extra courtesy lamps in your car, ideal for illuminating the footwells. The simple kit can be connected to any 12 volt system and includes two LEDs, wiring harness and instructions.

Footwell light kit 12 volt
903-651 £30.65

POWER WINDOW MODULE

If you have fitted our electric windows kit and either our keyless entry or alarm system, this neat gadget will close the windows if left open when you arm the system. Cannot be activated remotely by standard Rover alarm systems.

Power window module
WPA92221X £38.20

AUXILIARY SWITCH PLINTH

3 switch holder as fitted to Minis in the 80's to house the fog light switch. Mounts out of the way under the lower dash and is perfect for those extra switches.

Switch plinth
24G6617 £4.44

RED START BUTTON

This illuminated red start button gives your classic a performance car feel. To prevent theft, your key is still required to switch on the ignition and unlock the steering column. Fitting instructions are included.

Red start button

DYNAMAT HEAT & SOUND INSULATION

We now stock Dynamat, a revolutionary range of products designed to keep your classic cool & quiet.

- Non absorbent materials
- Self adhesive 'peel & stick'
- Easily cut & moulded to fit
- Isolates panel vibration
- Reduces road noise
- Reduces heat soak from engine & exhaust

Dynamat Xtreme

A highly efficient, composite material designed to reduce noise, vibration & heat soak through panel work.

Dynamat Xtreme - speaker pack GAC90511 . . £14.60
 (2 sheets of 254mm x 254mm (10" x 10")).
 Dynamat Xtreme - wedge pack GAC90512 . . £32.80
 (1 sheet of 457mm x 812mm (18" x 32")).
 Dynamat Xtreme - door pack GAC90513 . . £79.00
 (4 sheets of 305mm x 914mm (12" x 36")).
 Dynamat Xtreme - bulk pack GAC90514 . . £202.80
 (9 sheets of 457mm x 812mm (18" x 32")).

Dynaliner

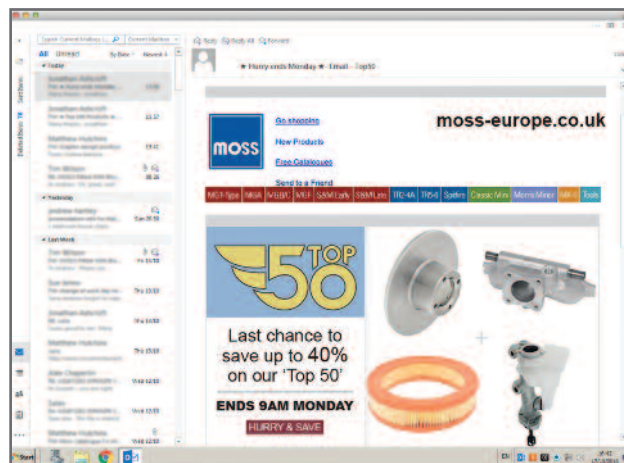

Dynaliner is an ultra-light weight, durable single layer insulation material that can be used as an alternative to traditional underfelt. It provides acoustic isolation and excellent thermal insulation.

Dynaliner - 1/8" thick GAC90531 . . £49.90
 (1 sheet of 813mm x 1372mm (32" x 54")).
 Dynaliner - 1/4" thick GAC90532 . . £74.90
 (1 sheet of 813mm x 1372mm (32" x 54")).
 Dynaliner - 1/2" thick GAC90534 . . £98.80
 (1 sheet of 813mm x 1372mm (32" x 54")).

Hoodliner

Designed specifically for under bonnet insulation, Hoodliner absorbs engine noise to help keep your car quieter. The aluminised skin creates a water & oil barrier that reflects up to 97% of heat to protect the bonnet's paint.

Hoodliner GAC90541 . . £79.00
 (1 sheet of 813mm x 1372mm (32" x 54")).

DYNAMAT NOISE & HEAT INSULATION

Two steps to a quieter, cooler, better feeling great car...

Step 1 Dynamat - to deaden the noise

Apply Dynamat to all the accessible interior panels of your car. Dynamat is best for noise reduction with some heat reduction... Start with firewall/bulkheads, gearbox tunnel, front floors, doors, rear floors, roofs, wheel arches, under bonnet, boot lid.

Step 2 Dynaliner - insulates against heat

Apply Dynaliner over the top of Dynamat to reduce heat soak by up to 70%. Also helps with noise reduction.

See page A51 for more information

CARPET SETS

These carpet sets are moulded to follow the contour of the floor pan exactly, to give a quality fit and finish to your car. As any Mini owner is aware it can get very noisy when driving at speed. These carpet sets feature 12mm thick sections of sound deadening laminated to the backing of the carpet to keep the sound levels as low as possible.

These carpet sets include: front wheel arch, front bulkhead, front & rear floor, cross member and sill carpets. Supplied with all fittings and instructions.

CSR9002X

Early carpet sets (to 1973)

To fit MkI-III saloon models with 'magic wand' or remote change gear levers. Carpets are marked with the various hole options on the rear to help position the holes.

Carpet set - black	CSA9002X ..	£220.00
Carpet set - red	CSR9002X ..	£219.30
Carpet set - grey	CSF9002X ..	£220.00

GAC8429X

UNDER FELT KIT

Keeping the noise level down is not easy! Most carpet sets on the market don't have a great deal of backing on them so fitting the under felt fit not only reduces the noise level but also make the carpet feel much nicer under foot.

Under felt kit pre cut	MT9540	£28.50
Under carpet sound insulation kit	GAC8429X	£54.06

RETRO SOUND RADIOS

The RetroSound range of radio & MP3 players maintain the original 'twin knob' (DIN-D) style mounting required for many classic cars. Music can be played from external sources such as iPods, USB flash drives & SD cards, all connected out of sight.

Model 2

The stylish new Model 2 range offers a high spec radio that gives that classic look with modern digital music capabilities. The Model 2 features iPod and iPhone charge and play operation as well as Bluetooth connectivity with hands free calls. Also includes a daylight compatible wide angle LCD colour display.

- Rear USB & mini jack inputs.
- RDS FM tuner, AM/FM PLL tuner (30 presets).
- 25W x 4 (RMS) integrated amp.
- Pre-amp RCA output, fade/balance.
- 'InfiniMount' adjustable shaft/bracket system.
- Track, RDS data or clock display.
- Separate amp & aerial leads.

RetroSound Model 2 - chrome 230-380 **£285.00**

RETROMOD SPEAKERS BY RETRO SOUND

The RetroMod range of speakers from RetroSound has been designed to compliment their range of Classic radios and have been manufactured to meet the demands of modern high performance amplifiers.

Dual voice coils (DVC) speakers

This system allows for 2 stereo channels (left & right) to be connected to the same single speaker. This means that originality can be maintained on cars where a single speaker was fitted in the centre of the dash or rear shelf. These speakers are supplied individually without mesh grilles, to fit existing mountings.

6.5" dia 3 way, DVC, no grilles (each) 230-505 **£54.00**

5" x 7" 3 way, DVC, no grilles (each) 230-545 **£65.00**

6" x 9" 3 way, DVC, no grilles (each) 230-510 **£48.00**

Single voice coils (SVC) speakers

The SVC range of speakers is a standard configuration single channel speaker

for normal installations (left & right mounted speakers, such as doors or dash). These speakers are available in a range of sizes and specifications, see our website.

4.5" dia 2 way, 40W max, with grilles (pair) 230-535 **£75.00**

5" x 7" 3 way, 60W max, with grilles (pair) 230-540 **£78.00**

6" x 9" 3 way, 100W max, with grilles (pair) 230-530 **£69.00**

6" x 9" 3 way, 100W max, with grilles (pair) 230-531 **£135.00**

RetroMod 8" Subwoofer

The compact design and powerful bass response make this ideal for under seat mounting and numerous other in-car applications. The rigid die cast aluminium chassis and powerful Class D amplifier allows this sub to reproduce low frequencies down to 35Hz.

8" Subwoofer with internal amplifier 230-550 **£175.00**

This hide-away amplified aerial can be mounted hidden away, almost anywhere inside the car. Ideal if you don't want to install a wing or roof aerial to keep your classic original.

MRA001 AJM1112X EEP11Z

RADIO AERIALS

Our range of aerials offers a variety of fitting options from wing to roof mountings. The wing mount aerial features adjustable bases to compensate for slight angles off horizontal. The roof mounted aerial features a removable stainless steel mast with a chrome base plate. Aerial extension cable is also available.

Hide-away amplified aerial	230-555	£24.00
Aerial wing mount manual	MRA001	£8.80
Aerial wing mount electric	AJM1112X	£51.60

OUR BRANCHES ARE HERE TO HELP

No matter which Moss branch you use, you can expect the same quality service. Whether you have an inquiry about a product, or simply want some advice, our staff of like-minded enthusiasts are there to help.

When you have a question don't hesitate to call one of our branches. We look forward to being of service.

Full contact details of our branches can be found on the back cover of this catalogue

BOOKS, MANUALS & DVDS

Our range of publications have been put together after hours of bedtime reading, to bring you a selection of books about the restoring and working on classics that will enlighten the reader. Beware, some of these books may cause you to damage the contents of your wallets and purses in a big way.

We stock the ever popular Haynes range of manuals, these manuals are essential equipment for the home mechanic. While the carburettor and component manuals contain more details than the general workshop manuals. Of course there are also the modification and tuning guides a must for the Mini enthusiast.

Tuning SU carburettors

This book looks into the basic design of the SU carburettor. It covers many areas including overhaul, tuning mixtures, jet and needle identifications and SU fuel pumps.

Tuning SU carburettors MGL0070 £17.70

SU workshop manual

Factory manual covering both carburettors and fuel pumps.

SU workshop manual GAC1044X . . . £15.20

SU needle chart

The chart identifies the correct replacement SU needle when modifications have been carried out to the engine or induction.

SU needle chart ALT9501 £15.60

SU parts catalogue ALT9524 £18.30

Carburettor manual

This Haynes 'techbook' manual covers SU, Stromberg, Weber and Dellorto carburettors. Giving an insight into the way carburettors operate and how to maintain and tune them, as well as including detailed servicing and overhaul procedures.

Carburettor manual MGL0279 . . . £30.30

SU carburettor rebuild DVD

This 2 hour, 40 minute film explains how to rebuild SU carbs.

SU carburettor rebuild DVD . . . 211-036 . . . £34.50

Weber carbs: Tuning tips & techniques, by John Passini

This book is the distillation of many years experience of working with Weber carbs. The mysteries of why and how they work and the practicalities of getting the best from

them. Also setting-up, fault-finding, maintenance & repair are all covered.

Tuning tips & techniques 213-431 . . . £15.20

Lucas fault diagnosis manual

This guide presents a logical sequence of tests that may be carried out on starters, generators, regulators, ignition and lighting systems. Written for technicians, this book can be easily understood by the amateur mechanic.

Lucas fault diagnosis manual . . . GAC1029X . . . £3.40

Classic car bodywork, by Martin Thaddeus

A book written for the home restorer who, until now, lacked the confidence to tackle bodywork. With specially devised techniques which don't rely on workshop plant, this work spans the gap between professional and amateur.

Classic car bodywork MGL0330 . . . £38.30

Haynes restoration manual

Restoration manual MGL0265 . . . £28.00

Haynes workshop manuals

Workshop manual (1959-69) . . . MGL6219X . . £31.80

Workshop manual (1969-01) . . . MGL6220X . . £29.50

Tuning guide by David Vizard

Tuning BL's "A" series engine . . MGL0063 . . . £31.80

Original series book - Mini Cooper, by John Parnell

This book is the definitive guide to one of Britain's best-loved sports car, the 'Original' series books are indispensable for all owners, restorers, buyers and enthusiasts.

Original series book MGL0254 . . . £43.70

Original Technical Publications Heritage DVD

Original Technical Publications for heritage cars have carefully reproduced a range of DVD's giving owners and enthusiasts easy access to original publications, including parts catalogues, service manuals and owner's literature. Each OTP DVD also includes an 'online access' card containing instructions and the URL to access these publications online as well as on Tablets or handheld devices (Windows PC, Mac iOS or Android). For more details and the full range of DVD's, please see our website.

OTP DVD, Mini (1959-00) . . . HTP2006 . . . £37.80

UNION FLAG

Lightweight polyester with metal grommets on the hoist.

Union flag, 36" x 60"
GAC9939X £19.90

WATERPROOF BLANKET

These waterproof blankets bring a touch of comfort to any roadside picnic. Easily folded into a neat parcel, it can be easily stored and carried with its durable handle. They are manufactured from grey acrylic with a foam layer and waterproof PEVA backing. Size 51" x 70".

| | Inlet & exhaust manifold gasket | AJM601 | £2.00 |
| | Thermostat standard 88°C (190°F) | GTS106 | £4.32 |
| | Oil seal rod change | AHU1672 | £1.46 |

MPI MODELS

MPI SERVICE PARTS

Keeping your Mini's engine in top condition has to come high on the agenda, regular servicing with good quality parts is easy and doesn't need to cost a fortune! Prevention is always the better option.

Oil filter cartridge type (1996 on)	LPW100180 . . .	£3.60
Air filter element (1996 on)	GFE1143	£12.40
Fuel filter 20mm outlet nut (to 169573 chassis)	GFE7059	£11.20
Fuel filter (169574 chassis on)	WJN101190 . . .	£10.40
1 Spark plugs (each) (1996 on)	BPR6ES	£5.27
2 Fan belt multi groove (1996 on)	GMB50920 . . .	£10.90
3 Millers oil Trans M 5lt	GGL4001X . . .	£45.50

MPI BRAKE PARTS

One of the most important components on any car has to be the brakes! Mini is no exception to this. It's so important to check the condition of your brakes on a regular basis! If in doubt... replace with new parts.

4 Front disc 8.4" diameter	GBD90806 . . .	£9.70
5 Front disc pads set Mintex (4 piece)	GBP281	£11.60
Rear brake drum spaced	GDB106Z	£25.00
6 Rear brake shoe set Mintex (4 piece)	GBS834AF . . .	£12.00
7 Rear wheel cylinder	GWC1102Z . . .	£7.00

MPI SUSPENSION PARTS & RUNNING GEAR

Knocks and bangs are quite common on Mini, usually caused by part of the suspension being badly worn. The MPI model does seem to suffer a little

more mainly due to the larger and wider wheels fitted. The common failure parts are listed below.

8 Suspension cone metric genuine Rover	FAM3968	£48.40
9 Radius arm complete RH OE new	NAM7162N . . .	£150.00
Radius arm complete LH OE new	NAM7163N . . .	£150.00
10 Front tie bar (each)	21A450	£8.90
11 Fulcrum pin front lower arm	2A4362Z	£10.80
Upper arm repair kit	2A4325K	£15.60
12 Swivel pin kits one side upper and lower	GSJ166	£8.10
13 Knuckle joint inc: gaiter & cup (each)	GSV1118	£3.10
14 Taper front wheel bearing kit (each)	GHK1140	£25.20

MPI GENERAL PARTS

Here are some of the parts we get asked for on a regular basis. Helping you to keep your Mini alive and in the best possible shape is why we are here and we are constantly checking not only our product but also our prices!

Engine mounts	21A1902	£3.54
Engine steady bar bush (fitted in pairs)	CRC5329	£1.66
15 Track rod end (each)	GSJ734Z	£5.12
16 Outer CV joint	GCV1013	£36.10
Gaiter kit outer CV joint OE heavy duty	GSV1053	£7.80
Water pump, no bypass	GWP187	£18.70
Steering rack gaiter kit OE steel clips	GSV1153	£6.46
Rocker cover gasket	GUG705009VC . . .	£1.26
Inlet & exhaust manifold gasket	LKJ100580EVA . . .	£7.50

Classic Mini **Restoration Parts**

Ordering Information

Notification of prices

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change. Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter these prices without prior notice.

For the latest prices, please visit our website www.moss-europe.co.uk. All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable) and are correct at the time of going to print. Postage and packaging is not included. E&COE. Where the price is replaced with NCA this part is Not Currently Available. Please visit our website (moss-europe.co.uk) or call our sales staff for the latest availability information or to enquire if we can offer an alternative part.

Product supersessions

Moss Europe's policy is to detail the most up to date part information in our catalogues. Where possible parts are kept to original specification. However, in some instances we have to supersede to the most viable alternative product to maintain supply and keep cars on the road. Every effort is made to ensure high quality products.

UK ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you have the opportunity, we invite you to visit one of our branches. Remember, supplying details of your car, (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications) saves time and helps us to help you. Please inform us of your customer number, as this will speed up the processing of your order.

Overseas ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you visit the U.K. please come and visit one of our branches. When ordering, please ensure that you enclose full details of your name, address and customer number, plus details of your car (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications).

Please note: Overseas orders are often subject to local import duties, taxes and Customs clearance, which will need to be paid for at the point of entry. These charges are NOT included in the price of the goods or delivery prices. All relevant Customs forms and documentation needed to ensure the order arrives with the minimum of delay, will be included with your shipment. If you have any special requirements, please contact us to discuss them. Delivery charges are dependent upon the size and weight of the shipment. If a quotation is required prior to placing an order, please contact the export department at your chosen branch and they will be pleased to supply a full quotation.

Parts back-order system

A back-order system is used when a part is not in stock at the time of ordering. If the item is expected to become available within 6 months, then it will be put on back-order, unless the customer instructs us otherwise. When we have the parts in stock, the back-order will be processed automatically and the item will be dispatched to the customer. If the particular part becomes No Longer Available (NLA) or does not become available within 6 months the back-order will be cancelled. If you are unsure when you placed a back-order contact your local branch.

Dispatch & delivery methods

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices. For delivery outside the UK we offer the following services.

- **Economy delivery (by road):** 2 to 5 days (approximately).
- **Express delivery (by air):** 1 to 2 days (Guaranteed) - next day service to most countries.
- **For small and low value orders we also use airmail.**

For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on weight band, volume, destination and delivery time. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own delivery and dispatch.

Windscreen delivery information

We always suggest that windscreens should be collected from one of our branches to ensure you are able to transport your glass with the utmost of care. However, we understand that this is not always possible.

To minimise the possibility of damage to the windscreen in the shipping process, it is now Moss Europe's policy to ship windscreens packed in a specially designed heavy duty 'Tri-Wall' cardboard box. The price of this box is £35.00 (inc VAT), non-refundable and is not included in the price of the product. The crate's dimensions will also increase shipping costs, particularly in EU countries. The crate dimensions are 150cm x 33cm x 74cm. The maximum volumetric weight is 92kgs. For more information please contact your nearest Moss branch.

Hazardous goods delivery information

At the time of going to print, Moss Europe Ltd conforms to international shipping regulations regarding packaging and transportation of Hazardous Goods by road and sea freight (only). Due to these international shipping regulations and licencing rules all goods deemed as Hazardous are currently available for shipping to the UK and Europe only. If you place an order containing Hazardous goods and your shipping address is not in the UK or Europe, we will not be able to ship this item to you. Please contact your local branch or visit our website moss-europe.co.uk for the latest delivery information of Hazardous goods.

Quotations & payment methods

We will be pleased to provide a full parts quotation detailing price, availability and relevant shipping costs. Payment may be made by cash, personal cheque (to the card guarantee limit), Certified Bank Draft, Sterling Travellers Cheques and credit or debit card including: Mastercard, Visa, Delta. If you intend to make payment by Cheque or Bankers Draft when

using our fast mail-order parts service, please confirm parts availability and carriage charges. We can accept payments using PayPal for website, email and phone orders.

Value added tax (VAT)

Value Added Tax (VAT) at the current rate will be levied on all orders being dispatched to all countries within the European Community. EU countries may be charged at their local VAT rate, please contact us or see website for details. VAT is not charged on goods dispatched to countries outside of the EU. However, such orders are often subject to local import duty, taxes and Customs clearance, which MUST be paid by you at the port of entry. Such charges are not included in the cost of the goods or delivery prices.

Exchange units

We are able to offer a full rebuild service on numerous major components in our product range. We offer this service as an alternative to direct replacement parts, or when a brand new item is no longer available. However, the continuity of this exchange scheme needs the understanding and co-operation of our customers in relation to several important points: It is important to remember that "rebuild" does not mean "brand new". Rebuilding a unit involves stripping, cleaning, inspecting and re-assembling the unit. During this process, parts showing signs of wear will either be completely replaced or suitably renovated. However, it is not always feasible for major sub-components to be replaced with brand new ones, for example, an exchange engine will not have a new block. Due to the nature of certain product lines, some items can only be offered on a "one for one" exchange basis. This effectively means that you must offer us a viable unit before we can release a fully rebuilt item from our stock. In some instances we can only carry out reconditioning of your own unit. Our staff will inform you if this is the case.

All exchange units are subject to a surcharge. This surcharge serves two purposes; firstly, it acts as an incentive for you to return your old unit, and secondly it provides us with financial cover if your returned unit proves unsuitable for exchange purposes.

Whether or not your returned unit is suitable for exchange purposes cannot be ascertained until it is made available to us for inspection. As a general rule, suitable for exchange basically excludes any items that are beyond reasonable repair (e.g. crankcases pierced by a connecting rod) or units irrevocably damaged. We are also unable to accept units unless they are returned in whole, complete form (i.e. differential units which are returned partly stripped with no bearings and all the shims missing are not generally accepted), nor do we accept a "box of bits".

Surcharges will only be refunded once our core department has passed the item as serviceable. Under no circumstances can any exchange unit be shipped overseas until we receive your original unit. We have predetermined prices for our exchange units based on our experience of repair costs for a gearbox, axle or engine. Occasionally, however, the damage to the unit is so great that we will contact you before beginning work on your unit to advise you of any additional cost that may be incurred during the rebuild of the unit. We can return the unit (at your cost) if this proves unacceptable.

'Old unit' returns

Exchange items including reconditioned engines are subject to a surcharge that is refunded when a rebuildable unit (core) is returned. When you receive the rebuilt unit, attached to it will be a Core Return Authorisation Tag. This tag must be removed from the rebuilt unit and attached to the returned core in order to receive credit. Cores must be returned within 90 days of purchase in the original box, carton or engine cradle supplied with the rebuilt unit. Cores must be shipped clean and empty of fluids. Cores must be complete, assembled and rebuildable to receive credit or refund. You must pay all shipping charges for the return of the core and these charges are not refundable.

Warranty

All parts are warranted against defects in materials and workmanship for a period of twelve (12) months from the date of purchase. The warranty does not cover failure resulting from incorrect installation or misuse; failure during any competition, motorsports or track events; failure of any, or caused by any, related component. The warranty does not cover labour charges, nor will a warranty settlement be greater than the cost of the original component. Should you need to make a warranty claim, please contact us immediately at the branch of purchase. We will then advise you as to the best course of action. With all warranty claims a copy of the original purchase invoice must be produced.

Warranty returns

Parts that fail in use may be returned for 12 months from the date of purchase. Returns must be accompanied by the original invoice - no warranty claims will be paid without a copy of the original invoice. Return freight will be reimbursed. Electrical parts returned for warranty will be tested and if found functional, no return credit will be given and the part will be returned. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Non-warranty returns

All uninstalled parts, in their original packaging may be returned within 90 days for any reason. A copy of the original invoice or the picking label (which is generally attached to the original packaging) must accompany the return. Return freight is paid by the customer. If the return is due to our error, the return freight will be reimbursed. Parts returned outside of this policy or in non-resalable condition may not be accepted or may be assessed a 15% handling fee. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Customer service

We value your custom and wish to ensure that you receive the very best service. Every effort will be made to provide you with Quality Parts and Expertise in a relaxed, helpful and friendly manner. Should you consider the service you receive from us to be unsatisfactory, or you have any problems with the part(s) purchased, please advise a member of the sales team at the originating branch. If the matter is not resolved to your satisfaction, please contact our Customer Services Department and we will do our very best to resolve the issue, either email: customerservices@moss-europe.co.uk or write to: **Customer Services, Moss Europe Ltd, Unit 16, Hampton Business Park, Bolney Way, Feltham TW13 6DB England.**

Engine Preparation

This is a general guide to correct procedures and will apply, wholly or partly to all types of engine rebuild. However, before the engine rebuild can begin the engine needs to be stripped down, cleaned and examined, a procedure which many undertake with undue haste. During the strip down the following should be observed:

1. Wait for the engine to cool properly before removing the cylinder head - this applies especially to aluminium type heads. The consequence of not waiting can result in a warped head.
2. Mark the location (and, where applicable, orientation) of all major components especially valves, tappets, camshafts, pistons and rods, shell bearings by placing in clearly marked containers or racks.
3. Before removing bearing caps (e.g. camshaft, con rod, main bearing), make sure they are clearly marked for position and orientation.

Note: They must go back in the same position or on the same con rod and the right way round.

Once stripped all parts should be thoroughly cleaned and inspected with specific attention to any areas of bad wear or damage e.g:

1. Blown head gasket/burnt out valves - cylinder heads should always be thoroughly examined for cracks or distortion. Simply fitting a new gasket or valve is not the answer.
2. Damaged piston/rings - always check the cylinders for wear and damage. If the pistons need replacing, a rebore or cylinder hone is almost certainly needed as well. Damage to bores often appearing at the limits of the piston ring travel may well be what dictates the need for a rebore or at least a professional hone.
3. Badly worn crankshaft shell bearings - if the crankshaft is badly scored it must be reground to the next undersize. However, just as important are the con rod and main bearing housings that the shell bearings fit into. These are often overlooked and any wear or distortion in these areas will cause premature engine failure.

Cleaning should include removal of all oil gallery plugs to enable thorough cleansing with brushes. Many parts can be re-used during the rebuild but the following items should always be replaced:

1. All Gaskets And Seals. 2. Shell Bearings. 3. Timing Belts Or Chains. 4. Timing Belt/Chain Tensioners. 5. Piston Rings. 6. Oil Pump Drives. 7. All Major Fastenings Including Cylinder Head, Con Rod And Flywheel Bolts.

Engine Rebuild

The following highlight important procedures during the re-assembly of a modified engine:

1. **THOROUGHLY** clean and check **ALL** parts - your engine's worst enemy is dirt, even new parts may need cleaning. This includes the head and block and all oil galleries.
2. **ALWAYS** fit new high quality gaskets and seals, ensuring all shafts and mating surfaces are free from burrs and defects. Use correct sealants or lubricants where necessary.
3. **LIBERALLY** oil all internal parts during assembly. Use the special assembly lube or gear oil on cam lobes and tappet faces.

4. **ALWAYS** replace cam followers when fitting a new camshaft.
5. **ALWAYS** replace con rod, flywheel and cylinder head studs and bolts. All other fastenings should be checked for wear or damage and replaced as necessary. For high specification engines, race quality fastenings are available for most applications.
6. **CLEAN** all threads and fastenings prior to fitment and use a good quality torque wrench on all critical components. Apply an anti-seize lubricant to all cylinder head fixings.
7. If you are fitting high lift cams, special pistons, or large valve heads, always carry out a dummy engine build and check valve to piston/block clearances. Machine piston crowns/valve pockets or block face as necessary.
8. **INCORRECT** cam timing can severely reduce the power output so don't overlook this area during assembly. Use adjustable cam pulleys or sprockets where available.
9. **CHOOSE** compatible parts for your specific conversion. A full race specification head will be next to useless if fitted to a mild road stage engine. Modified camshafts and cylinder heads in particular should be chosen with care.

10. **UNLESS** you know what you are doing, avoid over-lightening components. Reducing the weight of some parts may also reduce their strength to a critical level.
11. **ALWAYS** have the engine assembly balanced - it will make a lot of difference to the smoothness and help maintain optimum reliability.
12. **DON'T** forget the clutch - depending on the power increase, a suitable heavy duty or competition clutch assembly will be required.
13. **OIL** And **FILTER** - the importance of using the correct specification of oil cannot be overstated. Please contact your local branch for advice.

Most engine modifications should be followed up with a professional engine tune. Apart from emissions, the correct ignition timing and fuelling is paramount if you want the best return for all the expense and effort you have put in. Get these important settings wrong and you may lose more than just a bit of power. Over-fuelling (rich mixture) can result in excessive piston, ring and bore wear. Under fuelling (weak mixture) or retarded ignition can cause overheating problems. An ignition set with too much advance is likely to induce detonation or 'pinkings' which, if left uncorrected, can shatter pistons and place excessive loads on the bottom end. You have been warned!

Lastly, please check that your suspension and braking systems are adequate for the power increase you have achieved. A full range of optional equipment can be found further in the Moss Europe catalogue.

Camshafts

Camshaft Fitting Instructions

The installation and first few moments of running are critical factors in the life of the camshaft. Failure to install the camshaft correctly will have a drastic effect on the life of the camshaft and in the worst cases can result in immediate failure. The following instructions must be adhered to in order to obtain maximum performance from the engine and to ensure a long and trouble free life from both camshaft and associated components. These instructions are also provided in addition to the original manufacturer's installation procedure.

Where a camshaft is being replaced due to excessive wear, it would be highly recommended to strip the engine and fully clean the internals. Metal particles present in the sump, oil pump, bearings and oil galleries will soon play havoc with the new cam. It would also be wise to check the oil feed system. Low oil pressure due to a worn pump, blocked pick-up pipe or blocked oil galleries will quickly wear the new cam to the same state as the one being replaced. In other words, before replacing a failed camshaft, make sure you find out the reasons for the failure and correct it!

Before fitting the camshaft, check that it is identical in every aspect (with the exception of the lobe profiles) to the one being replaced. Special attention should be given to the oil feed positions and journal diameters as variations may occur during the manufacture of the engine. Also check that any gallery bungs present on the old cam are also in place on the new cam. Do not remove the black phosphate coating from the new cam lobes. Liberally coat both the camshaft and cam followers with a proprietary cam lube or engine assembly compound. We recommend and use a colloidal graphite paste. Failure to do this can cause scuffing between the surfaces of the cam and followers, which will result in premature wear. Ensure that followers are free to rotate in their bores where applicable. It is essential that new followers are always fitted, regardless of the condition or limited use of the old followers. Failure to do so may cause premature components failure and consequently will invalidate any warranty claim.

Upon installation, the valve springs must be checked to ensure that:

1. The fitted length (installed height) of the valve springs match the figure provided by the manufacturer. If too small, then the valve seat areas in the head will require machining. If too large, shims can be added to the spring seat. Due to varying manufacturing tolerances of cylinder heads, all springs should be checked and measured for clearance.
2. Coil binding does not exist at full valve lift. This is the condition where the spring is fully compressed. As a guide, the spring should be able to compress a further 0.060" (1.5mm) before the coil bound condition is reached. This can be checked by inserting

feeler gauges between each coil of the spring and adding the results together to get a total clearance figure. Due to varying manufacturing tolerances of cylinder heads, all springs should be checked and measured for clearance.

Check the clearance between the bottom face of each retainer and the top of the guide or stem seal at full lift. This should be a minimum of 0.080" (2mm). If this clearance cannot be achieved, the top of the guides must be machined. When double valve springs are being installed in place of singles, ensure the inner spring is correctly located and the correct retainers and platforms are used where applicable. When modifying engines that utilise finger followers, it is imperative that you ensure the followers remain in the original attitude relative to the cylinder head. Failure to do so will alter the rocker geometry, increasing or decreasing valve lift and can result in failure of both cam and followers or excessive valve stem/guide wear. For OHV engines, attention should be paid to rocker arm geometry for the same reasons.

Camshaft Timing

Determining True Crank TDC Position - Head Off Block

Although the crank pulley will have a mark to show TDC position, this point may not be accurate due to manufacturing tolerances. It is always recommended to calculate the actual position of TDC rather than rely on the mark on the crank pulley. Fit the timing disc to the front of the crankshaft. A pointer for the timing disc can be made from a piece of bent wire secured under a suitable front cover bolt. Position a dial gauge to measure the travel of No 1 piston.

Turn the crank until the piston is at its maximum height and zero the gauge. You will find that there is a dwell period of approx. 10 degrees where the piston is at its maximum height. True TDC position is at the centre of this dwell period. To accurately measure the position of TDC, rotate the crankshaft and stop at a figure just before TDC, for example 0.020" on the dial gauge. Record the figure on the timing disc from the pointer. Now rotate the crankshaft and stop at the same figure (0.020") after TDC. Record the figure on the timing disc again. True TDC is positioned in the middle of these two figures. The TDC position can be calculated by adding the two figures together and dividing by two. Adjust the timing disc so that it reads zero on the pointer at true TDC.

Determining True Crank TDC Position - Head On Block

If the head has not been removed when changing the cam, it is still possible to measure the true TDC position. The procedure is the same as above but the movement of the piston is recorded by using an extension resting on the piston crown (such as a socket extension or push rod). Access to the piston crown is made through the spark plug hole.

Formula

Engine Capacity/Displacement

Information required: 1. Cylinder bore, 2. Crankshaft stroke, 3. Number of cylinders.

Calculation: $0.7854 \times \text{bore} \times \text{bore} \times \text{stroke} \times \text{number of cylinders}$.

Example: Bore = 73.5mm (7.35cm), Stroke = 81.3mm (8.13cm), cylinders.

Solution: $0.7854 \times 7.35 \times 7.35 \times 8.13 \times 4 = 1379.79\text{cc}$.

In the above example we have used centimetres to calculate capacity in cubic centimetres. To find the displacement in cubic inches simply substitute measurements in inches: 7.35cm = 2.893" and 8.13cm = 3.200" giving $0.7854 \times 2.893 \times 2.893 \times 3.200 \times 4 = 84.13 \text{ cu.in.}$

To quickly convert from cc's to cu.ins. divide by 16.387 and from cu.in. to cc. Multiply by 16.387.

Crankshaft Stroke

Information required: 1. Bore size, 2. Engine capacity, 3. Number of cylinders.

Calculation: Divide engine capacity by: $(0.7854 \times \text{bore} \times \text{bore} \times \text{no. of cylinders})$.

Example: 1380cc 4 cylinder engine with an 73.5mm bore size.

Solution: $1380 \div (0.7854 \times 7.35 \times 7.35 \times 4) = 169.717086$, $1380 \div 169.717086 = 8.13\text{cm}$.

Compression Ratio

Information required: 1. Capacity of ONE cylinder, 2. Compressed volume.

Cylinder capacity is the total engine displacement divided by the number of cylinders. E.g: 4 cylinder 1000cc engine = 250cc per cylinder.

Compressed volume is the area above the piston crown when the piston is at its highest point or top dead centre (TDC).

This area comprises:

1. The combustion chamber (usually in the cylinder head as shown, but can also be in the piston crown).
2. The head gasket thickness.
3. The area between the cylinder block face and the piston crown, commonly referred to as the 'deck height'.

Procedure:

Measure the volume of the cylinder and/or piston chambers using a suitable burette filled with paraffin. Calculate the volume of the gasket and deck height areas and add these to the chamber volume to arrive at the total compressed volume. Some engines with irregular piston crown shapes, especially raised areas, may be difficult to quantify with any degree of accuracy. In such cases it is best to measure the compressed area with the cylinder head fitted. Make sure the piston is at TDC and seal the gap between the cylinder wall and the piston with grease (this will prevent seepage past the rings giving a false reading). Refit gasket and cylinder head and measure the volume through the spark plug hole.

Note: The spark plug hole must be at the highest point when carrying out this procedure.

Calculation: $(\text{Cylinder volume} + \text{compressed volume}) \div \text{compressed volume}$.

Example: 1000cc 4 cylinder engine with a compressed volume of 27cc's.

Solution: One cylinder = $1000\text{cc} \div 4 = 250\text{cc}$.
 $(250\text{cc} + 27\text{cc}) \div 27\text{cc} = 277\text{cc} \div 27 = 10.26$ or 10.26:1 compression ratio.

Valve Size

The maximum airflow through any valve occurs when it has been lifted 25% of its diameter. For example, a 37mm (1.45") valve will require a lift of no more than 9.25mm (.364") and a 31mm (1.22") valve a lift of 7.75mm (.305") to reach their maximum flow capabilities.

Timing In The Camshaft

Rotate the crankshaft clockwise to 90 degrees after TDC. This will make sure all the pistons are half way down the bore. Now position the dial gauge so that it can read the lift of the inlet valve of number 1 cylinder from the top of the valve retainer. Rotate the cam until the gauge shows that the valve is at full lift. As with the crankshaft, there will be a dwell period where the valve is at full lift. True full lift is at the centre of this dwell period. Roughly position the cam at true lift position.

Now rotate the crankshaft clockwise to the full valve lift position (as specified on the camshaft data sheet - this figure is typically from 100 to 120 degrees after TDC), fit the timing belt or chain and set up the tensioner. Now rotate the crank clockwise until the inlet valve of number one cylinder is just off full lift position (such as 0.005" or 0.15mm). Record the figure on the timing disc from the pointer. Then continue to rotate the crank clockwise until the valve has fully opened and then closed by the same distance as previously used (0.005" or 0.15mm). Read the figure on the timing disc again. The position of full lift is the middle of these two figures. The full lift position can be calculated by adding the two figures together and dividing by two. Adjustments can then be made to the camshaft timing, using an adjustable cam pulley or offset dowels, if this figure does not agree with the one on the data sheet. Check the timing again after adjustments using the same procedure.

Having timed the camshaft, check that there is no piston to valve contact. Minimum clearance is 0.060" (1.5mm). This can only be checked by dummy building the engine with a piece of plasticine placed on the crown of the piston. As the engine is turned, the valves will indent the plasticine. The clearance is then measured as the thickness of the plasticine between the piston crown to the bottom of the valve indent. Before starting the engine, turn the engine over by hand to ensure that it turns freely. Prime the oil system and check that everything is set to ensure that the engine starts straight away. The engine must not be turned over for any length of time on the starter. Once started, do not allow the engine to idle for the first 20 minutes and keep the revs to a minimum of 2500 rpm. This

will ensure adequate lubrication of the cam and followers and reduce the contact force between the cam and follower. If any adjustments need to be made within the first 20 minutes, then shut the engine down. **DO NOT ALLOW THE ENGINE TO IDLE.** Please note that new hydraulic lifters may in some cases operate with excessive noise for a few minutes before they are fully charged with oil.

Performance Camshafts

All the Kent camshaft applications/part numbers below with the suffix 'P' are for the original pin drive oil pump/ camshaft. If you have changed your camshaft and oil pump to either 'Star' drive or 'Metro Slot', use the suffix 'S' or 'M' on the part number. All Piper cams with the suffix E are Star Drive unless otherwise stated.

To assist in selecting a suitable camshaft we have prepared a table showing their various characteristics, these will change from engine to engine and with other modifications such as carburettor or valve size. A scatter profile is where the cam timing on No.2 and 3 engine cylinders has been altered slightly to combat the poor scavenging of the siamese port design. This will benefit both the tickover and high end performance.

The effect of a larger engine is to lower the camshaft's power range slightly. Care must be taken to ensure that installation is carried out correctly and that components all work together or you will not get the expected power output or reliability. It is essential that the new cam is fitted with new followers as they mate with the lobe that they run on and should never be used on another lobe. Lightened and Tuftrided followers wear more slowly and put less load on high lift cam lobes: They are also manufactured with a drainage hole. Another essential is the special lubricant that must be used with all new cams, it provides vital lubrication during initial starting and protects your cam from extreme wear in its first minute of use. (S/T = Special Tuning) Don't forget the camshaft assembly lubricant or the cam timing degree disc (TT2929), you will need this to set your cam timing.

KENT CAMS CAMSHAFT TYPE	PART NO.	INLET	EXHAUST INL - EXH	DURATION	CAM LIFT	DESCRIPTION

Carburettor Jet Selection

This is a quick guide to jet selection for 1275cc Weber carburettors.

Note: Jet selections shown are a basis to work from, they may need adjustment to suit your application, this can only be carried out on a rolling road.

1275cc WEBER CARBURETTOR	40 ROAD	45 FAST ROAD	45 FAST ROAD AND SPRINT	45 RACE
Auxiliary Venturi	3.5	4.5	4.5	4.5
Choke	34	36	38	40
Main Jet	145	150	170	200
Air Cor.	175	180	180	175
Emulsion Tube	F2	F2	F2	F2/F9
Pump Jet	45	50	55	55/60
Idle Jet	45F8	50F8	55F8	55F8

Suspension

Suspension Geometry

There are five basic factors that control front suspension geometry:

- | | |
|-------------------------|------------------|
| 1. Kingpin Inclination. | 4. Camber Angle. |
| 2. Bump Steer. | 5. Tracking. |
| 3. Caster Angle. | |

Note: On a Mini only three of these can be altered easily.

Front Suspension

Kingpin Inclination

The Kingpin Inclination is not independently adjustable although it will alter as other adjustments are made.

Bump Steer

Bump steer is in fact a change in toe angle as a wheel moves up or down in its suspension travel. When a bump is encountered in a turn, the resulting toe change will cause a slight steering effect which is felt as anything from a slight "twitch" to a major direction change. This can be optimised but is far more complicated and would require specialist measuring tools.

Caster Angle

Caster angle this is left to the adjustable front tie bar kit (WPT9003X). This is quite an easy adjustment if the tie bar bushes (31G1155H road hard/31G1155VH race hard rubber or 31G1155SPK poly. bushes) are lubricated on installation, as the tie bar can actually be rotated (therefore lengthened or shortened) in situ.

Camber Angle

Camber angle is adjusted by the replacement of the lower arms with lengthened or adjustable length arms.

WPT9001X are 3/8 inch longer, giving 1.5 degrees more negative camber than standard.

WPT90012X are 1/2 inch longer, giving 2 degrees more negative camber than standard.

WPT90013X are 5/8 inch longer, giving 2.5 degrees more negative camber than standard.

C-AJJ3363 rose jointed length adjustable, giving fully adjustment capabilities.

Again as with the tie bars it is advisable to use harder bushes (21A1882SPK) to achieve less free play.

Tracking

Tracking probably the most well known, is adjusted via the track rod end on the steering rack. This is not to be overlooked as with implementing the above modifications to the suspension your tracking is sure to have been affected and will require adjustment to bring back to the correct setting.

Note: If lowering the suspension or adding lots of negative camber, you will require lengthened track rod ends (GSJ158) as the standard ones may only be hanging on by a few threads.

Rear Suspension

Rear suspension, at the rear of the Mini we are really stuck with only track and camber adjustment.

Camber Angle

Camber angle is adjusted via the outer radius arm bracket. There are two types available fixed (WPT9002X) at 1.5 degrees, and adjustable (WPT90021). These adjustable brackets also allow the track to be adjusted. If purchasing the fixed camber brackets the track can be altered, to alter toe-in is quite a simple affair this is done by adding spacer shims between the radius arm outer bracket and the rear subframe and elongating the fixing holes on the underside of the radius arm bracket.

Adjusting toe-out is not so simple this requires the removal of the radius arms to allow access to the inner radius arm mount, this now requires the mounting hole for the radius arm pin to be elongated. Once the correct track has been found it will be necessary to lock this in position to stop it returning to toe-out after some suspension movement. This elongating of the inner mount brings with it another problem by raising the rear suspension. The thought of all this labour should have put off purchasing the fixed brackets and brought your attention to back to the adjustable brackets, in my view well worth the money and the sore knuckles.

Dampers, Springs & Adjustable Height Suspension

We supply three different manufacturers of suspension dampers for the Classic Mini SPAX, GAZ and KONI, all of them offering dampers with adjustment facilities on both bump and rebound. Nearly all offer this facility via an adjustment knob or screw on the lower body of the damper unit, this controls both the bump and rebound. This is the easiest method of adjusting your damper.

Koni on the other hand have a different method of adjustment which requires the shock to be removed and adjusted under compression. Although this sounds like a long job this really only takes about 1 hour tops and only this long because the fuel tank has to be repositioned while removing the left hand rear damper.

Front Dampers

GAC84011X	SPAX Shock Absorber - Standard Height.
GAC84021X	SPAX Shock Absorber - Lowered Height.
GAC8405X	KONI Shock Absorber - Standard Height.
GAC84046X	KONI Shock Absorber - Lowered Height.
GAC84041XG	GAZ Shock Absorber - Standard Height.
GAC84042XG	GAZ Shock Absorber - Lowered Height.

Rear Dampers

GAC84031X	SPAX Shock Absorber - Standard Height.
GAC84041X	SPAX Shock Absorber - Lowered Height.
GAC8407X	KONI Shock Absorber - Standard Height.
GAC8408X	KONI Shock Absorber - Lowered Height.
GAC8403XG	GAZ Shock Absorber - Standard Height.
GAC8404XG	GAZ Shock Absorber - Lowered Height.

These of course are only the damper units and not the spring unit; this job on a Classic Mini is left to a rubber cone. Perfect for the job in many ways it is a bit harsh for the requirements we expect today. There are several ways to change this harshness. The cheapest way is to remove the springs and drill holes into the rubber although this could take some time with trial and error (please see Dave Vizards'... How to Modify Your Mini book part number MGL0248).

We also supply replacement spring kits that actually replace the rubber cone units completely. These are available in two different spring rates. The softer of the two kits (FAM3968X) is the one we would recommend for road use as it is disciplined over bumps and pot holes yet still gives plenty of enjoyment in the corners. The firmer of the two kits (FAM3968HX) is the kit that we would recommend for fast road, sprint and possibly some competition applications.

There is also the choice of coilover damper/spring kits (SPCK19 lowered kit and SPCK20 standard height kit). These as the name suggests are one piece units, the damper units have top and bottom (height adjustable at the bottom) platforms to facilitate the fitment of a spring around the body of the damper. With these units you can remove nearly all of the other original spring components e.g: Rubber cone, suspension trumpets and knuckle joints. These kits come with their own top and bottom mounting brackets for the front and require slight modification to the rear inner arches to allow fitment of the dampers and 1.9" diameter springs. If staying with standard rubber cones or converting to the spring replacement it is still possible to have adjustable height suspension. This is done via adjustable suspension trumpets: These trumpets replace the standard trumpets and have a threaded adjuster to allow a huge range of adjustment.

Hi-Lo's

GAC8437X	Hi-Lo Adjustable Height Suspension Kit - Front And Rear.
GAC84371	Hi-Lo Adjustable Height Cones Kit - 2 x Hi-Lo Cones And 2 x 21A423.
GAC84372	Extension Rods (Pair) - Use With GAC84371 When Fitting To Rear Suspension.
GAC84374	Front Allen Bar - Allen Head Bar For Adjusting Suspension Heights.
GAC84373	Rear Allen Bar - Allen Head Bar For Adjusting Suspension Heights.

Adjusta Ride

GAC8432X	Adjusta-Ride Adjustable Height Suspension Kit - Front.
GAC8433X	Adjusta-Ride Adjustable Height Suspension Kit - Rear.

Useful Tools

GAC9424X	Cone Compressor Tool.
MTR4201	Caster/Camber Gauge.
	(This gauge allows you to correctly set up your suspension to get the best from your Mini where it excels most (the corners). Very easy to use supplied with instructions).

Note: Please remember that any change in height is going to affect other suspension geometry parameters and these will require checking and adjustment once the desired height has been reached.

Brakes

Over the 41 years of the Mini production life there have been many upgrades to the braking systems. A summary of standard Mini brake fitment throughout its production life.

Drum Brakes

1959-1964 Front drum brakes with single leading shoes. Rear drum brakes. This system had only one hydraulic wheel cylinder fitted in each drum. This system was hardly adequate then and should only be kept if car is trying to retain OE specification.

1964-1985 Front drum brakes with twin leading shoes. Rear drum brakes. This system although an improvement on the single leading shoe setup is only just adequate for standard performance cars and again retaining OE specification.

Disc Brakes

1961-1964 7 inch disc brakes at the front, two pot calipers. Rear drum brakes. Fitted to the Mini Cooper 997cc. This system although discs still had a very small pad surface to disc area and because of this these were not all that good. Parts for this system are virtually impossible to find therefore making it hard to maintain.

1964-1969 7 inch disc brakes at the front, two pot calipers. Rear drum brakes. Fitted to the Mini Cooper 998cc. This system had redesigned callipers and larger pad to disc surface area. This system was better than the 997 system but for today's standards it is still a little poor. Good for standard 10 wheel applications.

1963-1974 7.5 inch disc brakes at the front, two pot calipers. Rear drum brakes. Fitted to the Mini Cooper S and Mini Clubman GT. Much larger pad to disc surface area and improved cooling efficiency. This along with a remote servo makes a very effective braking system for those who wish to keep their 10" wheels.

1974-1979 8.4 inch disc brakes at the front, two pot calipers. Rear drum brakes. Fitted to the Mini Clubman GT. The larger discs really help with the pad to disc surface area and the cooling. These systems were non served and still gave very good stopping power.

1985-2000 8.4 inch disc brakes at the front, two pot calipers. Rear drum brakes. Fitted to the Mini as standard.

1989 8.4 inch vented disc brakes at the front, four pot calipers. Rear drum brakes. Fitted to the ERA Turbo Mini.

Improving Your Mini's Brakes

Any Mini can have its brake improved by moving to the next standard upgrade, i.e: Single leading shoe to Twin leading shoe etc... But most of you will be more interested in converting either from drums to discs or from small discs to large discs or maybe even four pot calipers. First of all you should be honest with yourself with what you want from your braking system.

All of us would like to believe that we are overlooked, Eddie Irvine's (guess where I'm from) but the truth is usually that we are just spirited drivers who probably have to use our Saturday Mini race car as weekday commuter. Big discs and hard pads are great for the race track but in real life they can be noisy and juddery, and in the worst cases give poorer performance if the pads do not reach their working temperature.

The cheapest brake performance upgrade for all of the disc type systems is an upgraded pad swap. There are lots of manufacturers out there producing upgraded material pads.

Performance Brake Pads

GBP102G	EBC Green Pad Set 998 Cooper.
GBP102KV	EBC Kevlar Pad Set 998 Cooper.
GBP103G	EBC Green Pad Set Cooper S.
GBP103KV	EBC Kevlar Pad Set Cooper S.
8G8996	MINTEX M1144 Pad Set Cooper S.
STR505G	EBC Green Pad Set GT & 1984-On.
STR505KV	EBC Kevlar Pad Set GT & 1984-On.
STR5051	MINTEX M1144 Pad Set GT & 1984-On.
STR5052	MINTEX M1155 Pad Set GT & 1984-On.
GBP258	MINTEX 4 Pot Metro And Alloy Calipers.
TMG309474	MINTEX M1144 4 Pot Metro And Alloy Calipers.

Something usually overlooked when looking at braking systems is replacement over braided brake hoses these give you a firmer feel at the pedal as these hoses do not expand when pressurised as rubber hoses do.

If you wish to fit the ultimate in braking systems we have several 4 pot calipers and even 6 pots.

This kit is for 13 inch wheels only:

MT5411 6 Pot Vented Big Brake Kit. For 13" wheels where a no compromise front brake setup is required our big disc conversion can be used. This combines a one piece 6 pot caliper with a 265 x 18mm vented disc with separate alloy mounting bell. Supplied with fast road pads and front braided brake lines. This is a competition oriented brake upgrade as the calipers are not fitted with dust seals.

Identification Numbers

Engine Identification Numbers

850cc

8A	Austin Up To 25000.
8MB	Morris Up To 25000.
8AM	Austin & Morris 25000 On.
8AH	Austin & Morris Automatic.
8AJ	Austin & Morris closed circuit breathing.
8AK	Austin & Morris automatic with closed circuit breathing.
8WR	Wolseley Hornet & Riley Elf.
8AC	Moke.
85H/101	All variants 1969-On.

Note: Third suffix letter denotes compression type, L = Low, H = High, e.g: 8AM/U/H101 denotes high compression.

998cc

9WR	Wolseley Hornet & Riley Elf MkII, pre closed circuit breathing.
9AD	Austin, Wolseley Hornet & Riley Elf MkII with remote type gearbox and closed circuit breathing.
9AE	Wolseley Hornet & Riley Elf MkIII.
99H/-101on	Wolseley, Riley, Mini 1000, Clubman 1000 1970-On & MkIII with dished piston.
99H/791	Mini 1974-On with dished piston.
99H/997	1980-On A+ block, flat top pistons, economy fitment with 2.95 final drive.
99H/A97P	A+ block with dished pistons, pre-A+ gears, 3.44 final drive & 12" wheels.
998	A+ block with centre locating tag in main cap, 1985 onwards, Flat top piston with circlip gudgeon pin retention.
99H/B81	Up To engine number 127431.
99H/C20	Up To engine number 105023.
99H/997	From engine number 127422 with 2.95 final drive 99H/A35P.

Flat top piston with press fit gudgeon pin

99H/B81	From engine number 127432.
99H/C20	From engine number 105024.
99H/D80	

Flat top pistons with press fit gudgeon pin, lead-free cylinder head

99H/G30 or G32 or G33
99H/F15 or F16
99H/E20 or E21
99H/D81
LBB10089

Dished pistons with circlip gudgeon pin retention

99H/B83P	Up To engine number 102908.
99H/B84P	Up To engine number 100216.

Dished pistons with press fit gudgeon pin

99H/B83P	From engine number 102909.
99H/B84P	From engine number 100217.

Dished pistons with press fit gudgeon pin, lead-free

99H/G31
99H/E22
LBB10175

1100cc (1098cc)

10AMW/Ta	Clubman Estate and Austin 110 (ADO16 shape).
10H791	Clubman Saloon.
10H/-/H	All Austin 1100 2 & 4 door derivative Saloons (ADO16 shape).
10GR/Ta/H	MG1100 (ADO16 shape).
10GRB/Ta/H	MG1100 & Wolseley 1100 (ADO16).
10V/Ta/H	Vanden Plas 1100 (ADO16 shape).

997 Cooper

9F/Sa/H101	To 2637 except 19201 To 20410 (became 1070S).
------------	---

998 Cooper (January 1964 On)

9FA/Sa/H	MkI Austin pre closed circuit breathing.
9FD/Sa/H	MkI Morris up to engine number 1934, all Austin MkII closed circuit breathing and

9FD/Xe/H	Morris MkII from engine number 1935-33660 with closed circuit breathing.
99/-/H	4 synchro gearbox introduced. Last of manufacture 1969.

Cooper S Variants

970cc

9F/Sa/X	Engine numbers 29001-29003 with Tecalmit filter.
9FD/Sa/X	Closed circuit breathing introduced with Tecalmit filter.
9FE/Sa/X	Closed circuit breathing, oil filter with oil light switch introduced.
9F/Sa/X	Engine numbers 29039-30029 Purolator oil filter with oil light switch and closed circuit breathing.

1070cc

9F/Sa/H	Engine numbers 26501 To 33660 and 19201 To 20410.
9FD/Sa/H	Engine numbers 33661 To 33948 with closed circuit breathing and oil light switch in oil filter head.

1275cc

9F/Sa/Y	Engine numbers 31001 To 31504 pre closed circuit breathing with Purolator oil filter.
9FD/Sa/Y	Closed circuit breathing with oil light switch on filter housing after engine no.32178.
9FE/Sa/Y	Closed circuit breathing with oil light switch on Purolator filter housing and piston design change.
9F/Sa/Y	From engine number 32378 onwards, closed circuit breathing with Purolator filter with oil light switch, Aeg510 camshaft introduced at engine number 40006, cross-drilled EN40B crank at engine number 42730 and metal dipstick tube at engine number 42548 onwards.
12H397	Cooper S MkIII with dynamo, negative earth and Tuftrided EN16T crankshaft.
12H398	Cooper S MkIII with alternator, negative earth and Tuftrided EN16T crankshaft.

Note: Only Cooper S engines with prefix '9F' had EN40B forged steel, nitrided crankshafts. All other A-series engines had EN16T steel crankshafts which were only Tuftrided on MkIII 'S' and Austin 1300GT (ADO16) and were stamped 12G1683.

1275cc Solid Wall Block (No Tappet Chest Covers)

12G/Ta/H	ADO17 shape Wolseley, Riley, MG & Vanden Plas fitted with S rods.
12H379	1275GT with dynamo, negative earth, electric fuel pump and remote gearbox.
12H380	1275GT with alternator, negative earth, electric fuel pump and remote gearbox.
12H389	1275GT with dynamo, negative earth, mech. fuel pump and remote gearbox.
12H390	1275GT with alternator, negative earth, mech. fuel pump & remote gearbox.
12H706	1275GT with alternator, negative earth, mech. fuel pump & rod change gearbox.
12H397	Cooper S MkIII with dynamo and negative earth.
12H398	Cooper S MkIII with alternator and negative earth.
12H/-/	1275 Austin ADO16 & Allegro.
12H610/635	Innocenti Mini with duplex cam drive gears and 11-stud head.
12H719/832	Innocenti Mini with simplex cam drive gears and 11-stud head.

1275cc 1990 Onwards (12A Numbers)

12A/2A	Carburettor type.
12A/2B	Carburettor and catalyst type.
12A/2D	Spi (Single Point injection - Tbi, throttle body injection) with 9.4-1 CR.
12A/E	Spi (Tbi - throttle body injection) with 10-1 CR.

With the following suffixes:

F53	10.0-1CR, 3.105 final drive, catalyst, oil cooler.
F75	9.4-1CR, spi, 3.105 final drive, closed loop catalyst.
F76	9.4-1CR, automatic with closed loop catalyst.
F77	10.0-1CR, spi Cooper, 3.2 final drive, closed loop catalyst.
G01	10.0-1CR, 3.105 final drive, catalyst, no oil cooler.
G03	9.4-1CR, 3.105 final drive, catalyst, (May 1992-On).
G04	9.4CR, 2.76 final drive, catalyst, French only spec.
G05	9.4-1CR, automatic with catalyst.

Factory Replacement Engine Reference Numbers
(i.e. New, Gold Seal Units)

8G28	850cc - Oil feed to primary gear type crank with 1.375-inch tail shaft.
8G35	850cc - Deva bush conversion type crankshaft with 1.375-inch tail shaft.
8G45	850cc - Gold Seal, 1.5-inch self oiling primary gear/crankshaft type.
GSE1101E	850cc - Gold Seal unit.
RKM1101E	850cc - Silver Seal unit.
BHM1307E	850cc - Gold Seal unit, 85H prefix replacement.
8G18	997cc Cooper - Oil feed to primary gear type crankshaft.
8G29	997cc Cooper - Deva bush type primary gear and crankshaft.
8G36	997cc Cooper - Oil feed converted primary gear and crankshaft.
8G33	998cc Cooper - Fitted with 28G193 (12G202) cylinder head.
8G40	998cc Cooper - 28G222 (12G295) cylinder head introduced.
8G42	998cc Cooper - Closed circuit breathing rocker cover and side plates.
8G49	998cc Cooper - Purolator oil filter with oil light switch introduced.
GSE1103E	998cc Cooper - Gold Seal unit, was RKM1120E Silver Seal.
RKM1103E	998cc Cooper - Silver Seal unit.
8G57	998cc - New from 1969 and exchange for all pre-A+ To 1981.
GSE1102E	998cc - Gold Seal unit, was RKM1119E Silver Seal unit, pre-A+ To 1981.
RKM1119E	998cc - Silver Seal unit, replaced by RKM1102E, pre-A+ To 1981.
BHM1232	998cc - Low compression dished piston, CAM6267 camshaft, early cylinder head and crankshaft main bearings with side locator tag, A+.
BHM1377	998cc - High compression flat top piston, CAM4717 camshaft, early cylinder head and crankshaft main bearings with side locator tag, A+.
BHM1458	998cc - Low compression piston, CAM6267 camshaft, late A+ cylinder head and crankshaft main bearings with central locator tag, A+.
BHM1460	998cc - High compression press-fit wrist pin piston, CAM4717 camshaft, late A+ cylinder head and crankshaft main bearings with central locator tag, A+.
LBB10089	998cc - Low compression press-fit wrist pin piston, CAM6267 camshaft, lead free late A+ cylinder head and crankshaft main bearings with central locator tag, A+.
8G156E	1100cc - Clubman, Special and Austin 1100 (AD016).
RKM1150E	1100cc - Silver Seal unit for Clubman and Special.
RKM1151E	1100cc - Silver Seal unit for Clubman and Special.
BHM1042	1100cc - New and Gold Seal units for Clubman and Special, 1974-80.
BHM1229	1100cc - New & Gold Seal units for Clubman & Special, A+ Block, 1980-On.
8G38	970cc - Gold Seal unit, pre closed circuit breathing, Cooper S.
8G41	970cc - Gold Seal unit with closed circuit breathing side plates, Cooper S.
8G46	970cc - Gold Seal unit with oil light switch in filter housing, Cooper S.
8G133	1070cc - Gold Seal unit, pre closed circuit breathing, Cooper S.
8G153	1070cc - Gold Seal unit with closed circuit breathing side plates, Cooper S.
8G145	1275cc - Pre closed circuit breathing unit, Cooper S.
8G154	1275cc - Closed circuit breathing side plates unit, Cooper S.
8G155	1275cc - Oil filter housing with oil pressure light switch, Cooper S.
8G174	1275cc - Fitted with AEG510 camshaft, Cooper S.

38G464	1275cc - Introduced in 1970, most were fitted with EN16 Tuftrided crankshaft.
8G200	1275cc - New and Gold Seal units Clubman 1275GT.
38G527	1275cc - New and Gold Seal units for engine numbers prefixed 12H706, 12H707 and 12H831 for Clubman 1275GT.
RKM1130E	1275cc - Silver seal unit, was RKM1112E, for Clubman 1275GT, pre-A+.
RKM1152E	1275cc - Silver Seal unit for Clubman 1275GT, pre-A+.
RKM1112E	1275cc - Silver Seal unit for Clubman 1275GT, pre-A+.
BHM1220	1275cc - A+ unit for Clubman 1275GT.
8G199E	1275cc - Gold Seal unit with Duplex cam drive gears for 1300GT (AD016) and Innocenti 1300, 11-stud cylinder head.
38G559E	1275cc - Gold Seal unit with Simplex cam drive gears for engine numbers prefixed 12H719 and 12H832, for 1300GT (AD016) and Innocenti 1300, 11-stud cylinder head.
GSE1109E	1275cc - Gold Seal unit for 1300GT (AD016) and Innocenti 1300, 11-stud cylinder head.
RKM1133E	1275cc - Silver Seal unit for 1300GT (AD016) and Innocenti 1300, 11-stud cylinder head.
BHM1209E	1275cc - Gold Seal unit, replaced all Innocenti 1300 engines from engine numbers prefixed 12H610, 12H635 and 12H832.

Note: All engines pre-fixed with 'GSE' or 'RKM' were of UNIPART origin when BL split it's parts organisation.

'E' at the end of a part number denotes it is a reconditioned, service unit only (basic engine assembly with no ancillaries).

'N' at the end of a part number denotes a brand new unit.

Standard Production Crankshaft Identification

Below is a list of crankshaft identification data by forging or stamped numbers - yes, contrary to what many say/express, all cranks are forged. None are cast. They wouldn't last 2 minutes in an engine if they were cast - they'd be way too brittle. The differences are in the material used, finish machining detail and any heat treatments applied.

It is by no means complete and utterly correct/infallible since Austin/Morris, British Leyland, Leyland Cars, Austin Rover, Rover, et al were seriously prone to not adhering to specifications and applications lists. But it is better than nothing at all!

22A62	850cc - Early type with oil feed for primary gear, 1.375" dia. tail.
22A63	850cc - Early type with oil feed for primary gear, 1.375" dia. tail.
22A298	850cc - Early type thin-nose crank, 1.375" dia. tail.
12A670	850cc - Later type with 1.5" dia. tail.
12A298	997cc - Original Cooper crank.
12A375	997cc - Cooper crank with oil feed hole for primary gear.

12A595	998cc - Early EN16T spec.
12A1451	998cc - Later, pre-A+ EN16T spec.
BHM1436	998cc - A+ spec, 1985-On (12A1451 forging).
12G82	1100cc - Standard across the board transverse A-series EN16T spec.
AEG330	970cc - EN40B forged, non-cross drilled.
AEG171	1071cc - EN40B forged, non-cross drilled.
AEG315	1275cc - Cooper S, EN40B forging, Nitrided, 1.625" dia. big ends, non-cross drilled.
AEG316	1275cc - Cooper S, EN40B forging, Nitrided, 1.625" dia. big ends, non-cross drilled.
AEG479	1275cc - Cooper S, EN40B forging, Nitrided, 1.625" dia. big ends, cross drilled.
AEG480	1275cc - Cooper S, EN40B forging, Nitrided, 1.625" dia. big ends, cross drilled.
AEG623	1275cc - Cooper S, EN16T forging, Tufrided, 1.625" dia. big ends.
12G1287	1275cc - Non-S, EN16T with 1.625" dia. big ends.
12G1288	1275cc - Non-S, EN16T with 1.625" dia. big ends.
12G1505	1275cc - Non-S, EN16T with 1.75" dia. big ends.
12G1683	1275cc - 12G1505 forging, non-S, EN16T with 1.75" dia. big ends, Tufrided.
CAM6232*	1275cc - Rolled-fillet radius on bearing journals, A+ with 1.75" dia. big ends.

*Note: This crankshaft was used in all 1275cc, A+, transverse engines including the MG Metro Turbo. There are various unconfirmed opinions on the subject of whether the material was any different, or whether it was heat treated differently. It would appear that early Turbos had just the standard spec, EN16T, non-heat treated type fitted.

Later examples certainly appear to have been heat-treated, probably an up-to-date, emissions-friendly version of 'Tufriding' (a recognised ICI registered process) - possibly a forerunner to Nitro-Carburising. These crankshafts have a distinctly charcoal-grey/black finish - mostly detectable on the webs, water pump/alternator pulley end and in the rolled fillet radii. The later being fairly 'deep' and very even.

Compression ratio is hugely important to an engines performance, work out your compression ratio and the combustion chamber volume you need, make sure the head you are buying - especially if its of the shelf - has the right volume. David Vizards book 'Tuning the a series engine' has invaluable information in it concerning this.

Valve sizes are no guarantee of flow, just because it has big valves does not mean it flows big, take a valve out and look into the port, the guide should be bullet nosed, and is the seat unnecessarily wide, maybe a wide 'pre cut' to the seat? Are the seats cut accurately for height, run your fingers across inlet and exhaust differences - are they the same for all the chambers?

Look down into the ports, is there a raised section around the guide (a boss), all our heads have these removed for full flow is the finish consistent across all the ports, and not highly polished - a polished finish can actually reduce power due to fuel being drawn out of the air, due to surface tension.

Hold a suitable gasket up to the manifold and chamber faces, have the chambers and ports been accurately modified? Usually on cheaply modified heads the ports are flared out to meet the gasket giving the appearance but not performance.

Cylinder Head Casting Numbers

Number	Inlet Dia.	Exhaust Dia.	Nom. cc	Standard fitment
2A628	1.0625"/26.99	1.00"/25.4	24.5	850, 998 Mini & 948 Sprite
2A629	1.0625"/26.99	1.00"/25.4	24.5	948, A35 & Morris Minor
12A1456	1.0625"/26.99	1.00"/25.4	24.5	850, 998 Mini & 948 Sprite
12G202	1.156"/29.36	1.00"/25.4	26.1	997 Cooper, Austin 1100 Mk
CAM4180	1.0625"/26.99	1.00"/25.4	25.5	998 Mini A+ (80 on) & lead free
12G206	1.218"/30.93	1.00"/25.4	28.3	Early 998 Cooper, MG1100
12G295	1.218"/30.93	1.00"/25.4	28.3	998 Cooper, MG1100
12A185	1.401"/35.6	1.22"/31.0	21.4	First Mkl Cooper S
AEG163	1.401"/35.6	1.22"/31.0	21.4	Later Mkl & MkII Cooper S
12G940*	1.312"/33.33	1.15"/29.2	21.4	1275GT, Austin 1300, late A+ model inc. Turbo not MG Metro
12G940	1.401"/35.6	1.15"/29.2	21.4	12G1805 Stamped on flat area by thermostat MG1300, 1300GT & MkIII Cooper S
12G940*	1.401"/35.6	1.15"/29.2	21.4	as above plus MG Metro

*Note: A+ head castings - despite having the same 12G940 casting number - are considerably different in appearance, loosing the flat area behind the thermostat housing and around the rest of the rocker/head stud areas to a sculptured look - where these areas are replaced by a 'sunken' cast finish.

The A+ castings were introduced with the appearance of the Metro in 1980, although some late 1275GTs 1979-On had them fitted. Generally they are easily recognised by their colour - a putrid yellow on the small-bore castings and bright red on the large-bore ones, a paint finish that is VERY difficult to remove, even in a chemical tank. The MG Metro Turbo shares the same valve sizes with the other non-'big valve' 12G940 variants but has 8mm valve stems, sodium-filled exhaust valves.

A+ heads generally have three collet grooves in the valves, collets are 14-degree cone taper instead of the 10-degree on single groove collets (so parts are not interchangeable) and the top-caps have a raised ridge around the collet hole.

Car Identification

Engine Numbers

The engine number is located immediately above the alternator.

Cars Produced Up To 1979

The commission number can be found on a red plate fitted to the bonnet slam panel.

Cars Produced Between 1980-84

In 1980 the use of the vehicle identification numbers was introduced. The V.I.N. plate is located on the left hand fliitch, in front of the radiator.

Cars Produced After 1984

The V.I.N. plate can be found fitted to the right hand fliitch, near the bonnet prop locating bracket.

Engine & Gearbox Oils

Note: Please see our Restoration Tools catalogue or visit our website for our full range of oils and lubricants.

Millers Oils

Millers classic oil range has been specifically developed to protect and enhance the engines of classic vehicles. Millers classic lubricants utilise modern additive technology in period style viscosities to enable the classic vehicle owner to obtain the optimum lubrication for their car.

This Classic TransM 20W50 is a unique oil, formulated for power units where the engine and gearbox share the same oil. A mineral 20W50, containing EP (extreme pressure) additives to protect the gears and bearings in the gearbox. Can also be used in any gearbox where a 20W50 is specified.

GGL4002X	£13.40	TransM, 20W50	1	1 litre
GGL4001X	£45.50	TransM, 20W50	1	5 litre

Penrite Oils

Modern lubricants do not necessarily suit older vehicles, the oils are often too thin, and the additive packages suit today's advanced engineering and materials, not those used in the design and manufacture of your classic. Penrite oils are blended from high quality base stocks, combined with additives selected to give the best performance and reduced oil consumption whilst giving better oil pressure, increased engine protection and reducing the build up of sludge deposits.

Penrite's philosophy of meeting and exceeding original requirements extends across their range of lubricants. Other lubricants and sizes from the Penrite range are available on our website.

Penrite running-in oil is designed to promote and control the bedding-in process of newly built engines. It should be used for the first 300 miles and then replaced with the appropriate grade of HPR oil.

GGL9015X	NCA	RUNNING-IN OIL	1	1 litre
GGL9014X	£34.00	RUNNING-IN OIL	1	5 litre

Penrite Classic (20w/50) engine oil is designed specifically for vehicles from the 1960's and 70's, this 20w/50 multi-grade standards. Like the original 20w/50's of the 1960's, classic 20w/50 is a full-bodied, hard-wearing oil giving excellent film strength under the heaviest loads.

GGL9044X	£33.90	CLASSIC ENGINE OIL, 20w50	1	5 litre

Engine Stabiliser					
The ultimate engine steady kit					
A common problem with Minis is their tendency to destroy engine mounts and steady bar bushes, leading to exhaust down pipe breakage. This is the best engine steady kit available. It mounts neatly on the top two bolts of the water pump and on to the bulkhead. It has an adjustable tie rod with rubber bushes, but can be uprated with one piece SuperPro bush. Suitable for all models including LHD cars.

18	22A1155	£2.83	LOCKTAB, flywheel bolt	1	

Verto Clutches

Note: Verto manufactured clutches were first used on the Metro range in 1983, to counter problems with clutch judder and reliability. They were built as an assembly and dynamically balanced to reduce these problems.

Although it is possible to purchase component parts, we only offer the assembly as it promises less maintenance and reduces the risk of a juddering clutch.

20	GCK149AF	£142.00	CLUTCH ASSEMBLY, inertia starter	1	998cc

29	GHF323	£0.16	WASHER, cover fixing	6	
30	88G302	£5.30	BEARING, idler gear	1	1959-68, 3 synchro gearbox
			(1.004" ext. dia.)		
	13H7848	£8.20	BEARING, idler gear	1	1968-79, 4 synchro gearbox
			(1.065" ext. dia., 0.750" int. dia.)		
	AHU1707	£12.00	BEARING, idler gear	1	1979 on, 4 synchro gearbox
			(1.375" ext. dia., 0.875" int. dia.)		
	DAM3745	£25.00	BEARING, idler gear with sleeve	1] Pre A+ inner diameter with A+ outer diameter.
			(1.375" ext. dia., 0.750" int. dia.)		

Note: For 3 synchro gearbox models (1959-68) none of the 4 synchro flywheel housings can be used. When fitting an A series idler gear to A+ housing, use DAM3745 which has a special sleeve. DAM3745 has a pre A+ inner diameter and A+ outer diameter, meaning you can use the larger A+ housing with a smaller pre A+ idler gear.

If you are unsure what is original for your car, you can check the size required by measuring the bearing location in the flywheel housing (to get the external diameter for the idler bearing) and measure the idler gear shaft diameter (to get the internal diameter required). This should give you the size of bearing required to suit your needs.

59	CLZ518	£1.50	CLEVIS PIN	1	
60	2A3601	£5.12	SPRING PLATE, lever end	1	
61	GHF301	£0.14	WASHER	1	
62	GHF502	£0.16	SPLIT PIN	1	
63	1G5999	£1.86	SPRING, clutch arm return	1	
64	2A3600	NCA	SPRING PLATE, slave cylinder end	1	
65	18G8086	NCA	LOCK TAB SET	1	
(This set contains all lock tabs required for re-assembly of the flywheel housing, on later cars shouldered bolts are used instead of studs, these replace the lock tabs as they are self locking).					

Note: Whenever work has been carried out on the clutch assembly or the flywheel has been removed, its good practice to have the assembly balanced again before it's reinstalled. This will help achieve a smoother running engine. An out of balance flywheel can cause a great deal of damage and shorten the life of the engine.

Reconditioned Gearboxes

Reconditioned gearboxes are a great way to rectify problems with the Minis bottom end. Not everyone is able to strip down a Mini gearbox and rebuild it themselves as the procedure is quite complex.

Common problems with the Minis gearboxes are jumping out of gears when driven or stiffness selecting gears or crunching gears when selected. Some of these issues can be caused by bulk rings being badly worn or teeth on the gears being worn or missing. All these problems require the engine and gearbox to be removed from the in order to be rectified. Our reconditioned gearboxes are a great way to keep your Mini on the road where it belongs.

Please note you will need to retain the speedo pinion from your old gearbox and ensure you ask for the correct differential ratio! This is so your speedo reads correctly after fitting a reconditioned gearbox.

1	MT2101	£503.20	GEARBOX, reconditioned, (exchange)	1	rod type
2	MT2102	£480.70	GEARBOX, reconditioned, (exchange)	1	remote type

Engine & Gearbox Oils

Note: Please see our Restoration Tools catalogue or visit our website for our full range of oils and lubricants.

Millers Oils

Millers classic oil range has been specifically developed to protect and enhance the engines of classic vehicles. Millers classic lubricants utilise modern additive technology in period style viscosities to enable the classic vehicle owner to obtain the optimum lubrication for their car. This Classic TransM 20w50 is a unique oil, formulated for power units where the engine and gearbox share the same oil. A mineral 20w50, containing EP (extreme pressure) additives to protect the gears and bearings in the gearbox. Can also be used in any gearbox where a 20w50 is specified.

ill.	Part Number	Price £ea.	Description	Req.	Details
------	-------------	------------	-------------	------	---------

GGL4002X	£13.40	TransM, 20w50	1	1 litre
GGL4001X	£45.50	TransM, 20w50	1	5 litre

Penrite Oils

Modern lubricants do not necessarily suit older vehicles, the oils are often too thin, and the additive packages suit today's advanced engineering and materials, not those used in the design and manufacture of your classic. Penrite oils are blended from high quality base stocks, combined with additives selected to give the best performance and reduced oil consumption whilst giving better oil pressure, increased engine protection and reducing the build up of sludge deposits. Penrite's philosophy of meeting and exceeding original requirements extends across their range of lubricants. Other lubricants and sizes from the Penrite range are available on our website.

Penrite running-in oil is designed to promote and control the bedding-in process of newly built engines. It should be used for the first 300 miles and then replaced with the appropriate grade of HPR oil.

GGL9015X	NCA	RUNNING-IN OIL	1	1 litre
GGL9014X	£34.00	RUNNING-IN OIL	1	5 litre

Penrite Classic (20w/50) engine oil is designed specifically for vehicles from the 1960's and 70's, this 20w/50 multi-grade standards. Like the original 20w/50's of the 1960's, classic 20w/50 is a full-bodied, hard-wearing oil giving excellent film strength under the heaviest loads.

GGL9044X	£33.90	CLASSIC ENGINE OIL, 20w50	1	5 litre

Brake Master Cylinders

Type A: Single Line System

1	GMC153	£126.23	MASTER CYLINDER, brake, 0.75" bore (Aftermarket with plastic reservoir).	1	drum brakes 1959-62; Coopers with servo 1961-62
	GMC171	£69.70	MASTER CYLINDER, brake, 0.7" bore (Original type with round metal 60mm high reservoir. Use DOT4/5 fluid only).	1	drum brakes 1962-75; replacement for original GMC105
	GMC171Z	£47.80	MASTER CYLINDER, brake, 0.7" bore (Aftermarket with plastic reservoir).	1	Coopers without servo
	GMC172	£74.90	MASTER CYLINDER, brake, 0.7" bore (Original type with round metal 75mm high reservoir. Use DOT4/5 fluid only).	1	disc brake Coopers & 1275GT 1963-75
2	GRK1026	£7.30	REPAIR KIT, 0.75" bore master cyl. (With one end cap seal one ring seal on piston).	1	GMC153 type

Note: Before ordering a seal kit for a 0.7" master cylinder, please check which type of piston seals are used in your master cylinder. The master cylinder manufacturer changed the specification of the piston seals; early pistons used one cap seal (located on the end of the piston) & one ring seal. Later master cylinders have two ring seals.

	GRK1028	£11.00	REPAIR KIT, 0.7" bore master cyl. (With one end cap seal one ring seal on piston).	1	for 0.7" bore cylinders GMC171 and GMC172 type
	GRK1028Z	£5.30	REPAIR KIT, 0.7" bore master cyl. (Aftermarket, with one end cap seal one ring seal on piston).	1	
	GRK1006Z	£3.19	REPAIR KIT, 0.7" bore master cyl. (with two ring seals).	1	
	513123A	£3.60	CAP	1	all cylinders

Type B: Front To Rear Split System

3	GMC159	NCA	BRAKE MASTER CYLINDER	1	round plastic reservoir
2	GRK1019	NCA	REPAIR KIT	1	
	GRK1019Z	£26.00	REPAIR KIT	1	
	AAU3815	£10.90	CAP	1	

Type C: Diagonal Split System

3	GMC160	NCA	BRAKE MASTER CYLINDER	1	round plastic reservoir
2	GRK1019	NCA	REPAIR KIT	1	

ill. Part Number Price £ea. Description Req. Details

	GRK1019Z	£26.00	REPAIR KIT	1	
	AAU3815	£10.90	CAP	1	

Type D: Diagonal Split System

4	GMC167	NCA	BRAKE MASTER CYLINDER	1	square plastic reservoir
2	GRK1002	£34.30	REPAIR KIT	1	
	GRK1002Z	£8.30	REPAIR KIT, aftermarket	1	
	GRK907014	NCA	CAP	1	

Type E: Front To Rear Split System

5	GMC227	£106.60	BRAKE MASTER CYLINDER	1	square plastic reservoir
2	GRK1035	£44.70	REPAIR KIT	1	
	AEU1796	NCA	CAP, with failure switch	1	

Note: Between 1980 and 1985 the Mini had 4 different types of master cylinder fitted, these being part numbered GMC173 and GMC198 having a pressure failure switch fitted to the body of the cylinder and GMC192 and GMC195 with a fluid level switch fitted to the cap, all these cylinders are superseded by GMC227.

As the cylinder is manufactured with metric fittings the conversion pipes must be used in conjunction with GMC227 when replacing an original master cylinder. Although it is possible to rebuild the original master cylinder with a repair kit.

	BAU5654	£37.30	PIPE CONVERSION KIT	1	RHD
	BAU5655	£20.00	PIPE CONVERSION KIT	1	LHD

All Models

6	14A6733	£15.50	BRACKET, engine stabiliser	1	fitted under brake and clutch master cylinders
7	31G279	£1.91	GASKET, single line master cylinder	1	
	31G840	£2.00	GASKET, dual master cylinder	1	
8	FNZ505	£0.56	NUT, master cylinder to bracket	2	
9	GHF332	£0.22	WASHER, locking	2	
10	CLZ512	£1.46	CLEVIS PIN, pedal to push rod	1	
11	GHF502	£0.16	SPLIT PIN	1	

ill.	Part Number	Price £ea.	Description	Req.	Details
Front To Rear Split System With Direct Acting Servo					
1	GMC90376	£109.00	BRAKE MASTER CYLINDER*	1	metric fittings 1989-On

*Note: The early direct acting brake master cylinder is no longer available, it has been superseded by the later version GMC90736, which has metric threads. Please check your pipe work carefully before fitting. A rebuild kit is available for GMC242, see GRK1032 below.

2	GRK1032	£18.00	REPAIR KIT	1	
	GRK1032Z	£16.80	REPAIR KIT, aftermarket	1	
3	GRK6009	£16.30	CAP, with float switch	1	
4	GSM119	£127.90	SERVO UNIT (Direct-acting attached to master cylinder).	1	1989-On
5	GSM120	NCA	REPAIR KIT	1	
6	NAM8568	NCA	VACUUM HOSE, with return valve	1	
7	NAM8540	NCA	CLEVIS PIN, bell crank	2	

ill.	Part Number	Price £ea.	Description	Req.	Details
8	511032	£0.79	SPLIT PIN	1	
9	2A715	£21.10	BANJO BOLT, brake servo	1	
	ADP210	£6.24	PLUG, manifold blanking	1	if servo take-off not required
10	AED172	£0.98	WASHER	a/r	use 2 washers with banjo bolt

Remote Servo Kit

Note: This servo kit fits all single line brake systems.

11	TT3949	£187.20	SERVO KIT, remote	1	lockheed
	TT3949Z	£95.50	SERVO KIT, remote	1	aftermarket
	18G8938	£53.90	REPAIR KIT, servo	1	for TT3949

Note: As MkIII S TT3949 can be used as conversion on Minis, comes as complete kit. Fitting a remote servo means less effort required when braking.

29	BAU1704A	£10.40	REPAIR KIT, failure switch	1	

Brake and Clutch Fluids

When Did You Last Change Your Brake Fluid?

DOT3 fluid ought to be completely discarded, DOT4 ('GBF4') should be installed and replaced every 2 years, as recommended by manufacturers. An alternative, especially if you are replacing master cylinders, brake calipers and/or wheel cylinders, is to thoroughly flush out the pipes and install Silicone fluid (DOT5 'ABF'), which is 'Non-Hygroscopic', so it doesn't promote rust problems in the hydraulic system. The bonus is that it won't damage paint work. When silicone is in use it will provide years of trouble free braking and an end to the monotonous and expensive pastime of repairing or replacing worn or leaking hydraulic components. Racing Fluid (DOT5.1 'GBF5') really is the ultimate in brake fluid. Its anti-boil properties mean that even when the brakes get hot the fluid will remain efficient, rather than boiling locally (such as in the calipers) into useless vapour. Ideal on the race track or when the brakes are used to their limits. Due to its high 'Hygroscopic' nature, DOT5.1 Racing fluid should be replaced annually otherwise the quality and effectiveness will be drastically reduced.

GBF4102	£5.57	BRAKE/CLUTCH FLUID, DOT4	a/r	500ml
GBF4103	£11.10	BRAKE/CLUTCH FLUID, DOT4	a/r	1 litre
GBF4104	£43.30	BRAKE/CLUTCH FLUID, DOT4	a/r	5 litre
ABF3	£19.80	BRAKE/CLUTCH FLUID, DOT5	a/r	silicone 500ml
ABF4	£33.10	BRAKE/CLUTCH FLUID, DOT5	a/r	silicone 1 litre
GBF5102	£7.90	BRAKE/CLUTCH FLUID, DOT5.1	a/r	racing 500ml
GBF5103	£14.80	BRAKE/CLUTCH FLUID, DOT5.1	a/r	racing 1 litre

Note: When bleeding the Minis brake system always start with the cylinder furthest away from the master cylinder, so for a RHD car this would mean start with the passenger side rear then the drivers side, keep the car as high as possible on the cylinder you are bleeding! Always use axle stands when working under your car, they may be little but they are still quite heavy, Safety first.

5	XPE100420PMP	£75.10	SWITCH, wipers, RH side	1	1996-On mpi

Note: For manual washer pump fitted prior to 1976 please see windscreen wiper system section.

Note: Between 1976 & 1984 BL Cars bought switches from both Lucas and Bonnella. Only Lucas switches are currently supplied, so when replacing a Bonnella switch both Lucas switches must be purchased as the two makes are not compatible. To quickly identify which is fitted to your car, Lucas type wash/wipe is fitted to the indicator switch by a hex-headed self tapping screw whereas the Bonnella type is riveted.

MkII on Models

There were several manufacturers of rear lamps during Mini production; Altissimo and Lucas/Carello. The Lucas/Carello type can be identified by the 'posts' which accept the lens retaining screws. Lucas/Carello are the most common type and are the type that are currently available.

British Motor Heritage Certificate of Authenticity

When you purchase a BMH bodyshell from Moss Europe, you will receive a Certificate of Authenticity from British Motor Heritage. Confirming: BMH manufacture, date of purchase, body style and number.

ill.	Part Number	Price £ea.	Description	Req.	Details
------	-------------	------------	-------------	------	---------

British Motor Heritage Bodyshells

If your car needs major bodywork repairs a new bodyshell may be the best option. The cost is less than you think, by the time you add in the labour cost of fitting body parts it may well be the cheapest option.

British Motor Heritage bodyshells are built using the original assembly jigs. Long life is ensured by the use of zinc coated steel in rust prone areas, the shells are finished in motor industry standard black electrocoat. The shells are completely immersed in an electrically charged tank of anodic etch primer. This ensures the best possible coverage and paint ingress into all area of the body. The bodyshells listed below come with doors, bonnet and bootlid, they are also available without these bolt-ons please contact your branch for details.

Bodyshell policy

- 1. Bodyshells are purchased with a 30% deposit as a special order item and customers must pay all delivery charges.
- 2. When bodyshells are received, the customer will be notified and delivery will take place within 14-21 days.
- 3. There will be storage charge (call) per day drawn from the deposit beginning on the 22nd day following notification if the customer is unable to take delivery.
- 4. If delivery is not taken within 30 days, the remaining deposit money will be returned to the customer and the order cancelled.

Clubman bodyshell

The Heritage Clubman bodyshell is a direct replacement for 1976 on Clubman models with rubber mounted subframes. It can be used for earlier cars with some modifications, 1972-76 cars will need the subframes replacing with the rubber mounted versions,

ill.	Part Number	Price £ea.	Description	Req.	Details
------	-------------	------------	-------------	------	---------

1969-72 models had a different gear shift mechanism that will need some modifications to the bodyshell.

1	CZH594	£8050.00	BODYSHELL, Clubman	1	
---	--------	----------	--------------------	---	--

MkIV bodyshell

The MkIV bodyshell is suitable for all models 1976 to 1989 with rod change and rubber mounted subframes. As with the Clubman shell this can be fitted to 1972-76 models by changing to rubber mounted subframes. For earlier models more modifications will be necessary.

The bodyshell comes with front wings without repeater holes, roof without aerial holes, slatted inner wing for side mounted radiators and the MkIV grille panel. The dashboard bulkhead panel includes the large 'rotodip' aperture making access to the centre binnacle easier. Rear seatbelt mountings are fitted and front seatbelt mountings are in the pre-1977 locations. Doors supplied with side impact bars fitted.

2	BMP343	£6392.00	BODYSHELL, MkIV	1	
---	--------	----------	-----------------	---	--

The MkIV throttle body injection (TBI) shell is most suitable for MkIV 1990-1996 models. This bodyshell has the large round hole in the inner wing for the cooling fan.

2	AAA36002	£7750.00	£7750.00	1	
---	----------	----------	----------	---	--

MkV bodyshell

These bodyshells are for cars produced from 1997 onwards, available to either standard or Sports Pack specification. Latest specification brackets for airbag sensor, alarm and boot mounted washer bottle are not included. Compatible with front mounted radiators.

3	AAA360200	£7750.00	BODYSHELL, MkV, standard	1	
	AAA360210	£7750.00	BODYSHELL, MkV, Sports-Pack	1

Saloon, Van & Pickup Models					
1	HMP441046	£337.90	REAR PANEL, complete	1	Mkl rear lamps
	HMP441022	£299.10	REAR PANEL, complete	1	1967-89
	ALA6417	£299.00	REAR PANEL, complete	1	with alarm bracket 1990 on
<p>Note: The rear panel HMP441046 from BMH is supplied complete with Mkl lamp and bootlid apertures. However, the rear window aperture is only for models from 1967 (MkII) on, when the screen changed to a larger one. The complete rear panel is not available with the original Mkl size rear window aperture as the pressing is made from MkII tooling. If you have a Mkl this panel can be used as a repair section and cut to suit individual requirements.</p>

MkI 1959-65

MkII 1966-On

ill. Part Number Price £ea. Description Req. Details

Door Handles & Locks

There are two different types of door handles for the early MkI-II door. The early type, 1959-65, was a standard door handle whereas from 1966 onwards a safety boss (to stop people catching themselves on the early handle) was fitted to the door skin, under the end of the handle. This meant a shorter door handle was made to allow fitment for the boss. Originally only one lock was fitted to these cars, the exterior handle on the driver's side and the interior passenger side. In the inside of the car, the reverse was the case, with the passenger's lock assembly incorporating a safety catch and the driver's side lock assembly not. All door handles we now supply are of the locking type.

Door Handles & Seals

MkI, 1959 - 1965

1	24A1140P	NCA	HANDLE SET, doors only	1	2 piece, with keys

Windscreen Tool

This is the best tool for fitting windscreens and insert strips. Supplied with a variety of hooks and eyes to allow easy fitting of the screen and rubber or plastic insert. Not suitable for metal inserts. Tech tip don't rush this job! Use a little washing up liquid to lubricate the tool and seals.

Carpets Sets

Minis can get very noisy when driving at speed, our carpet sets are made with this in mind. The front sections of carpet feature 12mm thick sections of sound deadening laminated to the carpet backing to keep the sound levels as low as possible. Carpet set includes all fittings.

CSA9000X	£220.00	CARPET SET, black	1	
CSR9000X	£219.30	CARPET SET, red	1	
CSF9000X	£220.00	CARPET SET, grey	1	

These moulded carpet sets are produced by the original manufacturer. They do not have sound deadening backing material, however, we offer a sound deadening kit made of the same material as fitted to the carpet sets listed above. See Sound Insulation listed below.

CSA9002X	£220.00	CARPET SET, black	1	To 1973
CSA9002Z	£40.00	CARPET SET, black	1	budget type, beaded edge
CSF9002X	£220.00	CARPET SET, grey	1	To 1973
CSF9002Z	£57.60	CARPET SET, grey	1	budget type, beaded edge
CSN9001Z	£43.70	CARPET SET, blue	1	budget type, beaded edge
CSR9002X	£219.30	CARPET SET, red	1	To 1973
CSR9002Z	£40.00	CARPET SET, red	1	budget type, beaded edge
610624	£0.30	FASTENER, fitted to floor	4	
GHF600	£0.11	RIVET, for 610624	4	
2H8445	£0.31	CLIP, carpet to floor	4	
14G8736	£0.22	RING, spiked, through carpet	4	

Sound Insulation Kits

Keeping the volume of noise in your Mini down to a minimum can be a problem, any of the products listed below should help to solve the problem.

GAC8417X	£83.64	INSULATION KIT, engine bay	1	bonnet & bulkhead
GAC8429X	£54.06	INSULATION KIT, interior	1	under carpet

Boot Floor Kit

Tidy the boot space with one of these carpeted wood false floor kits. Installed it provides a flat floor tidying the boot area and helping to protect the battery and spare wheel.

BFK9001X	£93.00	FLOOR KIT, 5.5 gallon	1	1974-79
BFK9002X	£93.00	FLOOR KIT, 7.5 gallon	1	1980-On
BFK9004X	£122.40	BRACKET SET, boot floor	1	165 section tyres

ill.	Part Number	Price £ea.	Description	Req.	Details

Dash Panel Kits

DPK9000X	£50.00	DASH PANEL KIT, centre speedo	1	speedo only
DPK9001X	£50.00	DASH PANEL KIT, centre binnacle	1	3 gauge no vents
DPK9002X	£50.00	DASH PANEL KIT, centre binnacle	1	3 gauge with vents
DPK9003X	£76.50	DASH PANEL KIT, offset binnacle	1	2 & 3 gauge, RHD
DPK9004X	£76.50	DASH PANEL KIT, offset binnacle	1	2 & 3 gauge, LHD

Trim Panel Kits

Enhance the interior of your Mini, available in Black, Red or Nimbus (grey). These high quality trim panel kits feature a horizontal seam welded design styled on the original Cooper trim design.

TKF9000X	£420.24	TRIM PANEL KIT, deluxe, grey	1	Mkl & II
TKF9008X	£380.00	TRIM PANEL KIT, standard, grey	1	Mkl & II
TKR9000X	£387.60	TRIM PANEL KIT, deluxe, red	1	Mkl & II
TKA9008X	£380.00	TRIM PANEL KIT, standard, black	1	Mkl & II
TKA9042X	£235.00	TRIM PANEL KIT, black	1	MkIII On
TKR9042X	£235.00	TRIM PANEL KIT, red	1	MkIII On
TKF9042X	£235.00	TRIM PANEL KIT, grey	1	MkIII On
GHF1222	£0.31	CLIP, trim panel to door	a/r	MkIII On
YGA452	£17.30	POCKET, door, plastic	2	MkIII On

Headlining & Sun Visors

Our headlinings feature a ready stitched vinyl replacement main section with all loops stitched in place. The kit also contains a pair of rear pillar covers in matching material.

HLK3000C	£153.00	HEADLINING KIT, cream crackle	1	Mkl
		(Inc: Both rear C post material panels, shape rods not included).		
PAM5401LNG	£209.20	HEADLINING KIT, grey	1	MkIII On
		(Inc: Both rear C post material panels, shape rods not included).		
HLK3012P	£153.00	HEADLINING KIT, light grey	1	
HLK3012W	£153.00	HEADLINING KIT, white	1	
EEB100060	£17.20	HEADLINING RAIL	1	number 1
EEB100070	£17.20	HEADLINING RAIL	2	number 2 and 3

EEB100090	£16.50	HEADLINING RAIL	1	number 5
EEB100100	£17.20	HEADLINING RAIL	1	number 6
YGX4173LNG	NCA	SUN VISOR, light grey	1	
GAC8465X	£49.98	VISOR, black	1	no mirror
GAC8466X	£61.20	VISOR, black	1	with mirror

Parcel Shelf Kits

DPK9010X	£49.99	DASH LINER KIT, parcel shelf	1	central binnacle
DPK9010CARDS	£45.90	DASH LINER SUPPORTS	1	

Trim Adhesive

UBS110	£20.30	ADHESIVE, 0.5 litre	a/r	
UBS203	£8.30	ADHESIVE, 370g aerosol	a/r	

Miscellaneous

EEP11Z	£12.12	AERIAL, stainless steel	1	
GAC7999X	£11.30	HEADLAMP EYEBROWS, chrome	1	pair
KRH10003	£71.40	SUMPGUARD, Cooper	1	
EBF100150	£39.50	LOAD LINER, boot	1	
24A1169	£13.70	FINISHER, rear pocket	2	Mkl & II
24A1538	£13.00	ASHTRAY, flat lid	1	
8D2490	£14.60	ASHTRAY, slotted lid	1	
MT9301	£8.90	AIR VENT COVERS, chrome	1	
		(Includes vent surrounds and adjuster knob covers).		
105-467	NCA	CARBON FIBRE SHEET	1	
GAC8418X	£47.20	TOOL BAG, black hardura	1	
GAC8419X	£38.50	JACK BAG, black hardura	1	

Hardware and Fixings

Following is a listing of the common fasteners used on BL cars. These fasteners are for general use and are not intended to replace those listed for specific applications elsewhere in this catalogue.

To aid identification by terminology, a screw is threaded for its full length. A bolt is only part threaded with a plain unthreaded shank area between the head and the thread. The part number two letter prefix of SH means that the item is a Screw with a Hexagon head. The prefix BH means a Bolt with a Hexagon head. The first number defines the thread type, UNF = 6, UNC = 5. The second and third numbers give the thread diameter in increments of 1/16", e.g. 04 = 1/4", 05 = 5/16", 10 = 5/8". The fourth and fifth digits show the length in increments of 1/8", e.g. 04 = 1/2", 16 = 2", 23 = 2 7/8". The last digit defines finish, 1 = zinc plated. This coding system is only applicable to bolts and screws; nuts & washers are coded by a similar system that follows some of the above principles.

Captive Nuts

Captive nuts consist of a square nut and cage which we supply individually as required. Always match nut and cage A.F. sizes.

Part Number	Description	Thread Size
NQ2707	Nut, 7/16" AF	1/4"
NQ2708	Nut, 5/8" AF	5/16"
CN4	Nut, fits CN3 cage	1/4"
CN5	Nut, /2" AF	5/16"

Part Number	Description	Spanner Size (AF)
CN2	Cage, square	7/16"
CN3	Cage, oblong	7/16"
600032	Cage, square	1/2"

Studs

A stud is a length of round bar threaded at both ends. The length of thread at each end of the stud may vary for specific applications.

Note: The following studs have fine (UNF) threads at one end and course (UNC) at the other.

Part Number	Diameter	Overall Length
TE504081	1/4"	1"
TE504131	1/4"	1 5/8"
53K2171	5/16"	1 1/8"
TE505111	5/16"	1 3/8"
TE505121	5/16"	1 1/2"
TE505131	5/16"	1 5/8"
TE505141	5/16"	1 3/4"
TE505151	5/16"	1 7/8"
