

Duplex Vernier Gear Set

Part Number: TT14281

All 1296/1500 Engines From 1971 Approx

Kit Contents:	Part No.	Qty.	Description
	145864	1	Crankshaft Gear
	145866	1	Tensioner
	2H4286	1	Timing Chain
	TT1225	1	Vernier Timing Gear
	036411	1	Lock Tab

General Notes:

The installation of these gears is a straight forward replacement for the standard simplex gear set.

The crank gear is installed and the standard spacer shims are retained until the alignment of the two gears can be checked, they should be parallel.

The tensioner is replaced with the standard version with the cut-out towards the engine plate.

The camshaft gear can only be installed on one surface (to align with crank gear) but the four holes are offset to the teeth centre line so that accurate timing can be found with care.
