

PARTS & ACCESSORIES FOR YOUR

MORRIS MINOR

including technical advice and detailed schematics

WHEN ORDERING...

Remember, supplying details of your car, (i.e: engine, commission or VIN, LHD / RHD, year and any modifications) will save time and help us process your order correctly. We will be pleased to provide a full parts quotation, detailing price, availability and shipping costs, upon request.

SHIPPING & DISPATCH

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices.

For delivery outside the UK we offer the following services. Economy delivery (by road): 2 to 5 days (approximately). Express delivery (by air): 1 to 2 days (Guaranteed). For small and low value orders we also use airmail. For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on either gross weight or volumetric weight, whichever is greater. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own collection.

UK OPENING TIMES

Open Monday to Friday
8.30am to 5.30pm

Saturday
9.00am to 1.00pm
(Closed Sunday & Bank Holidays)

See website for Paris opening times

COLLECT FROM BRANCH

Why not reserve and collect your order from one of our branches?

ONLINE

If ordering online select the 'collect from branch/ arrange own pick up' option on the 'Delivery Method' page during checkout. Then select the branch you want to collect your order from. You will receive an email confirming your order and selected branch.

EMAIL

Send an email to sales@moss-europe.co.uk with the title of "Branch Collection". Your e-mail must contain the following information: Your full name, address, daytime contact number, desired branch for collection and part numbers.

COLLECTION

Our sales team will contact you when your order is ready to collect. You will then be able to collect and pay for your order at your requested branch during store open hours. On collecting your order you may be asked to confirm your address.

PRICING

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change.

Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter prices without prior notice. For the latest prices, please call or visit our website moss-europe.co.uk.

All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable). Please note EU countries may be charged at their local VAT rate, countries outside the EU will not be charged VAT. See the ordering information

or our website for further details. Prices are correct at the time of going to print, postage & packaging is not included. E&OE.

90 DAY MONEY BACK PEACE OF MIND WARRANTY

It's simple, if you change your mind for any reason, all uninstalled parts still in their original condition and packaging may be returned to us within 90 days from the date of purchase for a full refund. A copy of the original invoice or picking label must accompany the return. Return freight is paid by the customer, unless returned due to our error.

In the event of a part failing in use, all parts are warranted against defects in materials and workmanship for 12 months from the date of purchase. Please remember that all returns must be accompanied by the original invoice, return freight will be reimbursed. For more details see our website or contact your local branch.

*Keep up to date with
our latest news and
tell us yours.*

5 SPEED GEARBOX CONVERSION

Our range of five speed conversions for the Minor are a complete replacement kit with everything you need to achieve modern day driver comfort and performance. The ultra-smooth action of the five speed gearbox is an instant benefit. With a synchromesh first gear and quieter reverse the vibration and hassle are taken out of town driving. With similar ratios

from first to fourth, the performance through the gears is unaffected, and the added benefit of a 0.82:1 fifth gear gives a reduction of 1,200rpm at maximum speeds, giving faster and more relaxed cruising.

“everything you need to achieve modern day driver comfort and performance.”

The robust gearbox and replacement clutch release arrangement replace the weaker original system, giving an almost maintenance free transmission. The conversion involves minimal cosmetic or structural changes and the specially modified gear change puts the gear lever in the original position, with no modifications required to the upper area of the gearbox cover. Kits are available to suit the original mechanical linkage or hydraulically operated clutches.

Kit includes: Fully reconditioned gearbox, replacement bell housing, clutch mechanism, chassis crossmember, speedo cable, hardware and instructions.

REVOTEC COOLING FAN KITS

Keeping your engine running at it's optimum temperature will ensure the best performance and economy.

Revotec and Moss Europe have co-designed these high quality bespoke fan kits using the latest high efficiency fans with adjustable electronic controllers. These kits are designed to replace the standard original mechanical fan, reducing the load on the engine, noise and improving both power and mpg.

Unlike other fan kits that use universal mounting systems, these kits fit using bespoke laser cut brackets that mount directly to the radiator cowl using existing mounting bolts.

See page A10 for more information

SUPERPRO BUSHES

The first stage in improving your suspension is to check all your bushes - there's no point buying springs and dampers if the bushes are worn out. These suspension bushes improve the handling by reducing the amount of unwanted flex in the standard type of bush, leaving the suspension to move in the direction intended by the designers.

“Polyurethane bushes are 25-30% stiffer than the factory bushes and do not deteriorate in performance over time.”

Polyurethane is the best solution for road use. It gives improved location without having a detrimental effect on noise levels or a harsh ride. Added advantages are improved longevity and unlike rubber it is not affected by ultra violet light, water, salt, oil or petrol. These Superpro bushes come with a steel sleeve and grease where necessary and are available either individually, or as a complete car set.

SPK71CK

Superpro complete bush sets

Complete bush set, Saloon Tourer and Traveller . . .SPK70CK . . .**£99.78**
(Contains: Upper outer trunnion bush, lower inner control arm bush, front tie bar bush, leaf spring eye and shackle bushes and leaf spring saddle mount).

Replaces the spherical bush in the clutch linkage. This provides more accurate location and resists the degrading effects of fuel and oils.

Clutch cross shaft pivot bush (1 required)AAA1626SP **£6.90**

TELESCOPIC DAMPER CONVERSION KITS

Converting to telescopic dampers is a good step in improving your Minor's handling. The telescopic dampers give improved control and rear axle location. This results in better ride and handling, making your Minor more stable and predictable, ideal for daily-used cars. These conversion kits are designed to give your Minor all the benefits of telescopic damping in an easy to install kit. They are available with a choice of gas or oil filled dampers. Includes all hardware and fitting instructions.

Telescopic damper conversion kit - front gas . . .MMA1200 **£154.50**

Telescopic damper conversion kit - front oil . . .MMA1205 **£113.30**

Telescopic damper conversion kit - rear gas . . .MMA1250 **£189.50**

Spax telescopic damper conversion kit

Spax dampers are renowned for their quality and will give excellent damping and a long service life. They feature an external adjuster mechanism that allows for easy damping adjustments whilst the units are still fitted on the car. These are ideal for fast road cars. Each kit includes a pair of dampers, necessary brackets, hardware and fitting instructions.

Spax telescopic damper conversion - frontSPCK9 **£302.00**

Spax telescopic damper conversion - rearSPCK10 **£269.10**

MMA1060

“Improving the gas flow through the engine is the key to gaining more power...”

PERFORMANCE EXHAUST

Improving the gas flow through the engine is the key to gaining more power, a simple first step ‘Stage 1’ is to upgrade the induction (see page A11 for details on air filters) and exhaust systems. Fitting an extractor manifold with a performance exhaust allows the engine to breathe more easily. To gain the most benefit from our extractor manifolds and performance exhaust systems they should be used together.

Extractor manifolds work by allowing the gasses to flow through a smoother path. Using larger bore pipes also reduces back pressure in the manifold and cylinder head. Additional power can be gained by wrapping

the manifold, this reduces the temperature in the engine bay, allowing cooler air into the carburettors, and keeping the exhaust gasses hot which means they have less density and flow more freely. Our manifolds and systems are manufactured to the highest standards and are available in high quality stainless steel. All pipes are mandrel bent to maintain tube shape and assembly is done on jigs to ensure accuracy and quality fit.

Extractor manifold - 1275cc conversions	MMA1050	..£267.80
Sports exhaust system - 1275cc conversions	MMA1060	..£422.30

SMITHS GAUGES

A superb range of gauges in the ‘Smiths’ style with chrome bezel, and classic black faces with white numerals or magnolia with black numerals.

The following gauges are available:

- Clock (full face)
- Capillary oil pressure (half face)
- Electric water temp (half face)
- Dynamo ammeter (half face)
- Volt meter (half face)

- Boost gauge (full face)

All gauges come with bulb holders and retaining brackets.

The bezel (available separately) can be used to make the new gauges look as original as possible.

SMITHS

See page A23 for more information

ANTI-ROLL BAR KIT

Using an anti-roll bar reduces body roll during cornering, increasing stability without ruining the ride comfort. This bolt-on kit is designed to be simple to fit and will benefit standard and modified cars.

Front anti-roll bar kitMMA1210 ..£154.50

**ANTI-ROLL
BAR KIT**

**REAR SPRING LOWERING KIT**

Reducing the ride height effectively lowers the centre of gravity which benefits handling by reducing body roll. This spacer block fits between the axle and road spring to reduce the ride height by 1.5". The kit includes spacer blocks, U bolts and nuts.

Rear spring lowering kitTMG30920 ...£57.20

**COPPER BRAKE PIPE SETS**

These non-rust, copper brake pipe sets are cut to the correct length and assembled with fittings and flared ends. The pipes are manufactured from pliable thick walled, seamless copper pipe with brass fittings which are strong and malleable, allowing them to be readily formed by hand or with pipe bending tools.

Copper brake pipe set RHD Saloon/Traveller ...HGB5003 ...£69.70
Copper brake pipe set LHD Saloon/Traveller ...HGL5003 ...£72.50
Copper brake pipe set RHD Van/Pick-upHGL5003C ...£65.60

TT3949

REMOTE BRAKE SERVO KIT

For those who find the brake pedal rather hard after driving more modern vehicles, these remote servo kits make braking easier by reducing pedal effort. Suitable for all single line brake circuits they are remote mounted and easily plumbed into the hydraulic and vacuum systems of the car. We offer both a Lockheed and aftermarket kit, both are supplied with mounting brackets and hardware. (Union fittings to this servo are UNF thread. Please change the pipe unions to your specific requirements).

Remote brake servo kit LockheedTT3949 ...£187.20
Remote brake servo kit aftermarketTT3949Z ...£95.50

**STAINLESS STEEL BRAIDED BRAKE HOSES**

These race inspired steel braided brake hoses look great, and because they don't swell under pressure, they provide a much firmer feel to the brake pedal.

Stainless steel braided brake hosesMMA1150 ...£98.20

**REMOTE FLUID RESERVOIR KIT**

This kit is designed to mount a remote reservoir in the engine bay where it is more easily accessed for routine fluid level checks. This is also recommended when fitting a disc brake conversion kit as the calipers require more fluid in the hydraulic circuit.

Remote fluid reservoir kitMMA1105 ...£39.10

**DISC BRAKE CONVERSION KIT**

Drum brakes can be easily converted to discs with this kit, bringing Minor braking right up to date. The kit uses sliding calipers and specially machined discs, hubs and back plates to enable an easy conversion.

Disc brake conversion kit - frontMMA1100 ...£610.00
(Fits 1000 models from 1956 on only).
Hub bearing kit - 1 sideMMA11001 ...£15.70
Brake pad setMMA11002 ...£19.10
Brake disc, eachMMA11003 ...£30.90

CSI-IGNITION DISTRIBUTORS

CSI-Ignition distributors offer a fully electronic ignition system built into the correct type of Lucas distributor housing to suit your car, keeping the original appearance in the engine bay. You can only tell the difference when you remove the distributor cap! Gone are the points and condenser and mechanical advance mechanism, all replaced with a high quality electronic ignition system manufactured using military specification components for durability and reliability. These distributors are maintenance free (no points to adjust), and of easier starting & smoother running, more torque & power, reduced fuel consumption & emissions. They also eliminate the weaknesses of mechanical timing advance and problems such as points bounce ensuring correct ignition timing throughout the rev range.

“The new range of CSI-Ignition distributors is a breakthrough for classic car ignition systems”.

Each CSI-Ignition distributor features 16 easily switchable, optimised ignition curves to allow timing adjustment to suit your car's engine and fuel specifications. Alternative advance curves can be selected to suit your engine's state of tune making them ideal for modified engines. Curves are easily selected using a screwdriver in a rotary switch, with a bright flashing LED indicator to show the selected curve all concealed underneath the distributor cap.

The distributors are also available with an electronic immobiliser system to prevent unwanted starting of the engine. CSI-Ignition distributors are available Optimised with vacuum advance to suit 948-1098cc road or uprated cars running on SU carburettors. Please note: Some units may only be available to order. If your car is fitted with an alternative Spridget, Marina or Ital engine please visit our website or call with engine specifications. Search for CSI Ignition Distributor.

Optimised 25D4 positive earthCSD7014571 **£270.40**

 Optimised with immobiliser 25D4 negative earth .CSD7014681 **£421.20**

CSI-Ignition distributors require a coil with minimum resistance of 2.5 ohms. We recommend using our sports coil TT2981 3 ohms. Bypass the ballast resistor if fitted.

Sport coil (3 ohms)TT2981**£18.20**

SMOOTH CUT REV LIMITERS

Save yourself from an expensive bill, designed to allow full use of power up to maximum revs, where they will not exceed the preset limit. They work by progressively miss-timing the spark preventing an increase in engine speed from over revving due to missed gears or over exuberance.

SmoothCut rev limiter 4 cylinder preset 6000rpm .TT2987 ... **£114.40**
 SmoothCut rev limiter adjustable limitRL5**£161.20**

NGK SPARK PLUGS & PLUG CAPS

Changing the spark plugs regularly ensures the engine performs well. NGK are renowned for making performance plugs giving a strong spark and long life.

 Push-in connector cap & coil (each)GCL1110**£1.39**

LUMENITION IGNITION

Lumenition electronic ignition kits are well known as being among the finest aftermarket electronic ignition systems available. This system basically replaces both the contact points and condenser with an optical switch and power module. The power module is an electronic device that receives a pulse from the optical trigger which switches the coil. The trigger eliminates contact bounce, arcing, mechanical wear and spark scatter, reducing maintenance and increasing reliability. With minimal wiring and modifications this kit is very discreet.

Note: Installation of a power module requires a distributor fitting kit.

A performance ignition kit is available, it includes a power module and a high output coil. The microcircuit control of the coil current gives optimum performance across high engine speed ensuring maximum spark energy at the coil. A fitting kit to suit the distributor application is also required. Positive earth wiring instructions are available from your branch. Please check your distributor type before ordering the fitting kit as many cars have non-original distributors fitted. The identification number is cast on the distributor body.

Performance ignition kit: Supplied with high energy coil and performance power module.

Performance ignition kitCEK150**£291.20**

Lucas 25D4 distributorsLFK116**£17.50**

COBALT PERFORMANCE HT LEAD SETS

Get the spark from your coil with silicone HT leads that are designed to perform. These Cobalt leads use a high performance conductor to transmit greater energy to the spark plug creating a stronger spark for improved combustion. They also feature multi-layer reinforcing and insulation with a protective silicone outer sleeve and terminal boots for improved reliability. A Series engines with Lucas 25D distributors require a top entry distributor cap (GDC103).

Cobalt silicone lead setTMG10872 . . .£21.00

222-615

PERTRONIX IGNITION

These completely self contained electronic ignition units offer a simple alternative to traditional points and condenser arrangement. They are easy to install with no external control boxes to mount and only two wires to hook up and no permanent modifications involved.

The unit uses a sealed Hall Effect sensor that is impervious to dirt, dust, moisture, or vibration and retains standard advance curve. Unaffected by distributor shaft wear, maintains firing accuracy to within 1/4°, reduces spark scatter over the full rpm range. One year warranty.

222-405

HT LEAD NUMBERING SET

Keep track of which HT lead is which with a set of numbered sleeves.

4 cylinder HT lead numbering setCRST255 . . .£3.82

CARPET & CARPET SETS

We have a range of quality carpet sets in a variety of colours that are manufactured to high standards ensuring an excellent fit. Often using materials superior to those used for the original carpets. Where required, some of our carpet sets are moulded to follow the contours of the floor pan as per the originals.

We also offer underfelt kits, competitively priced budget carpet sets for some models and embroidered carpet overmats.

See page A26 for more information

REVOTEC COOLING FAN KIT

Keeping your Minor's engine running at optimum temperature ensures you get the best performance and economy. Using the latest high efficiency fans with adjustable electronic controllers, these kits are designed to replace the standard original mechanical fan, reducing the load on the engine, noise and improving both power and mpg.

Unlike other fan kits that use a universal mounting system, this kit fits using bespoke laser cut brackets that mount directly to the radiator mountings. The brackets are bright passivated to give a smart appearance and prevent corrosion. The kits also use a precise electronic controller to enable easy adjustment to suit your car. **Negative earth only.**

A manual override switch is also available separately, enabling manual control of either On, Off or Automatic. Must be used with a Revotec Electronic Fan Controller.

Revotec fan kitRFK70	£194.00
Manual override switchRFC020	£37.00

Negative earth only.

RFC010

REVOTEC ELECTRONIC FAN CONTROLLERS

These units use the latest type of surface mounted electronic controllers to sense the temperature of the water in the cooling system. The controllers are designed to fit neatly into the cooling system without using capillary probes or radiator mounted clip on devices. This ensures that the coolant flow is not impeded, accurate temperature control and effective sealing of the coolant system are maintained. The self sealing EFC can be used in all applications. Please ensure there is sufficient space to fit an EFC hose fitting.

THERMOSTAT/BYPASS HOSE BLANKING KIT

The thermostat can be removed to aid cooling but it is essential that a blanking sleeve is fitted in its place or the change in water flow may cause local overheating in the cylinder block. For A series engines, improved water flow can be achieved by fitting our bypass hose blanking kit, this will help to keep your cylinder head cool.

Thermostat blanking kitAJJ4012	£8.60
Bypass hose blanking kitAJJ4013	£20.00

OIL CATCH TANKS

If you modify the breather or induction systems of your car for either road or track use collection of oil should be considered. An oil catch tank is a must for competition use to prevent oil spillage on the track. Manufactured from high grade aluminium and anodised for a smart, durable finish they feature 2 x 1/2" OD connectors for the breather hoses, level indicator, breather cap and drain plug. Available in 1 litre or 2 litre sizes. Mount using the rear flange to a suitable vertical panel in the engine bay.

BREATHER FILTERS

Engine breather filters are an alternative to running pipes from crankcases, clutch housings and timing cover breathers to the inlet manifold, they are particularly useful if induction set ups have been changed. Filters simply push on and are retained by a hose clip. Just remember to block off the other fitting on the carburettor or air filter where the original pipe was attached.

K&N crankcase breather filters

1 Breather filter 2" diameter 1/2" external inlet .KN62-1010 ..£22.90
(Filter has 1/2" (12mm) OD metal inlet stub to fit into 1/2" (12mm) ID breather hose).

STELLING & HELTINGS AIR FILTERS

Stelling & Hellings air filters were a popular aftermarket air filter used on many American hot rods & sports cars. Their filters were supplied as original equipment on the 427 Cobra. These exact reproductions are chrome plated with a mesh filter.

Stelling & Hellings Air Filter - SU 1 1/4" Carbs£39.00

Stelling & Hellings Air Filter - SU 1 1/2" Carbs£39.00

PIPER AIR SOCKS

These air socks can be used with our piper ram pipes. They are supplied in pairs at 100mm long. They can be cut to size, though you must leave a minimum of 30mm between the inner face and the ram pipe mouth.

Piper air socks (pair)PXC1050£26.10

RAM PIPES

Ram pipes (except period style) are fitted inside the air filter to help smooth the air flow into the carburettor. The shorter the ram pipe the higher up the rev range power is produced. If using with an air filter, a minimum clearance of 1 1/2" between the ram pipe and the filter case is recommended to ensure maximum air flow.

Ram pipes for SU carburettors

1 K&N ram pipe for HS4KN85-5039 . .£14.90

TMG2930K

HIGH CAPACITY FUEL PUMPS

The standard fuel pump may not be able to maintain adequate fuel flow and pressure at higher engine speeds, particularly with a tuned engine. The Facet range of fuel pumps will suit all standard and modified engines fitted with carburettors. They give constant fuel flow and pressure, even at high temperatures eliminating the problems associated with vapour lock.

The pumps are available in a variety of specifications to suit the engine's fuel pressure and flow requirements. Further fine tuning of the fuel pressure can be easily achieved by the use of a separate fuel regulator, see opposite. With safety in mind we recommend fitting a fuel pump inertia switch kit, so that in the event of an accident fuel delivery is automatically cut-off. Fuel lines may require adapting to install the new pump, check pipe sizes to select the correct unions, additional unions may be required.

Cylindrical fuel pumps

Formerly known as interrupter type pumps, these heavy duty pumps can be fitted at the front or rear of the car and up to 600mm above the bottom of the fuel tank. Kits are supplied with mounting & 8mm unions, alternative size unions available.

Cylindrical fuel pump kit - road Silver TopTMG2930K . .£114.40

HYDRAULIC CLUTCH CONVERSION

This conversion kit replaces the standard mechanical linkage with a hydraulic circuit. Using a hydraulic system benefits as the hydraulic system is self adjusting and gives a more progressive feel to the pedal. The kit includes master and slave cylinders, remote reservoir, pipe work, all necessary hardware and fittings.

This kit is not compatible with 5 speed conversions.

Hydraulic clutch conversion kit, 1098cc only . . . MMA1300 . . .£194.70

ALUMINIUM CYLINDER HEAD (STANDARD)

Working to original drawings, this brand new 1275cc cylinder head is designed to the original factory specification. When fitting an aluminium head, you must run with 100% summer coolant that contains the correct inhibitors to prevent corrosion and electrolytic reaction. We recommend you use new hardware, nuts, studs, etc... when fitting these heads to ensure a good fit.

All our 5-port heads are supplied as fully machined bare heads, with bronze valve guides and lead free valve seats. Heads can be modified to a higher specification. For detailed specifications please call your nearest Moss branch.

Aluminium cylinder head, 1275cc451-875 . . .£1075.00

ALLOY ENGINE BACKPLATE

These alloy engine back plates are stronger and lighter than a standard steel unit, offering a worthwhile weight saving especially for competition cars. Pre-drilled for easy installation.

Alloy backplate, 1275ccMGS20817 . . .£134.70

HIGH TORQUE STARTER MOTOR

This brand new powerful, lightweight starter motor is high torque. This means it is less likely to burn out under the strain of cranking your engine over, especially with high compression engines.

High torque starter motor 948-1275ccGXE4405XM £210.00

130-068

DYNATOR CHARGING SYSTEM

For owners wishing to fit an alternator but prefer to keep the original appearance for aesthetic reasons, or for competition scrutineering rules, the Dynator is the answer. Basically, it's an alternator in a dynamo casing, and comes complete ready to fit, available for positive and negative earth. Instructions provided.

Negative earthPT10802 . . .£436.80

Positive earthPT10802P . . .£549.10

ALTERNATOR CONVERSION KIT

Update your Minor's charging system to an alternator with our comprehensive kit. An alternator provides more reliable charging and increased output which is particularly useful when several electrical systems are being used at once, such as lights, wipers, blower etc.

The kit includes an 18ACR, 45 amp alternator, pulley, drive belt, brackets, hardware and comprehensive instructions. The car must also be converted to negative earth.

Fan belt replacementGCB10825 . . .£5.12

BATTERY CUT-OFF SWITCHES

Battery cut-off switches are a good idea for all cars. Fitting one enables you to quickly isolate the battery and immobilise the car; ideal when working on your car, or if you intend to put your car into storage. Use with a battery conditioner, see our website or our Restoration Tools catalogue.

Battery mounted cut-off switches

These cut-off switches simply mount to the battery post and feature a screw-in knob to break the circuit. Available with a bypass fuse to allow sufficient current to pass to operate clocks, alarms and coded radios, but if any attempt is made to start the car the fuse will blow.

Battery mounted cut-off switchGAC3192X£6.61

Battery mounted cut-off switch with bypass fuse .GAC31921£9.50

In-line cut-off switches

These cut off switches need to be fitted into the main battery to starter cable. The body of the switch should be mounted securely to the car and cables fitted using the terminal kit.

Period cut-off switch

These are reproductions of the Lucas 'Battery Master Switch' which was a popular accessory on many British classics.

TWIN HORNS

Opt for the distinctive sounding Lucas style windtone horn set.

Windtone horn set1B9007/8£60.00

Our twin air horn kit includes two tone horns, a heavy duty die cast compressor and all the necessary fittings and full instructions.

Twin air horn kitGAC9978X ...£35.60

(Note: This kit may not be legal for road use, please check local regulations).

NON-LEAK BATTERY

Suitable for most 12 volt applications it is a totally sealed, maintenance free battery that will not leak, even if split. The acid is completely absorbed into glass mat separators between the plates. Other advantages are that as there is less internal resistance, it offers more cold cranking capacity than a conventional wet battery.

It is also more resistant to heat and vibration and has a slower self discharge rate than a wet battery (loses 2-3% a month as opposed to a wet battery losing about 15% a month). Great in any car, particularly for sports or competition due to its small size (20 x 20 x 13cm). Its unique design means that it can be shipped by mail order.

Non-leak batteryMXV1129X£145.60

BATTERY TRAY

This clever yet functional item, completely hides all but the most terminal symptoms of battery box plague. Ribbed for extra strength, this battery tray protects against corrosion and also makes cleaning around the battery easier.

Crystal halogen kit* (pair)GAC4615	...£38.80
(*NOT 'E' marked for legal road use, no dip pattern).		

117-515

HEADLAMP RELAY KITS

Fitting halogen headlamps puts high loads on electrical components. These kits allow easy installation of relays into the headlamp circuit allowing for the high current circuit to be run through the relay. Fitting relays in headlamp circuits protects your wiring and reduces the resistance in the circuit allowing full power to the lamps. Kits include relays and fittings. The single relay kit can also be used for wiring spotlamps, horns and other electrical accessories.

BADGE BARS & MOUNTING CLIPS

These badge bars allow you to mount a selection of badges to your Morris Minor by fitting the bar to the existing bumper mounts. Featuring a polished stainless steel tube and the option of with or without lamp brackets, these badge bars will highlight the front on your car and show off all your prized badges. Simply fits to the main bumper mounting spigot behind the bumper iron, no drilling necessary. Badge clips sold separately.

Badge bar without lamp brackets	MMA2001	£48.00
Badge bar with lamp brackets	MMA2002	£69.50
Clip (badges to bar)	GAC8041X	£3.10

'WASO' FUEL CAP

This locking petrol cap was originally manufactured by 'Waso' in the Minor's hey day as a security alternative to the standard cap. The collar fits to the standard neck and the cap is then locked to it. Includes 2 keys.

RETRO SOUND RADIOS

The RetroSound range of radio and MP3 players feature the original 'twin knob' style mounting required for many classic cars.

Music can be played from external sources such as iPods, USB flash drives, and SD cards, all connected out of sight. Some models offer iPhone play and charging, hands free communication and Bluetooth.

There are a variety of Faceplates & knob kits available in different finishes to enhance your look.

CARPETS & FLOOR COVERINGS

Carpet sets

We offer a wide range of carpets to suit the various models of the Minor. Series MM & Series II are manufactured to the original design with stitched contour pieces over the tunnel and wheel arches. For Series III & V models we offer a moulded carpet set in range of original & alternative colours. These carpet sets feature contoured tunnel and front wheel arch carpets. The tunnel carpet is designed to cover the handbrake bracket & cables giving a smart & tidy appearance.

The footwell mats are backed with a special hard wearing PVC coating and feature fully bound edges with a heel mat on the driver's side. The non-moulded carpet sets are made from a tufted pile carpet and are stitched around the tunnel to form the shape. Due to the texture of the carpet these seams are concealed, giving a good finish. All carpet sets include instructions & fittings, adhesive sold separately. Series MM & II are available to special order only.

FOOTWELL MATS

These high quality carpet footwell mats are mud and water resistant and include a non-slip backing. They feature a Morris logo and have cut outs for pedals, steering column and dip switch. They are available in black or grey in a choice of 2 or 4 piece sets for RHD or LHD models.

Note: RHD models have cut outs for pedals, steering column & dip switch. The steering column hole is punched but the slot must be completed and cut to the edge prior to fitting. LHD models do not have cut outs for pedals, steering column & dip switch.

Bulkhead sound deadening kit - 1 piece	CSA8002 . .	£421.26
Bulkhead sound deadening kit - 2 piece	CSA8003 . .	£37.74
(Pre-cut underfelt pieces to fit the bulkhead).		
Under bonnet sound deadening kit	CSA8001 . .	£94.86
(Shaped & quilted hardura pad that fits neatly into the bulge of the bonnet).		
Bitumen pad 300mm x 190mm (12" x 7.5")	CHM228 . .	£8.16
(This self-adhesive bitumen type material can be stuck to inner of door skins, floor pans, etc to reduced drumming of the panels).		

DYNAMAT HEAT & SOUND INSULATION

Dynamat is a revolutionary range of insulation products designed to keep your classic cool and quiet.

- Non absorbent materials
- Self adhesive 'peel & stick'
- Easily cut & moulded to fit
- Isolates panel vibration
- Reduces road noise
- Reduces heat soak from engine & exhaust

Dynamat Xtreme

A highly efficient, composite material designed to reduce noise, vibration & heat soak through panel work.

Dynamat Xtreme - speaker packGAC90511 ...**£14.60**
(2 sheets of 254mm x 254mm (10" x 10")).

Dynamat Xtreme - wedge packGAC90512 ...**£32.80**
(1 sheet of 457mm x 812mm (18" x 32")).

Dynamat Xtreme - door packGAC90513 ...**£79.00**
(4 sheets of 305mm x 914mm (12" x 36")).

Dynamat Xtreme - bulk packGAC90514 ...**£202.80**
(9 sheets of 457mm x 812mm (18" x 32")).

Dynaliner

Dynaliner is an ultra-light weight, durable single layer insulation material that can be used as an alternative to traditional underfelt. It provides acoustic isolation and excellent thermal insulation.

Dynaliner - 1/8" thickGAC90531 ...**£49.90**
(1 sheet of 813mm x 1372mm (32" x 54")).

Dynaliner - 1/4" thickGAC90532 ...**£74.90**

Dynaliner - 1/2" thickGAC90534 ...**£98.80**
(1 sheet of 813mm x 1372mm (32" x 54")).

Hoodliner

Designed specifically for under bonnet insulation, hoodliner absorbs engine noise to help keep your car quieter. The aluminised skin creates a water and oil barrier that reflects up to 97% of heat to protect the bonnet's paint.

HoodlinerGAC90541 ...**£79.00**
(1 sheet of 813mm x 1372mm (32" x 54")).

BOOT AREA TRIM

Treat your Minor's boot area to a new mat or alternatively a carpet set.

Traveller boot mats and carpets

Travellers originally had a hardura mat on the load area of the boot. We offer this mat in the original grey hardura or alternatively in a range of coloured carpets to compliment your interior.

Boot hardura mat - greyCSA824060 ...**£114.24**

SEAT COVERS & TRIM PANELS

Part of the Minor's charm is it's simplicity. Throughout production the Minor featured a smart & functional interior which helped the Minor retain much of it's charm.

The interior trim went through a number of changes throughout production, particularly between 1956 & 1964, these changes mainly occurred to seat cover and trim panel designs. To simplify our listing we have arranged the products by the model Series and by the years the trim styles were featured.

SERIES MM, 1949-53

We offer seat covers & trim panels for this range to the original design in the original colours; maroon, suede green & beige, with contrasting coloured piping on seat covers. Front seat covers are sold as a car set of covers (for both seats) and rear seats covers are supplied as a complete set, all available in vinyl or leather faced.

Trim panels are only available in vinyl and are sold in pairs. Series MM trim is only available to special order; please contact us for more information. These early seat assemblies used a traditional and somewhat complex construction method. The fitting of these seat covers may require a specialist trimmer.

Series MM models often had a chrome trim on the doors, this trim is not available so the original items will need to be retained and reused.

Standard adhesive - aerosol 400ml	UBS203	£8.30

SERIES II, 1953-56

The Series II interior trim was largely the same as Series MM. However, the design and construction of the seats altered slightly. Although all Series II seats look the same the construction method changed. Early seats, produced in 1953, had a squab cover tacked to the frame then covered by trimmed fibreboard panel on the rear of the seat.

Later seats used a more conventional envelope squab cover. To check which type of seat you have, look at the squab back panel. If there is a decorative stitch line below the piping then you have the early type of seat, order the appropriate kit as below.

We offer seat covers & trim panels for this range to the original design in the original colours; dove grey, maroon & suede green, with self coloured piping on seat covers.

Front seat covers are sold as a car set of covers (for both seats) and rear seats covers are supplied as a complete set, all available in vinyl or leather faced. Trim panels are only available in vinyl and are sold in pairs. Series II trim is only available to special order; please contact us for more information.

**HEADLININGS**

Very early Series II models featured a board headlining as per Series MM models, this was discontinued in late 1953. For later Series II models we can offer a vinyl headlining featuring the correct 4 hoops for saloon models and the two-piece board type for Travellers. Headlining is available in plain grey or a white fleck material.

Saloon, Series II

These headlining kits are suitable for early models with small rear windows.

SUN VISORS

Sun visors were fitted to Series II models as standard, but only on the driver's side. We can supply the centre mounted sun visors which will fit both sides, see page A29.

SERIES III MINOR 1000, 1956-59

The launch of the Minor 1000 saw a redesign of the seats. They were manufactured using a tubular frame with rubber webbing straps suspending moulded foams.

This was a more modern approach to seat design, in common with many other manufacturers of the time. Originally Deluxe models were supplied with leather faced seats and standard models all had vinyl seats. Seats also featured a self coloured piping.

We offer seat covers for this range to the original design in the original colours; maroon and suede green, these options are both contrasted with a grey piping. Front seat covers are sold individually, and rear seat covers are supplied as a complete set and all are available in vinyl or leather faced. Trim panels are sold in pairs and only available in vinyl.

Maroon

Suede green

Please note: Colours may vary slightly to samples shown here, due to the limitations of the colour printing press, and should be used as a guide only.

SERIES III MINOR 1000, 1960-62

The first of several redesigns of the Minor 1000's interior trim was introduced for 1960 model year cars. The seats were redesigned to feature a larger stitched flute in the main base & squab panels. Folding passenger seats were also available on two-door models, allowing easier access to the rear seats. The door trim panels were also revised to feature two horizontal self-coloured piped lines.

We offer interior trim for this range to the original design in the original colours; maroon light blue and biscuit, these options have self coloured piping. Front seat covers are sold individually, and rear seat covers are supplied as a complete set and all are available in vinyl or leather faced. Trim panels are sold in pairs and only available in vinyl.

SERIES 5 MINOR 1000, 1962-64 'DUOTONE'

The second redesign was for the 1962 model year, first shown at the 1961 London Motor Show. This major face-lift included a redesign of the seats and trim panels. The seats were redesigned to feature a longitudinal flute design on the base and squab panels. Again the folding passenger seats were also available on two-door models.

Standard models featured a full-coloured trim whereas deluxe models featured the 'Duotone' inserts. Duotone is a contrasting light beige vinyl that is incorporated in the design as the fluted section of the seats, a wide horizontal band on the door panels and the rear armrests on two-door rear quarter panels.

We offer interior trim for this range to the original design in the original 'pastel' range of colours with or without the Duotone option; porcelain green, cherokee red and blue grey. Front seat covers are sold individually, and rear seat covers are supplied as a complete set and all are only available in vinyl. Trim panels are sold in pairs and only available in vinyl.

Blue grey

Cherokee red

Porcelain green

Duotone

Please note: Colours may vary slightly to samples shown here, due to the limitations of the colour printing press, and should be used as a guide only.

SERIES 5 MINOR 1000, 1964-71

The last redesign of the interior trim was introduced for the 1964 model year and ran until the end of production in 1971. This design featured a fluted pattern heat formed into the vinyl trim, the pattern is produced by a high frequency electric welding technique. The pattern is produced on seat covers, door panels and 2 door rear quarter panels.

We offer interior trim for this range in the original colours; autumn leaf, black, blue grey, cherokee red, navy blue & porcelain green. Please note: lime flower was also offered but is no longer available. Front seat covers are sold individually, and rear seat covers are supplied as a complete set and all are only available in vinyl. Trim panels are sold in pairs and only available in vinyl. Both front seats are fixed frames.

Autumn leaf

Black

Blue grey

Cherokee red

Navy blue

Porcelain green

Please note: Colours may vary slightly to samples shown here, due to the limitations of the colour printing press, and should be used as a guide only.

HEADLINING

This headlining for van & pick-up models is sewn ready to accept the cross member rail and 'piano' wires that secure it to the side rails. An extra piece of material is included for covering the piece of wood at the rear. Please see our website for full details.

Headlining kit to 1967 - light grey	HLK825191	£76.50
Headlining kit to 1967 - white fleck	HLK825192	£76.50
Headlining kit from 1968 - light grey	HLK825291	£76.50
Headlining kit from 1968 - white fleck	HLK825292	£76.50

FRONT SEAT FOAMS & FITTINGS, 1956-71

When re-trimming your seats we recommend that you invest in new straps & foams. Replacing these items will ensure the best possible shape, and comfort for your seats. We also offer a diaphragm as an alternative more durable support for the base foam. Straps are still used for the squab. These seat foams & fittings are suitable for all tubular frames fitted to all 1000 models from 1956 on.

Seat foam - front base (1 per seat)	SFP8301	£33.66
Seat foam - front base wrap (1 per seat)	SFP8302	£6.64
Seat foam - front squab kit (1 per seat)	SFP8303	£33.14
Seat strap - base & squab (12 per seat) (7 straps on base, 5 straps on squab).	SFP8310	£6.12
Seat diaphragm - base alternative to strap	SFP8311	£13.90
Clip - seat cover (10 per seat)	ADH3809	£0.79

RETROSound RADIOS

The RetroSound range of radio & MP3 players maintain the original 'twin knob' (DIN-D) style mounting required for many classic cars. Music can be played from external sources such as iPods, USB flash drives & SD cards, all connected out of sight.

Model 2

The stylish new Model 2 range offers a high spec radio that gives that classic look with modern digital music capabilities. The Model 2 features iPod and iPhone charge and play operation as well as Bluetooth connectivity with hands free calls. Also includes a daylight compatible wide angle LCD colour display.

- Rear USB & mini jack inputs.
- RDS FM tuner, AM/FM PLL tuner (30 presets).
- 25W x 4 (RMS) integrated amp.
- Pre-amp RCA output, fade/balance.
- 'InfiniMount' adjustable shaft/bracket system.
- Track, RDS data or clock display.
- Separate amp & aerial leads.
- 2 year manufacturers warranty.

RETROMOD SPEAKERS BY RETROSound

The RetroMod range of speakers from RetroSound has been designed to compliment their range of Classic radios and have been manufactured to meet the demands of modern high performance amplifiers.

Dual voice coils (DVC) speakers

This system allows for 2 stereo channels (left & right) to be connected to the same single speaker. This means that originality can be maintained on cars where a single speaker was fitted in the centre of the dash or rear shelf. These speakers are supplied individually without mesh grilles, to fit existing mountings.

6.5" dia 3 way, DVC, no grilles (each)230-505£54.00

5" x 7" 3 way, DVC, no grilles (each)230-545£65.00

6" x 9" 3 way, DVC, no grilles (each)230-510£48.00

Single voice coils (SVC) speakers

The SVC range of speakers is a standard configuration single channel speaker

for normal installations (left & right mounted speakers, such as doors or dash). These speakers are available in a range of sizes and specifications, see our website.

4.5" dia 2 way, 40W max, with grilles (pair)230-535£75.00

5" x 7" 3 way, 60W max, with grilles (pair)230-540£78.00

6" x 9" 3 way, 100W max, with grilles (pair)230-530£69.00

6" x 9" 3 way, 100W max, with grilles (pair)230-531£135.00

RetroMod 8" Subwoofer

The compact design and powerful bass response make this ideal for under seat mounting and numerous other in-car applications. The rigid die cast aluminium chassis and powerful Class D amplifier allows this sub to reproduce low frequencies down to 35Hz.

8" Subwoofer with internal amplifier230-550£175.00

Morris Minor **Restoration Parts**

Ordering Information

Notification of prices

Due to the volatility of world markets and currency fluctuations the prices in this catalogue are subject to change. Moss make every attempt to keep prices competitive and stable, however in common with all other suppliers in our industry, we reserve the right to alter these prices without prior notice.

For the latest prices, please visit our website www.moss-europe.co.uk. All prices are per unit (unless otherwise stated) and include (UK) VAT at 20% (where applicable) and are correct at the time of going to print. Postage and packaging is not included. E&OE. Where the price is replaced with NCA this part is Not Currently Available. Please visit our website (moss-europe.co.uk) or call our sales staff for the latest availability information or to enquire if we can offer an alternative part.

Product supersessions

Moss Europe's policy is to detail the most up to date part information in our catalogues. Where possible parts are kept to original specification. However, in some instances we have to supersede to the most viable alternative product to maintain supply and keep cars on the road. Every effort is made to ensure high quality products.

UK ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you have the opportunity, we invite you to visit one of our branches. Remember, supplying details of your car, (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications) saves time and helps us to help you. Please inform us of your customer number, as this will speed up the processing of your order.

Overseas ordering

We accept orders by mail, telephone, e-mail, fax and on-line at www.moss-europe.co.uk. If you visit the U.K. please come and visit one of our branches. When ordering, please ensure that you enclose full details of your name, address and customer number, plus details of your car (i.e. engine, commission or Vehicle Identification Number (VIN) LHD or RHD, year of manufacture and any modifications).

Please note: Overseas orders are often subject to local import duties, taxes and Customs clearance, which will need to be paid for at the point of entry. These charges are NOT included in the price of the goods or delivery prices. All relevant Customs forms and documentation needed to ensure the order arrives with the minimum of delay, will be included with your shipment. If you have any special requirements, please contact us to discuss them. Delivery charges are dependent upon the size and weight of the shipment. If a quotation is required prior to placing an order, please contact the export department at your chosen branch and they will be pleased to supply a full quotation.

Parts back-order system

A back-order system is used when a part is not in stock at the time of ordering. If the item is expected to become available within 6 months, then it will be put on back-order, unless the customer instructs us otherwise. When we have the parts in stock, the back-order will be processed automatically and the item will be dispatched to the customer. If the particular part becomes No Longer Available (NLA) or does not become available within 6 months the back-order will be cancelled. If you are unsure when you placed a back-order contact your local branch.

Dispatch & delivery methods

Orders for delivery in the UK may be dispatched by regular post for small/lightweight items, larger items may be dispatched via a courier. Please call us for the best delivery option for your order and the latest delivery prices. For delivery outside the UK we offer the following services.

- **Economy delivery (by road):** 2 to 5 days (approximately).
- **Express delivery (by air):** 1 to 2 days (Guaranteed) - next day service to most countries.
- **For small and low value orders we also use airmail.**

For these services, please ask for prices and the best delivery option when you place your order. Most deliveries (except airmail) are 'trackable', (inc: e-mail updates and internet access for selected carriers). Please remember, all carriage charges are dependent on weight band, volume, destination and delivery time. If a quotation is required prior to placing your order, please contact a member of the sales department. Alternatively, you can arrange your own delivery and dispatch.

Windscreen delivery information

We always suggest that windscreens should be collected from one of our branches to ensure you are able to transport your glass with the utmost of care. However, we understand that this is not always possible.

To minimise the possibility of damage to the windscreen in the shipping process, it is now Moss Europe's policy to ship windscreens packed in a specially designed heavy duty 'Tri-Wall' cardboard box. The price of this box is £35.00 (inc VAT), non-refundable and is not included in the price of the product. The crate's dimensions will also increase shipping costs, particularly in EU countries. The crate dimensions are 150cm x 33cm x 74cm. The maximum volumetric weight is 92kgs. For more information please contact your nearest Moss branch.

Hazardous goods delivery information

At the time of going to print, Moss Europe Ltd conforms to international shipping regulations regarding packaging and transportation of Hazardous Goods by road and sea freight (only). Due to these international shipping regulations and licencing rules all goods deemed as Hazardous are currently available for shipping to the UK and Europe only. If you place an order containing Hazardous goods and your shipping address is not in the UK or Europe, we will not be able to ship this item to you. Please contact your local branch or visit our website moss-europe.co.uk for the latest delivery information of Hazardous goods.

Quotations & payment methods

We will be pleased to provide a full parts quotation detailing price, availability and relevant shipping costs. Payment may be made by cash, personal cheque (to the card guarantee limit), Certified Bank Draft, Sterling Travellers Cheques and credit or debit card including: Mastercard, Visa, Delta. If you intend to make payment by Cheque or Bankers Draft when

using our fast mail-order parts service, please confirm parts availability and carriage charges. We can accept payments using PayPal for website, email and phone orders.

Value added tax (VAT)

Value Added Tax (VAT) at the current rate will be levied on all orders being dispatched to all countries within the European Community. EU countries may be charged at their local VAT rate, please contact us or see website for details. VAT is not charged on goods dispatched to countries outside of the EU. However, such orders are often subject to local import duty, taxes and Customs clearance, which MUST be paid by you at the port of entry. Such charges are not included in the cost of the goods or delivery prices.

Exchange units

We are able to offer a full rebuild service on numerous major components in our product range. We offer this service as an alternative to direct replacement parts, or when a brand new item is no longer available. However, the continuity of this exchange scheme needs the understanding and co-operation of our customers in relation to several important points: It is important to remember that "rebuild" does not mean "brand new". Rebuilding a unit involves stripping, cleaning, inspecting and re-assembling the unit. During this process, parts showing signs of wear will either be completely replaced or suitably renovated. However, it is not always feasible for major sub-components to be replaced with brand new ones, for example, an exchange engine will not have a new block. Due to the nature of certain product lines, some items can only be offered on a "one for one" exchange basis. This effectively means that you must offer us a viable unit before we can release a fully rebuilt item from our stock. In some instances we can only carry out reconditioning of your own unit. Our staff will inform you if this is the case.

All exchange units are subject to a surcharge. This surcharge serves two purposes; firstly, it acts as an incentive for you to return your old unit, and secondly it provides us with financial cover if your returned unit proves unsuitable for exchange purposes.

Whether or not your returned unit is suitable for exchange purposes cannot be ascertained until it is made available to us for inspection. As a general rule, suitable for exchange basically excludes any items that are beyond reasonable repair (e.g. crankcases pierced by a connecting rod) or units irrevocably damaged. We are also unable to accept units unless they are returned in whole, complete form (i.e. differential units which are returned partly stripped with no bearings and all the shims missing are not generally accepted), nor do we accept a "box of bits".

Surcharges will only be refunded once our core department has passed the item as serviceable. Under no circumstances can any exchange unit be shipped overseas until we receive your original unit. We have predetermined prices for our exchange units based on our experience of repair costs for a gearbox, axle or engine. Occasionally, however, the damage to the unit is so great that we will contact you before beginning work on your unit to advise you of any additional cost that may be incurred during the rebuild of the unit. We can return the unit (at your cost) if this proves unacceptable.

'Old unit' returns

Exchange items including reconditioned engines are subject to a surcharge that is refunded when a rebuildable unit (core) is returned. When you receive the rebuilt unit, attached to it will be a Core Return Authorisation Tag. This tag must be removed from the rebuilt unit and attached to the returned core in order to receive credit. Cores must be returned within 90 days of purchase in the original box, carton or engine cradle supplied with the rebuilt unit. Cores must be shipped clean and empty of fluids. Cores must be complete, assembled and rebuildable to receive credit or refund. You must pay all shipping charges for the return of the core and these charges are not refundable.

Warranty

All parts are warranted against defects in materials and workmanship for a period of twelve (12) months from the date of purchase. The warranty does not cover failure resulting from incorrect installation or misuse; failure during any competition, motorsports or track events; failure of any, or caused by any, related component. The warranty does not cover labour charges, nor will a warranty settlement be greater than the cost of the original component. Should you need to make a warranty claim, please contact us immediately at the branch of purchase. We will then advise you as to the best course of action. With all warranty claims a copy of the original purchase invoice must be produced.

Warranty returns

Parts that fail in use may be returned for 12 months from the date of purchase. Returns must be accompanied by the original invoice - no warranty claims will be paid without a copy of the original invoice. Return freight will be reimbursed. Electrical parts returned for warranty will be tested and if found functional, no return credit will be given and the part will be returned. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Non-warranty returns

All uninstalled parts, in their original packaging may be returned within 90 days for any reason. A copy of the original invoice or the picking label (which is generally attached to the original packaging) must accompany the return. Return freight is paid by the customer. If the return is due to our error, the return freight will be reimbursed. Parts returned outside of this policy or in non-resalable condition may not be accepted or may be assessed a 15% handling fee. Reimbursement is made by the original payment method. Complete the return form included in each order, pack the items securely and use the shipping return label supplied.

Customer service

We value your custom and wish to ensure that you receive the very best service. Every effort will be made to provide you with Quality Parts and Expertise in a relaxed, helpful and friendly manner. Should you consider the service you receive from us to be unsatisfactory, or you have any problems with the part(s) purchased, please advise a member of the sales team at the originating branch. If the matter is not resolved to your satisfaction, please contact our Customer Services Department and we will do our very best to resolve the issue, either email: customerservices@moss-europe.co.uk or write to: Customer Services, Moss Europe Ltd Unit 16, Hampton Business Park, Bolney Way, Feltham TW13 6DB England.

British Motor Heritage

Moss Europe Ltd is a British Motor Heritage approved specialist. Our agreement with British Motor Heritage allows us the use of marque logos and some of the artwork contained within this catalogue.

Morris Minor - A Brief History

Following from the success of the Series MM the Morris Minor went through numerous changes throughout its production life. The brief history below details some of the changes which occurred in each version of the Minor.

Model	Chassis Numbers	Years
Series II 803cc A Series Engine	(c) 160001 to 448714	August 1952 to September 1956

The Series II Morris Minor saw some key changes in the Morris Minor's history. Following the merger of Austin & Morris companies to form BMC the Minor was fitted with Austin's 'A Series', 803cc engine, replacing Morris's side valve engine. Other notable changes that took place during the Series II production include: fitting of A type rear axle; a revised dashboard with a central speedo and glove boxes either side; slatted grille with repositioned side lights; Deluxe models with leather faced seats, heaters, passenger sunvisor & overriders were also offered. The Series II also saw the introduction of new body styles; the 4 door Saloon, Traveller, along with the light commercial models - quarter ton Van & Pick up.

Series III Early 1000 948cc A Series Engine	(c) 448801 to 990289	October 1956 to September 1962
---	----------------------	-----------------------------------

The introduction of the Minor 1000 brought with it more improvements. The engine's capacity was increased to 948cc giving improved performance desired by many motoring journalists of the time; the split windscreen was replaced with a larger single piece, curved screen; the rear screen was also enlarged; a dished & wire spoked steering wheel was introduced; horn & trafficator controls were moved to a stalk switch on the steering column, latterly indicators were introduced with an integrated warning lamp on the end of the stalk, the horn was repositioned to the steering wheel; larger side lights were also added during production.

Series V Late 1000 1098cc A Series Engine	(c) 990290 to 1294082	September 1962 to April 1971
---	-----------------------	---------------------------------

The Minor 1000 was further updated with the 1098cc A Series engine, again giving more power & torque, fitted with a new design of air filter; the body remained largely unchanged from the 948cc model but the wipers now operated in tandem and were fitted with longer arms & blades; external changes included the fitting of combined side/indicator lamp units; the fascia was changed to include the chrome & alloy surround for the speedo and a glove box lid added to passenger's side with driver's side open; two-spoke safety steering wheel introduced; redesigned interior trim with heat-formed vinyl panels.

Serial Number Identification Plate Locations

The Car Number is stamped on a plate secured to the right-hand side dash panel.

The Car Number is stamped on a plate secured to the right-hand side dash panel.

The Engine Number is stamped on a plate secured to the right-hand side of the cylinder block.

The Rear Axle Number is stamped on the front of the left-hand axle tube adjacent to the spring seat.

The Gearbox Number is stamped on the top of the gearbox casing adjacent to the dipstick.

Please note: In most circumstances Moss can supply both an OE (Original Equipment) part or an Aftermarket part. The Aftermarket part offers a high quality part but usually at a reduced price and in certain circumstances replaces the OE part when no longer available. The Aftermarket part is indicated by a letter "Z" at the end of the part number.

16	GUG705009VC	£1.26	GASKET, rocker cover	1	
	296-006	£11.45	GASKET, rocker cover, silicone	1	standard cover
	296-007	£14.15	GASKET, rocker cover, silicone	1	alloy cover
17	12A1968	£4.32	LIFTING EYE (Fit lifting eyes for engine removal/replacement only).	2	
20	12A1950K	£105.00	ROCKER ASSEMBLY, recon/exchange (Reconditioned rocker shaft assembly built with new shaft, rocker arm bushes).	1	
21	12A1950	£13.70	ROCKER SHAFT, with end plugs	1	
	12A1950Z	£12.70	ROCKER SHAFT, aftermarket	1	

Note: Original rocker shafts were located by the front pedestal. The front pedestal also acts as an oil feed pipe for the rocker shaft & rockers. Our rocker shafts are machined so they can be located by either the first or second pedestal. Ensure the pedestal selected for the front position has the small oil feed hole in the bottom face that feeds to the rocker shaft.

22	2K4608	NCA	PLUG, screwed	a/r	
23	6K878	NCA	PLUG, plain	a/r	
24	2A18	£0.90	WASHER, spring, double coil	2	
25	6K555	£1.03	WASHER, plain	2

27	AEG169	NCA	WASHER, spacing tension springs	6	
28	2A258	£1.86	PEG, rocker shaft locating	1	
29	2A259	£3.44	PLATE, SCREW RETAINING	1	
30	12G1926	NCA	PEDESTAL, rocker shaft (Use in positions 1, 3 & 4).	3	with oil feed hole
31	12G1927	£6.66	PEDESTAL, rocker shaft (With tapped hole for rocker shaft locating peg. Use in position 2).	1	without oil feed hole
32	6K556	£2.16	SPRING, rocker spacing	3	
33	CAEG392	£16.80	SPACER SET, rocker	1	

Note: The friction and side loads on the rockers can be reduced and the location improved by using a steel spacer set instead of the rocker shaft springs.

35	2A553	NCA	ROCKER ARM, cast	8	cast type rocker arms
36	12A1215	£5.52	SCREW, rocker adjusting	8	
37	6K654	£1.42	NUT, locking	8	
38	2A21	£2.00	BUSH, rocker (Bush must be reamed & drilled).	8	
39	2A964	NCA	ROCKER ARM, pressed	8	pressed type rocker arms
40	12A1215	£5.52	SCREW, rocker adjusting	8	
41	6K654	£1.42	NUT, locking	8	

Note: Original rocker arms are no longer available, they were either cast (2A553), or pressed steel (2A964). They can be replaced by using forged rockers (12G1221) or sintered steel rockers (CAM289). It is advisable to replace them in matched sets due to the difference in weight compared with the existing rockers.

ill.	Part Number	Price £ea.	Description	Req.	Details

	ACA8158	£4.12	ROD, relay shaft to clutch fork, 5/16"	1	from (c) 990290
66	2A5022	NCA	NUT, rod end, 1/4" UNF	1	to (c) 198689
	ACA5009	£4.03	NUT, rod end, 5/16" UNF	1	from (c) 198690
67	JN2107	£0.22	NUT, locking, 1/4" UNF	1	to (c) 198689
	NT605041	£0.22	NUT, locking, 5/16" UNF	1	from (c) 198690
68	ACA8149K	£35.00	LINKAGE KIT, clutch mechanism, 5/16"	1	

Note: The original clutch linkage used 1/4" rods which were found to be too weak. With the introduction of 1098cc models the linkage mechanism was upgraded to use plates between the pedal & relay shaft and a 5/16" rod from the relay shaft to the clutch fork. Only the late 5/16" type linkage is available. It can be retro-fitted to early cars but the clutch pedal hole needs to be drilled out.

Collapsible & Non-Collapsible (Solid) Spacers

Pinion bearing pre-load was originally set by the use of a collapsible spacer between the two bearings. The correct pinion bearing pre-load is achieved when a rotational torque of between 11 & 13 pound inches (lbs. ins.) is required to rotate the pinion in the differential housing. This figure should only be checked when the seal is not fitted. It is attainable only when the pinion nut has been tightened sufficiently to 'nip' or pre-load the two bearings. It is not acceptable to over tighten the pinion nut and slack it off to obtain the correct bearing pre-load, if the spacer is over compressed then it must be scrapped, and a new one fitted.

The differential pinion may have had, at some time in its life, a solid spacer and shims fitted instead of the collapsible spacer; this is not uncommon. The solid spacer system was utilised on Morris Minors up to around 1959, after that the collapsible spacer system was used. The collapsible spacer is a far quicker (& therefore cheaper) method of obtaining pinion bearing pre-load and was adopted by many motor manufacturers.

Installing the solid spacer and shim system is time consuming because the entire assembled pinion must be fitted, tested, stripped and reassembled to adjust the bearing pre-load by the addition or subtraction of shims. Once set in this way the pinion bearing pre-load is impossible to change. Conversely, the collapsible spacer system can be adjusted after fitting if the pinion nut is removed and then refitted at a different torque setting. This means that service replacement of the differential pinion oil seal must be done with care, especially when refitting and re-torquing the pinion flange nut. A solid bearing spacer is offered for those who wish to convert to the more permanent solid spacer system. The solid spacer is part number BTA532X. Four different thickness adjusting shims are available as listed here.

42	WZX1310	£10.20	THROTTLE SPINDLE KIT (Comprises: 39, 44, 45 & gaskets).	1	
43	37H3043	£2.16	BEARING, spindle	2	
	AUD3079X	£4.55	BEARING, spindle, teflon	2	

Note: Use item AUD3079X when the carburettor body is worn around the throttle spindle. Reaming the boss in the carburettor body to 8mm allows the insert to be fitted, thereby bringing the hole diameter in the boss to the correct 1/4" internal diameter. New throttle spindles should always be fitted if these inserts are used.

44	WZX1320	£16.70	DISC, throttle	1	
45	AUC1358	£0.74	SCREW, throttle disc to spindle	2

**Alternator Conversion**

Update your Minor's charging system to an alternator with our comprehensive kit. An alternator provides more reliable charging and increased output which is particularly useful when several electrical systems are being used at once, such as lights, wipers, blower etc. The kit includes an 18ACR, 45 amp alternator, pulley, drive belt, brackets, hardware and comprehensive instructions. The car must also be converted to negative earth.

Wiring Harnesses

Wiring Harnesses: Minor Saloon & Tourer Models

Note: These looms are manufactured to the original specification with braided cables bound into a braided harness. Looms are also available bound with PVC tape.

50	MML101	£160.70	HARNESS, complete (Braided cables in a braided harness).	1 Minor SV E901 on dipping reflector headlamps & stop lamp (1948-49) Minor SV from (c) 501
	MML102	£244.40	HARNESS, complete (Braided cables in a braided harness).	1
	MML103	£192.80	HARNESS, complete (PVC cables in a braided harness).	1
	MML104	£244.40	HARNESS, complete (Braided cables in a braided harness).	1 (1949-52) Minor SV from (c) 63822
	MML105	£192.80	HARNESS, complete (PVC cables in a braided harness).	1
	MML106	£58.70	HARNESS, sub for flashers (Braided cables in a braided harness to fit flashing indicators).	1 (1948-61) (as on export cars)
	MML107	£48.00	HARNESS, sub for flashers (PVC cables in a braided harness to fit flashing indicators).	1
	MML201	£244.40	HARNESS, complete (Braided cables in a braided harness).	1 (1952-53) Minor Series II 803cc 4 door with main beam w/light RHD - from (c) 139175 LHD - from (c) 138415
	MML202	£192.80	HARNESS, complete (PVC cables in a braided harness).	1 (1952-53) Minor Series II 803cc 2 door with main beam w/light from (c) 140823
	MML203	£244.40	HARNESS, complete (Braided cables in a braided harness).	1 (1953-54) Minor Series II 803cc with offside speedo from (c) 221763
	MML204	£192.80	HARNESS, complete (PVC cables in a braided harness).	1 (1954) LHD export models with offside speedo relay flashers & twin horns to (c) 286440
	MML205	£244.40	HARNESS, complete (Braided cables in a braided harness).	1 (1954-55) Minor Series II 803cc central speedo, coil on bulkhead from (c) 286441
	MML206	£197.10	HARNESS, complete (PVC cables in a braided harness).	1 (1955-56) Minor Series II 803cc 4 door coil on dynamo from (c) 352300
	MML207	£261.20	HARNESS, complete (Braided cables in a braided harness).	1 (1955-56) Minor Series II 803cc 4 door coil on dynamo from (c) 352300
	MML208	£213.70	HARNESS, complete (PVC cables in a braided harness).	1 (1956-57) Minor 1000 Series III 948cc 2 & 4 door from (c) 448801
	MML209	£244.40	HARNESS, complete (Braided cables in a braided harness).	1
	MML210	£192.80	HARNESS, complete (PVC cables in a braided harness).	1
	MML211	£244.40	HARNESS, complete (Braided cables in a braided harness).	1
	MML212	£192.80	HARNESS, complete (PVC cables in a braided harness).	1
	MML213	£244.40	HARNESS, complete (Braided cables in a braided harness).	1
	MML214	£192.80	HARNESS, complete (PVC cables in a braided harness).	1
	MML301	£249.80	HARNESS, complete (Braided cables in a braided harness).	1
	MML302	£192.80	HARNESS, complete (PVC cables in a braided harness).	1

Wiring Harnesses: Minor Saloon Models - Originally PVC Cables

Looms in this range were originally supplied with PVC cables bound into a braided loom. They are available in a choice of either the original braided binding or PVC tape.

MML303	£197.10	HARNESS, complete (PVC cables in a braided harness).	1 (1958-61) Minor 1000 Series III 948cc 2 door from (c) 654750
MML304	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1
MML305	£197.10	HARNESS, complete (PVC cables in a braided harness).	1 (1958-61) Minor 1000 Series III 948cc 4 door from (c) 654750
MML306	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1
MML307	£211.60	HARNESS, complete (PVC cables in a braided harness).	1 (1961-62) Minor 1000 Series III 948cc 2 & 4 door with relay flashers from (c) 925555
MML308	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1
MML309	£211.60	HARNESS, complete (PVC cables in a braided harness).	1 (1962-63) Minor 1000 Series III 948cc 2 & 4 door with relay flashers + lucar connectors from (c) 962266
MML310	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1

Batteries, Wiring Harnesses & Fittings (Continued)

Wiring Harnesses: Minor Saloon Models - Originally PVC Cables

MML501	£211.30	HARNESS, complete (PVC cables in a braided harness).	1	(1963-64) Minor 1000 Series V 1098cc 2 & 4
MML502	£172.00	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1	door with amber flashers & pull type type starter from (c) 1043326
MML503	£216.00	HARNESS, complete (PVC cables in a braided harness).	1	(1965-70) Minor 1000 Series V 1098cc 2 & 4
MML504	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1	door with key start & dynamo from 1082280
MML505	£211.60	HARNESS, complete (PVC cables in a braided harness).	1	(1968-71) Minor 1000 Series V 1098cc 2 & 4
MML506	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1	door with key start & alternator from (c) 1192909

Wiring Harnesses: Minor Van, Pick Up & Traveller

MML215	£249.80	HARNESS, complete (Braided cables in a braided harness).	1	(1954-56) central speedo & splitscreen, Van/Pick up from (c) 5230 Traveller from 233795
MML216	£244.40	HARNESS, complete (Braided cables in a braided harness).	1	(1956) central speedo, Van/Pick up from (c) 21300 to 49767
MML311	£197.10	HARNESS, complete (PVC cables in a braided harness).	1	(1956-60) 1000cc 948cc no trafficators, Van/Pick up from (c) 49801 Traveller from (c) 448801
MML312	£211.30	HARNESS, complete (PVC cables in a braided harness).	1	1960-62 with trafficators
MML507	£211.60	HARNESS, complete (PVC cables in a braided harness).	1	(1962-63) 1098cc with relay flashers, Van/Pick up from (c) 148974 on Traveller from (c) 990294
MML509	£211.60	HARNESS, complete (PVC cables in a braided harness).	1	(1964-65) with amber flashers & pull type starter, Van/Pick up from (c) 158974 Traveller from (c) 1043326
MML510	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1	(1965-70) with key start & dynamo, Van/Pick up from (c) 177160 Traveller from (c) 1082537
MML511	£211.60	HARNESS, complete (PVC cables in a braided harness).	1	(1965-70) with key start & dynamo, Van/Pick up from (c) 177160 Traveller from (c) 1082537
MML512	£216.00	HARNESS, complete (PVC cables in a braided harness).	1	(1965-70) with key start & alternator, Van/Pick up from (c) 177160 Traveller from (c) 1082537
MML513	£172.20	HARNESS, complete (PVC cables wrapped in PVC tape harness).	1	(1965-70) with key start & alternator, Van/Pick up from (c) 177160 Traveller from (c) 1082537

SEAT COVERS & TRIM PANELS

Part of the Minor's charm is its simplicity. Throughout production the Minor featured a smart but functional interior which has helped the Minor retain much of its charm.

The interior trim went through a number of style changes throughout production, particularly between 1956 & 1964; these changes mainly occurred to the seat cover and trim panel designs.

We now stock the majority of interior trim panel designs for all Minor models from 1949-1971, available in leather or vinyl. Please see pages A28-A40 in the accessories section of this catalogue for our full range of Morris Minor seat covers, trim, headlinings, sun visors, fittings, parcel trays & gloveboxes. Series MM and series II trim are only made to special order; please contact us for more information.

Please note: Colours may vary slightly to samples shown here, due to the limitations of the colour printing press, and should be used as a guide only.

CARPET SETS

We offer a range of carpets to suit the various models of the Minor, from the early MM series to the Van & Pick-up models.

Series MM & Series II are manufactured to the original design with stitched contour pieces over the tunnel and wheel arches. These carpets sets are only made to special order; please contact us for more information.

For Series III & V models we offer a moulded carpet set available in selected colours. These carpet sets feature a contoured tunnel and front wheel arch carpets. The tunnel carpet is designed to cover the handbrake bracket & cables giving a smart & tidy appearance. The footwell mats are backed with a special hard wearing PVC coating and feature fully bound edges with a heel mat on the driver's side. The non-moulded carpet sets are made from a tufted pile carpet and are stitched around the tunnel to form the shape. Due to the texture of the carpet these seams are concealed, giving a good finish. Carpet sets include instructions & fittings. Adhesive sold separately, please see out Restoration Tools catalogue for more information.

Van & Pick-up models have some unique trim components, including carpets, seat covers and door panels. Please see page A40 for more information.
