

THE COMPONENTS CATALOGUE

Automotive Parts & Accessories

MOSS

We've had many requests from fellow enthusiasts for a components catalogue, well here is the first edition (we hope you like it). Unlike our Model focused parts & accessories catalogues this catalogue is aimed at those enthusiasts that like to customize their vehicle(s) or are building a special or kit car.

This catalogue contains our range of products by type, showing all the variations of a product. Allowing you to select the right product, that either fits the application or you prefer purely because that's the one you like the look of. It also includes upgrade parts so that you can change the original parts for a modern (and improved) alternative, like upgrading to LED bulbs.

Parts are displayed by specification showing details of: Material, size, thread etc... to help you select the correct part. We are already working on the second edition adding many more parts. If you have any additions that you feel should be included please contact me and I will do what I can to include them. Until then have fun with your project(s)...

Specialist Tools - PIPE WORKING TOOLS

Making Up Brake Pipes

Making up brake and fuel pipes can be a tricky job. Getting tight radii curves into the pipes without the proper tools can lead to kinking of the pipes. Our range of pipe work tools ensures a quality finish without damage. A full range of pipes & fittings are available, please see moss-europe.co.uk

Control Cables

The correct length and type of control cables aid driver interaction and improve car feel and driveability. Most cables can be carefully cut down if your required length is not available. When selecting a cable please ensure you allow enough length for engine movement. Cables feature a spiral metal outer cable, some are supplied with a black plastic cover. Inner cables are either solid or multi-strand depending on application. Use multi-strand inner cables for pull controls where a return spring is also used. Use a solid inner cable for push/pull controls.

...designed for serious cooling

OEM QUALITY FANS

Revotec OEM quality fan assemblies are designed for serious cooling. Available in various diameters from 167 to 385mm or as part of a bespoke kit, designed for specific models. These fans are a great way to control the temperature of your car's engine.

- High performance
- OEM quality
- Full bearing motors
- Low noise
- Light weight
- Versatile installation
- Low profile
- Finger guard

FAN ASSEMBLIES

Keeping your engine running at optimum temperature will ensure you get the best performance and economy. Revotec fan assemblies are designed to run continuously with no loss of performance or reliability. The high quality motor features bearings rather than bushes; the cases are fully waterproof with finger guards for safety.

UNIVERSAL FANS

Available in a choice of either suction (mounted behind radiator) or blowing (mounted in front of radiator), with a range of fan sizes, and either a slim-line or high power motor specification. The fans can be mounted in a variety of ways. Universal brackets are available to suit the various fan sizes and can be adapted to suit the application. We recommend installing the fan with a Revotec electronic temperature controller.

BESPOKE FAN KITS

Revotec and Moss Europe have co-designed high quality bespoke fan kits for Classic Mini, MG, Triumph and Morris Minor models. Designed specifically to fit each model fitting is quick and straight forward with no permanent modifications.

Using the latest high efficiency fans with adjustable electronic controllers these kits are designed to replace the standard original mechanical fan, reducing the load on the engine, noise and improving both power and mpg.

Unlike other fan kits that use a universal mounting system, these Revotec kits have bespoke laser cut brackets that mount directly to the radiator mountings. The brackets are bright passivated to give a smart appearance and prevent corrosion. The kits also use a precise electronic controller to enable easy adjustment to suit your car.

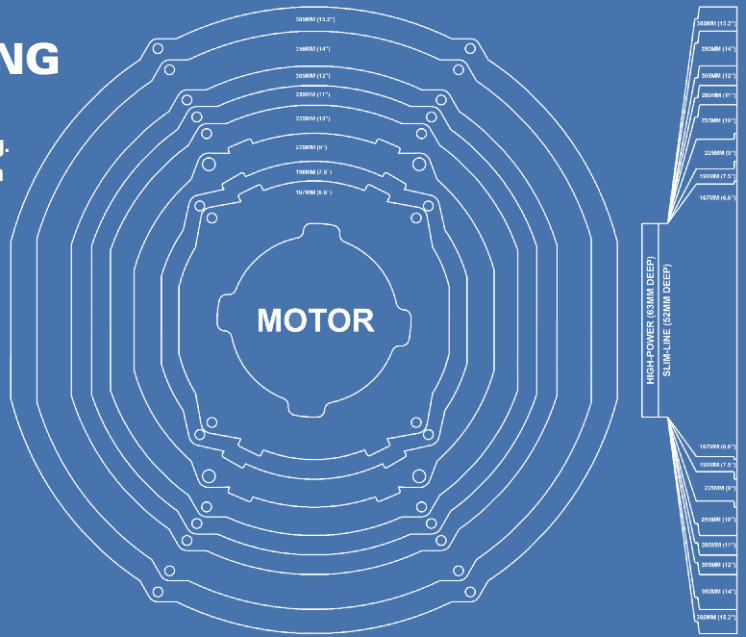

The model kits include:

- High efficiency fan assembly
- Electronic controller with special top hose
- Bespoke passivated brackets for corrosion resistance
- Hardware & wiring Fitting instructions

DESIGNED FOR SERIOUS COOLING

Revotec OEM quality fan assemblies are designed for serious cooling. Available in various diameters from 167 to 385mm. These fans are a great way to control the temperature of your car's engine.

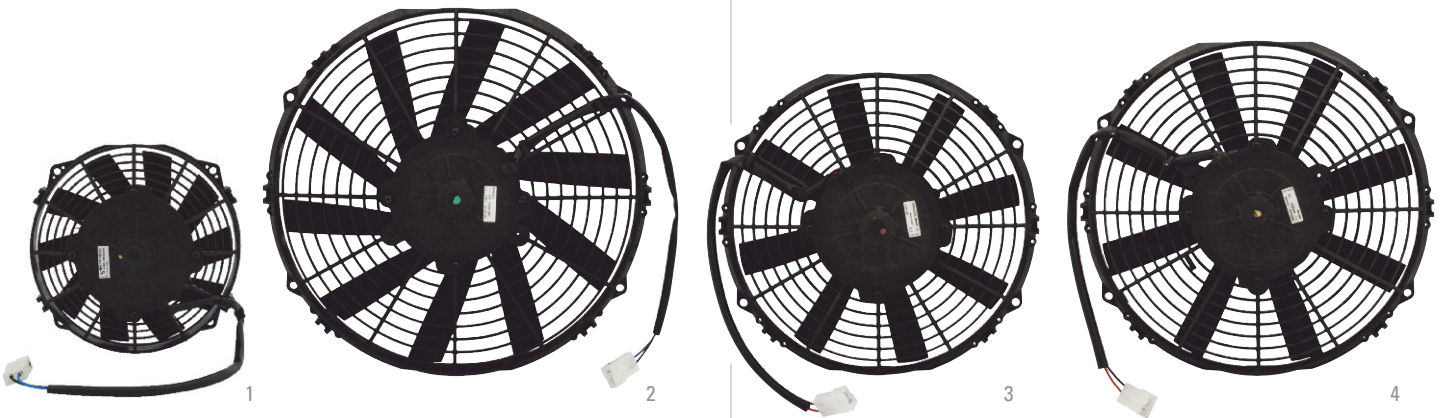

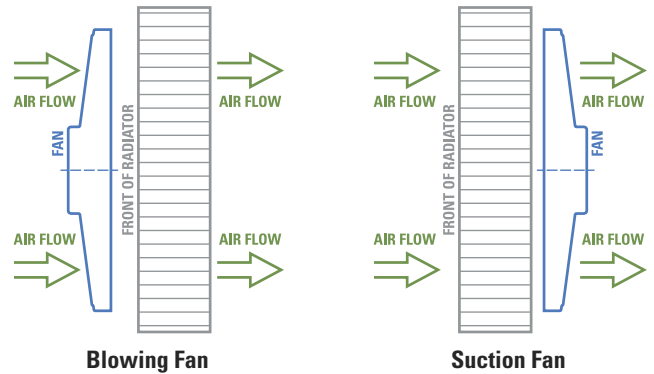

- High performance • OEM quality • Full bearing motors
- Low noise • Light weight • Versatile installation
- Low profile (high power = 63mm) • Finger guard

Heat Insulation Products - INSULATION PRODUCTS

Thermo-Tec Exhaust Wrap

Wrapping a tubular manifold will keep engine bay heat to a minimum, reducing engine bay temperatures by up to 70%. This will benefit power in two ways; firstly it will reduce the temperature of the air going into the engine; secondly, it improves the effectiveness of the manifold by increasing gas speed due to lower gas density, which increases the scavenging effect. This race proven, asbestos free, product from Thermo-Tec is manufactured from Silica based yarns and is unaffected by oil or water, whilst withstand temperatures of up to 1000°C. As a guide to coverage a 2" x 50' roll will cover approximately 13 ft of 2" pipe. Use Snap Straps to hold the wrap in position.

Wire Wheel Hub Adaptors

Hub adaptors can be used to convert to knock-on wire wheels. They mount to the hub face using existing wheel studs. Care must be taken to select the correct wheel. Special wheel nuts are required to retain the hub adaptors.

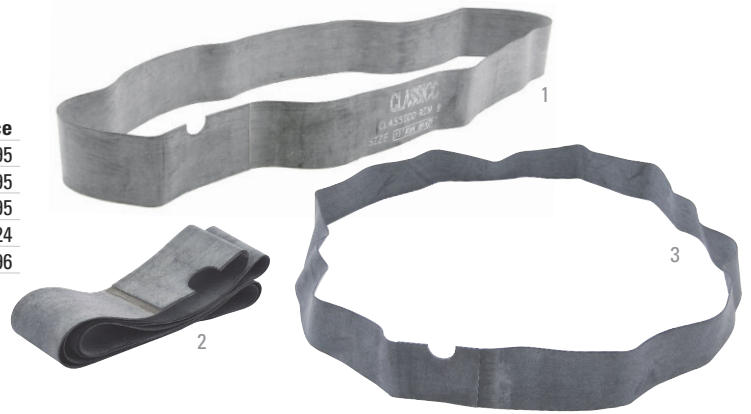

ID No.	Thread	Hand	Stud Pattern	Stud Thread	Part No	Price

Rim Bands

Creating an air tight seal on a wire wheel can be tricky. Use a rim band to prevent the inner tube from chaffing against the spoke nipples.

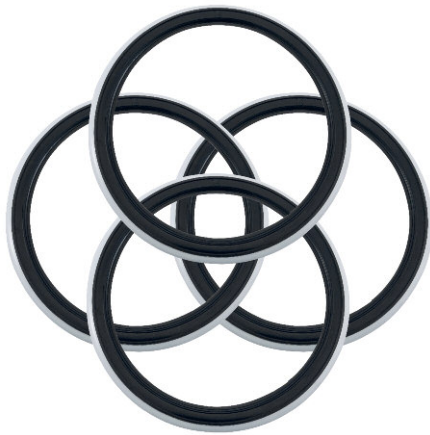

ID No.	Description	Fitting	Part No	Price
1	Rim Band	13" Wheel	452-730	£9.95
	Rim Band	14" Wheel	452-740	£9.95

2	Rim Band	16" Wheel	452-770	£5.24
3	Rim Band	19" Wheel	452-760	£13.96

Inner Tubes

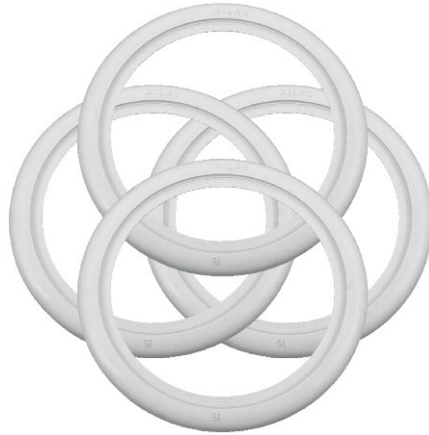

Using the correct size of inner tubes will reduce tube failures and heat build up in the tyre.

Exterior - MIRRORS

Mirrors

Mirrors can transform the appearance of a car whilst improving rearward vision and safety. One major safety feature is the use of a convex lens, this shows a wider view of whats behind you and can help to catch those objects in your blind spot.

Offered in a vast range of styles and finishes for installation on wings, door and screen frame for permanent or clamp-on fitting.

Seat Belts & Harnesses

Fitting and using high quality and well maintained seat belts or harnesses is essential to the safety of yourself and your passengers. In an accident, seat belts are designed to stretch to absorb the energy from your body, once this has happened they will not return to their original length and will need replacing. Any worn, aged or frayed areas of the belt webbing or mechanism could cause the belt to fail.

Seat Belts & Harnesses - SEAT HARNESSSES

Seat Harness - Road Use

This range of Securon harness kits are suitable for road use and off road events, such as track days etc (check event regulations). These harnesses are E marked and legal for road use in the UK.

Type A: This 3 point harness feature 2" webbing with bolt through plate mountings (use with bolts TT7969). Fully adjustable lap and shoulder straps with a buckle catch.

Type B: This 4 point harness feature 2" webbing with bolt through plate mountings (use with bolts TT7969). Fully adjustable lap and shoulder straps with a buckle catch.

Type C: This 3 point harness feature 2" webbing with clip-in snap hook mountings (use with eye bolts TT7967). Fully adjustable lap and shoulder straps with load spreaders on lap belts and a buckle catch.

Type D: This 4 point harness feature 2" webbing with clip-in snap hook mountings (use with eye bolts TT7967). Fully adjustable lap and shoulder straps with load spreaders on lap belts and a buckle catch.

Please Note: Bolts (Part No TT7969) and eye bolts (Part No: TT7967) require the use of special reinforced nuts (Part No: TT7968).

Dynamat Noise and heat insulation products

Dynamat Xtreme

A highly efficient, composite material designed to reduce noise & vibration through panelwork. It is made from butyl rubber with an aluminium foil layer and a self adhesive backing. The vibration and noise damping qualities make your car feel solid & create a luxury car feel; doors close with a reassuring clunk and no tinny rattles.

Road noise is also reduced so cruising is a more relaxed experience. Recommended usage: Use on interior panelwork. Idea for floor pans, bulkheads, inner wings, inside roof panels & hard tops, doors, bonnet & boot lid. A minimum coverage of 30% panel area, centrally positioned, is recommended to reduce panel vibration and noise.

Dynaliner

Dynaliner is an ultra-light weight, durable single layer insulation material that can be used as an alternative to traditional underfelt. It provides acoustic isolation and excellent thermal insulation. Dynaliner is also crush & tear resistant, it does not absorb water and is not affected by oil. It is available in a variety of thicknesses to suit the application.

Recommended usage: Use over the top of Dynamat Xtreme or Superlite but under carpets & behind trim. Ideal for floor pans, bulkheads, inner wings, inside roof panels & hard tops, doors, bonnet & boot lid. See website for more information.

What is Dynamat?

Dynamat is the leading range of noise and heat insulation products. If your car is too noisy & hot Dynamat products can give your car the quiet, cool quality feel you deserve.

Why Dynamat?

- Deadens panel vibration
- Up to 10 x times more damping than anything else on the market
- Reduces road noise
- Reduces heat soak from engine & exhaust
- Non absorbent materials
- Self adhesive 'peel & stick'
- Easily cut & moulded to fit
- Long lasting & superb adhesion

How Much Dynamat?

Calculate the area of the vehicle you want to cover...

100% COVERAGE - Full coverage for the best results...

If the car is stripped out this is a great time to go for 100% coverage.

50% COVERAGE - Great sound & heat insulation...

Cover 50% of your car's interior panelwork giving you a cooler & quieter car...

30% COVERAGE - Significant reduction in noise...

Cover 30% of the panel's area with a centrally positioned piece of Dynamat to significantly reduce noise...

Where should I use Dynamat?

There are 2 Steps to a quieter, cooler, better feeling great car...

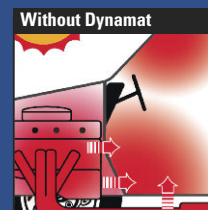

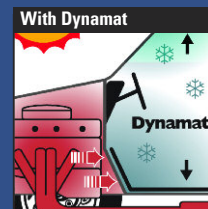

Combine Dynamat with Dynaliner and you get a the benefits of both products.

Step 1

Dynamat - deaden the noise
Apply Dynamat to all the accessible interior panels of your car. Dynamat is best for noise reduction with some heat reduction... Start with firewall/bulkheads, gearbox tunnel, front floors, doors, rear floors, roofs, wheel arches, under bonnet, boot lid.

Step 2

Dynaliner - insulate against heat
Apply Dynaliner over the top of Dynamat to reduce heat soak by up to 70%. Also helps with noise reduction.

EVANS WATERLESS COOLANT

Protect your investment and provide lifetime cooling!

Evans waterless engine coolant is a unique and revolutionary engine coolant fluid formulated to improve efficiency and reduce corrosion of your car's cooling system, protecting your cherished classic.

It neither contains water nor requires mixing with water, overcoming the limitations associated with using water in engine cooling systems, such as boiling and corrosion. Evans offer a full range of coolant to suit vintage, classic and modern car cooling systems, telephone or visit moss-europe.co.uk

Oil System - OIL COOLERS

Oil Thermostat

The standard oil thermostat has easy push fit connections for original rubber hoses and is supplied with hose clips. Its function is to seal off the radiator completely from oil flow until 74°C is reached. The full flow system allows oil to pressurise the oil radiator at all times, but restricts the oil to by-pass through the thermostat until 74°C is reached.

Oil Catch Tank

An oil catch tank is a must for track or competition use to prevent oil spillage on the track and oil vapour settling around the engine bay. Designed to be connected to the crankcase ventilation system, catching the oil vapour, allowing the air to vent through the special cap.

Manufactured from high grade aluminium and anodised for a smart, durable finish they feature 2 x 1/2" OD connectors for the breather hoses, level indicator, breather cap and drain plug. Note: 2lt tank is minimum size required for FIA approval.

Oil Cooler Radiator

It is wise when modifying engines to allow for extra cooling, the oil should not be allowed to run too cool or too hot as this can lead to rapid engine wear. Installation Kits are available separately and include ready assembled hoses in rubber or braided stainless steel.

Ram Pipe

Ram pipes (except period style) are fitted inside the air filter to help smooth the air flow into the carburettor. The shorter the ram pipe, the higher up the rev range power is produced. If using with an air filter, a minimum of 1-1/2" between the ram pipe and the filter case is recommended to ensure maximum air flow.

Millers Oils have designed a range of high performance fuel treatments designed for the classic car enthusiast.

The removal of lead from fuels and addition of ethanol to fuel can cause problems for classic vehicles ranging from valve seat recession to fuel tank/system corrosion. Ethanol also attacks rubber hoses and seals in fuel systems and metallic parts such as brass and zinc. It also attracts water which can cause corrosion and poor starting.

Millers VSPe Power Plus (Endorsed by FBHVC)

Lead replacement and octane booster with added benefit of ethanol protection. Adds up to 2 octane numbers (20 points) to pump fuel, it prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel.

VSPe (Endorsed by FBHVC)

Lead replacement with ethanol protection. Prevents valve seat recession and combats the adverse effects of ethanol in fuel. Also contains additives to prevent fuel system corrosion and anti-oxidants to improve fuel life. Recommended for all classic engines previously requiring leaded fuel, now running on unleaded fuel, where an octane improver is not required.

EPS (Endorsed by FBHVC)

Ethanol protection only. Combats the adverse effects of ethanol in fuel, also contains additives to prevent fuel system corrosion. Recommended for classic engines that have been rebuilt (or fitted with a cylinder head that has been rebuilt) using hardened valve seats, previously requiring leaded fuel, now running on unleaded fuel where lead replacement and an octane improver are not required.

CVL - Competition Valve Lubricant

Complies with FIA fuel regulations for historic racing and enables older race engines to run safely on unleaded fuel. Adds 3 octane to base fuel.

CVL Turbo

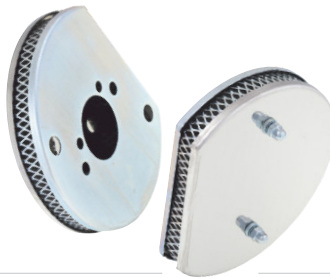

An out and out octane booster, adding 4 octane to base fuel, ideal for track days and wherever the maximum octane is required. Will give 103 octane when added to Shell V Power.

K&N Performance Air Filtration

Renowned as being one of the most efficient air filtration systems available. Their reinforced cotton weave is impregnated with a specially formulated oil to retain airborne particles. Offering much improved air-flow over standard paper elements, they are essential for fast road and competition applications. K&N performance filters are designed to be used with stub stacks.

Headlamp Units - 7" Sealed Beam

Sealed beam units were introduced in the early 1960's and became the standard type of light unit used on many British cars throughout the period and even late into Mini production. The lamp unit is effectively a large bulb comprising of; a pair of filaments, reflector and lens. We are now only able to supply sealed beam units as below.

HID Headlamp Conversion Kits

These 5000k HID (High Intensity Discharge) headlamp bulb kits offers a crisp white light that is up to 3 times brighter than a 55w halogen bulb.

The kits use special bulbs that fit the standard 'H' type fittings, and the dip/main function is controlled by a solenoid actuator that accurately positions the beam in the lens.

The kits also benefits by drawing less current than standard bulbs, so loads through original wiring and switches are greatly reduced.

This kit does not include the headlamp units. *If your car is not already fitted with H4 halogen headlamps then you will need to purchase a H4 halogen conversion separately.* Kits are supplied with a pair of bulbs, ballasts, and fittings.

H4 Halogen HEADLAMPS

Fitting a Wipac halogen headlamp conversion is one of the most worthwhile improvements you can make to your Classic. Wipac design and manufacture exterior lighting products for the world's premium car makers. These classic style lamps use powerful halogen bulbs combined with an improved convex lens design. Resulting in a superior light beam and pattern to that of the original lamp units. These lamps are available with or without a pilot (side light) and for left or right hand drive vehicles.

The Wipac kits include two lamp units and two 60/55w halogen bulbs. The units can be used with either standard H4 bulbs or replace them with blue tinted, or super white xenon. Super white xenon are approximately 30% brighter than the standard bulb.

LED Bulbs

Bright LEDs are becoming more & more popular and they are an excellent upgrade for your lights. Our LEDs have the advantage of a wide angle light distribution design and can be easily installed with no modifications to your car required. Negative earth only. The LEDs are available in 3 colours (white, red and amber) to match the colour of the lens application. Trust us, you don't want a white light behind a red lens. Pink is not the universal colour for "stop," last we checked. If you are planning to upgrade your indicators to LEDs you will also need to upgrade to an electronic flasher. The LED bulbs draw very little current and this means they won't trigger the mechanical flasher to blink.

Some Classic cars may require a ballast when replacing the indicator bulbs with LEDs as the low amount of current required can lead to the other side LEDs lighting turning the lights into hazards. The ballast simply gives the indicator a ground without leaving extra current for the opposite LED. We supply LED bulb kits which contain a resistor to make the job easier. Please see the LED kits and Ballast Resistor for details on which cars require this. Watch the video on moss-europe.co.uk for more information.

LED Bulb & Ballast Resistor Kits

Some classic car wiring systems require the use of a ballast on the indicators to ensure correct operation. This problem occurs when the dashboard warning lamp is wired between the LH & RH indicator circuits, using the opposing circuit

as an earth. You will require two ballasts per car, one for each side. We offer a bulb & ballast kit which contains 1 bulb & one ballast. Wiring will be required to suit your vehicle.

WAXOYL RUST PROTECTION

Probably the most effective aftermarket rust prevention treatment available. Waxoyl is designed for use in cavities such as sills, chassis leg and wheel arches to provide anti-rust protection. It spreads evenly over the applied surface forming an effective seal against the environment.

Underbody seal is a proven product providing protection to the underbody areas of your car such as wheel arches, inner wings, sills and floors. It can be applied to areas at risk of damage from stones, grit, road salt and water to provide a tough flexible barrier, with added Waxoyl for rust inhibiting. Easily applied by brush, aerosol or using the underbody seal gun.

Pertronix Ignition Coils
Pertronix Flame Thrower coils are specifically designed to work with their range of electronic contact-less ignition systems. The increased voltage gives a higher spark energy which provides more efficient burn for smoother response and better fuel economy. Available for standard & ballasted ignition systems. See page 95 for Pertronix ignition kits.

Pertronix Ignition Kits

PERTRONIX

These completely self-contained electronic ignition units offer a simple alternative to traditional points and condenser arrangement. They are easy to install with no external control boxes to mount and only two wires to hook up and no

permanent modifications involved. The unit uses a sealed Hall Effect sensor that is impervious to dirt, dust, moisture, or vibration, and retains standard advance curve. Unaffected by distributor shaft wear, maintains firing accuracy to within 1/4 degree, reduces spark scatter over the full rpm range. One year warranty.

Notification of prices

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change. Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter these prices without prior notice.

For the latest prices, please visit our website www.moss-europe.co.uk. All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable) and are correct at the time of going to print. Postage and packaging is not included. E&OE. Where the price is replaced with the word "£Call" this part is generally not available or only available to order. Please call our sales staff as we may be able to assist you in locating the part or a suitable replacement part.

Product supersessions

Moss Europe's policy is to detail the most up to date part information in our catalogues. Where possible parts are kept to original specification. However, in some instances we have to supersede to the most viable alternative product to maintain supply and keep cars on the road. Every effort is made to ensure high quality products.

UK ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you have the opportunity, we invite you to visit one of our branches. Remember, supplying details of your car, (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications) saves time and helps us to help you. Please inform us of your customer number, as this will speed up the processing of your order.

Overseas ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you visit the U.K. please come and visit one of our branches. When ordering, please ensure that you enclose full details of your name, address and customer number, plus details of your car (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications).

Please note: Overseas orders are often subject to local import duties, taxes and Customs clearance, which will need to be paid for at the point of entry. These charges are NOT included in the price of the goods or delivery prices. All relevant Customs forms and documentation needed to ensure the order arrives with the minimum of delay, will be included with your shipment. If you have any special requirements, please contact us to discuss them. Delivery charges are dependent upon the size and weight of the shipment. If a quotation is required prior to placing an order, please contact the export department at your chosen branch and they will be pleased to supply a full quotation.

Parts back-order system

A back-order system is used when a part is not in stock at the time of ordering. If the item is expected to become available within 6 months, then it will be put on back-order, unless the customer instructs us otherwise. When we have the parts in stock, the back-order will be processed automatically and the item will be dispatched to the customer. If the particular part becomes No Longer Available (NLA) or does not become available within 6 months the back-order will be cancelled. If you are unsure when you placed a back-order contact your local branch.

Dispatch & delivery methods

Orders for delivery in the UK may be dispatched by regular post (for small/lightweight items), or through a Next Day courier. Please contact us for the best delivery option for your order. We are constantly striving to improve the service we offer, so please contact us for the latest delivery prices. For delivery outside the UK we offer the following services:

- **Economy delivery (by road):** 2 to 5 days.
- **Express delivery (by air):** 1 to 2 days (Guaranteed) - next day service to most countries.
- **For small and low value orders we also use airmail.**

For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on weight band, volume, destination and delivery time. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own delivery and dispatch.

Windscreen delivery information

We always suggest that windscreens should be collected from one of our branches to ensure you are able to transport your glass with the utmost of care. However, we understand that this is not always possible.

To minimise the possibility of damage to the windscreen in the shipping process, it is now Moss Europe's policy to ship windscreens packed in a specially designed heavy duty 'Tri-Wall' cardboard box. The price of this box is £35.00 (inc VAT), non-refundable and is included in the price of the product. The crate's dimensions will also increase shipping costs, particularly in EU countries. The crate dimensions are 150cm x 33cm x 74cm. The maximum volumetric weight is 92kgs. For more information please contact your nearest Moss branch.

Hazardous goods delivery information

At the time of going to print, Moss Europe Ltd conforms to international shipping regulations regarding packaging and transportation of Hazardous Goods by road and sea freight (only).

Due to these international shipping regulations and licencing rules all goods deemed as Hazardous are currently available for shipping to the UK and Europe only. If you place an order containing Hazardous goods and your shipping address is not in the UK or Europe, we will not be able to ship this item to you. Please contact your local branch or visit our website moss-europe.co.uk for the latest delivery information of Hazardous goods.

Quotations & payment methods

We will be pleased to provide a full parts quotation detailing price, availability and relevant shipping costs. Payment may be made by cash, personal cheque (to the card guarantee limit), Certified Bank Draft, Sterling Travellers Cheques and credit or debit card including: Mastercard, Visa, Delta. If you intend to make payment by Cheque or Bankers Draft when using our fast mail-order parts service, please confirm parts availability and carriage charges.

We can accept payments using PayPal for email and phone orders only.

Value added tax (VAT)

Value Added Tax (VAT) at the current rate will be levied on all orders being dispatched to all countries within the European Community. EU countries may be charged at their local VAT rate, please contact us or see website for details. VAT is not charged on goods dispatched to countries outside of the EU. However, such orders are often subject to local import duty, taxes and Customs clearance, which MUST be paid by you at the port of entry. Such charges are not included in the cost of the goods or delivery prices.

Exchange units

We are able to offer a full rebuild service on numerous major components in our product range. We offer this service as an alternative to direct replacement parts, or when a brand new item is no longer available. However, the continuity of this exchange scheme needs the understanding and co-operation of our customers in relation to several important points: It is important to remember that "rebuild" does not mean "brand new". Rebuilding a unit involves stripping, cleaning, inspecting and re-assembling the unit. During this process, parts showing signs of wear will either be completely replaced or suitably renovated. However, it is not always feasible for major sub-components to be replaced with brand new ones, for example, an exchange engine will not have a new block. Due to the nature of certain product lines, some items can only be offered on a "one for one" exchange basis. This effectively means that you must offer us a viable unit before we can release a fully rebuilt item from our stock. In some instances we can only carry out reconditioning of your own unit. Our staff will inform you if this is the case.

All exchange units are subject to a surcharge. This surcharge serves two purposes; firstly, it acts as an incentive for you to return your old unit, and secondly it provides us with financial cover if your returned unit proves unsuitable for exchange purposes.

Whether or not your returned unit is suitable for exchange purposes cannot be ascertained until it is made available to us for inspection. As a general rule, suitable for exchange basically excludes any items that are beyond reasonable repair (e.g. crankcases pierced by a connecting rod) or units irrevocably damaged. We are also unable to accept units unless they are returned in whole, complete form (i.e. differential units which are returned partly stripped with no bearings and all the shims missing are not generally accepted), nor do we accept a "box of bits".

Surcharges will only be refunded once our core department has passed the item as serviceable. Under no circumstances can any exchange unit be shipped overseas until we receive your original unit. We have predetermined prices for our exchange units based on our experience of repair costs for a gearbox, axle or engine. Occasionally, however, the damage to the unit is so great that we will contact you before beginning work on your unit to advise you of any additional cost that may be incurred during the rebuild of the unit. We can return the unit (at your cost) if this proves unacceptable.

'Old unit' returns

Exchange items including reconditioned engines are subject to a surcharge that is refunded when a rebuildable unit (core) is returned. When you receive the rebuilt unit, attached to it will be a Core Return Authorisation Tag. This tag must be removed from the rebuilt unit and attached to the returned core in order to receive credit. Cores must be returned within 90 days of purchase in the original box, carton or engine cradle supplied with the rebuilt unit. Cores must be shipped clean and empty of fluids. Cores must be complete, assembled and rebuildable to receive credit or refund. You must pay all shipping charges for the return of the core and these charges are not refundable.

Warranty

All parts are warranted against defects in materials and workmanship for a period of twelve (12) months from the date of purchase. The warranty does not cover failure resulting from incorrect installation or misuse; failure during any competition, motorsports or track events; failure of any, or caused by any, related component. The warranty does not cover labour charges, nor will a warranty settlement be greater than the cost of the original component. Should you need to make a warranty claim, please contact us immediately at the branch of purchase. We will then advise you as to the best course of action. With all warranty claims a copy of the original purchase invoice must be produced.

Warranty returns

Parts that fail in use may be returned for 12 months from the date of purchase. Returns must be accompanied by the original invoice - no warranty claims will be paid without a copy of the original invoice. Return freight will be reimbursed. Electrical parts returned for warranty will be tested and if found functional, no return credit will be given and the part will be returned. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Non-warranty returns

All uninstalled parts, in their original packaging may be returned within 90 days for any reason. A copy of the original invoice or the picking label (which is generally attached to the original packaging) must accompany the return. Return freight is paid by the customer. If the return is due to our error, the return freight will be reimbursed. Parts returned outside of this policy or in non-resalable condition may not be accepted or may be assessed a 15% handling fee. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Customer service

We value your custom and wish to ensure that you receive the very best service. Every effort will be made to provide you with Quality Parts and Expertise in a relaxed, helpful and friendly manner. Should you consider the service you receive from us to be unsatisfactory, or you have any problems with the part(s) purchased, please advise a member of the sales team at the originating branch. If the matter is not resolved to your satisfaction, please e-mail our Customer Services Department at customerservices@moss-europe.co.uk or write to: **Customer Services, Moss Europe Ltd Unit 16, Hampton Business Park, Bolney Way, Feltham TW13 6DB England.** *We will do our very best to resolve the issue.*

EUROPE'S CLASSIC MOTOR OIL

Dynolite offers a broad range of oils and lubricants for Veteran, Vintage and Classic cars and motorbikes. Dynolite lubricants are blended to exceed the original vehicle manufacturer's specifications. They are formulated from high quality components and are only combined with additives specially selected for their compatibility with metals and components used in older vehicles, including suitable levels of ZDDP to combat wear, often reduced in modern oil blends. Most modern oils do not cater for these older technologies.

Dynolite's philosophy stands out for its range, offering specific lubricants for engines, gearboxes, steering boxes, as well as greases. In terms of mechanical protection, Dynolite lubricants are far superior to those usually found on the market for the simple reason that they have been specially developed for your historic vehicle. Therefore, you benefit from increased protection, higher oil pressure combined with a lower degree of acid attack and corrosion, reducing gum and sludge formation.

See the Moss 2014 Restoration Tools catalogue for details of the full range of Dynolite oils and lubricants.

DYNOLITE

EUROPE'S CLASSIC MOTOR OIL

BRISTOL

'Moss Bristol' is one of five Moss Europe Ltd branches located across the UK and Europe. Nestled in the heart of the south west, Moss Bristol is run by enthusiasts for enthusiasts, catering for the classic British models that Moss have become renowned for. However...

...we realised with over 45,000 parts in stock that not all of them have been available through our famous 'model' parts catalogues. To rectify this we have been cataloging our full parts inventory, this catalogue is the result. Obviously there are not 45,000 parts featured in this first edition. However, we hope to keep adding useful parts and developing the catalogue for years to come.

Having an in-depth knowledge of these components allows us to offer you parts by specification, size, material, fitting... rather than by their original application. Allowing you to maintain originality or customise your vehicle by choosing the parts you like.

So whether it's a set of lamps for your classic Ford or Kit Car, or a selection of bulbs for a 1970's Vauxhall, you will be surprised which parts will fit your car without resorting to secondhand parts.
